

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
1,10-Decanediol	S		Final Report 06/2018 Available from CIR
1,2-Butanediol	S		IJT 31(Suppl. 2):147-168, 2012
1,2-Hexanediol	S		IJT 31(Suppl. 2):147-168, 2012
1,4-Butanediol	I	The Panel also concluded that the available data are insufficient to make a determination that 1,4-Butanediol... is safe under the intended conditions of use in cosmetic formulations.	Final Report 06/2018 Available from CIR
1,4-Butanediol/Succinic Acid/Adipic Acid/HDI Copolymer	S		Final Report 06/2016 Available from CIR
1,5-Pentanediol	S		Final Report 06/2018 Available from CIR
1-Hydroxyethyl 4,5-Diamino Pyrazole Sulfate	S		IJT 41(S1):695-79S, 2022
1-Naphthol	S		JACT 8(4):749-768, 1989;IJT 30(Suppl. 2):73-127, 2011
10-Hydroxydecanoic Acid	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...10-Hydroxydecanoic Acid...	Final Report 04/2019 Available from CIR
10-Hydroxystearic Acid	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...10-Hydroxystearic Acid...	Final Report 04/2019 Available from CIR
2,3-Butanediol	I	The Panel also concluded that the available data are insufficient to make a determination that ... 2,3-Butanediol ... is safe under the intended conditions of use in cosmetic formulations.	Final Report 06/2018 Available from CIR
2,3-Naphthalenediol	Z	The CIR Expert Panel concludes that the available data are insufficient to support the safety of 2,3-Naphthalenediol as used in cosmetics.	JACT 7(3):353-357, 1988
2,4-Diaminophenol	SQ	On the basis of the data included in this report, the CIR Expert Panel concludes that 2,4-Diaminophenol and 2,4-Diaminophenol Dihydrochloride are safe for use in hair dyes at concentrations up to 0.2% (as the free base). 2009 RE-REVIEW - The Expert Panel noted that 2,4-Diaminophenol Dihydrochloride is now termed 2,4-Diaminophenol Hydrochloride.	JACT 13(5):330-343, 1994; IJT 30(Suppl. 2):73-127, 2011
2,4-Diaminophenol Dihydrochloride	SQ	On the basis of the data included in this report, the CIR Expert Panel concludes that 2,4-Diaminophenol and 2,4-Diaminophenol Dihydrochloride are safe for use in hair dyes at concentrations up to 0.2% (as the free base). 2009 RE-REVIEW - The Expert Panel noted that 2,4-Diaminophenol Dihydrochloride is now termed 2,4-Diaminophenol Hydrochloride.	JACT 13(5):330-343, 1994; IJT 30(Suppl. 2):73-127, 2011

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
2,4-Diaminophenol HCl	SQ	On the basis of the data included in this report, the CIR Expert Panel concludes that 2,4-Diaminophenol and 2,4-Diaminophenol Dihydrochloride are safe for use in hair dyes at concentrations up to 0.2% (as the free base). 2009 RE-REVIEW - The Expert Panel noted that 2,4-Diaminophenol Dihydrochloride is now termed 2,4-Diaminophenol Hydrochloride.	JACT 13(5):330-343, 1994; IJT 30(Suppl. 2):73-127, 2011
2,4-Diaminophenoxyethanol Dihydrochloride	S		JACT 10(1):113-134, 1991; Final Report 12/2007 Available from CIR
2,4-Diaminophenoxyethanol HCl	S		JACT 10(1):113-134, 1991; Final Report 12/2007 Available from CIR
2,4-Diaminophenoxyethanol Sulfate	S		Final Report 12/2007 Available from CIR
2-Amino-3-Hydroxypyridine	S		IJT 39(S2):91-97,2020
2-Amino-3-Nitrophenol	S		IJT 28(Suppl. 3):217-251, 2009
2-Amino-4-Hydroxyethylaminoanisole	SQ	The CIR Expert Panel concluded that 2-amino-4-hydroxyethylaminoanisole and 2-amino-4-hydroxyethylaminoanisole sulfate are safe for use in oxidative hair dye formulations. Were the free base (2-amino-4-hydroxyethylaminoanisole) to be used in the future, the expectation is that it would be used at concentrations similar to the sulfate salt. The Expert Panel cautions that these ingredients should not be used in hair dye products in which N-nitroso compounds may be formed.	IJT 32(Suppl. 1):25-35, 2013
2-Amino-4-Hydroxyethylaminoanisole Sulfate	SQ	The CIR Expert Panel concluded that 2-amino-4-hydroxyethylaminoanisole and 2-amino-4-hydroxyethylaminoanisole sulfate are safe for use in oxidative hair dye formulations. Were the free base (2-amino-4-hydroxyethylaminoanisole) to be used in the future, the expectation is that it would be used at concentrations similar to the sulfate salt. The Expert Panel cautions that these ingredients should not be used in hair dye products in which N-nitroso compounds may be formed.	IJT 32(Suppl. 1):25-35, 2013
2-Amino-4-Nitrophenol	S		IJT 28(Suppl. 3):217-251, 2009
2-Amino-4-Nitrophenol Sulfate	S		IJT 28(Suppl. 3):217-251, 2009
2-Amino-5-Nitrophenol	S		IJT 28(Suppl. 3):217-251, 2009
2-Amino-6-Chloro-4-Nitrophenol	SQ	On the basis of the animal and clinical data included in this report, the CIR Expert Panel concludes that 2-Amino-6-Chloro-4-Nitrophenol and its hydrochloride salt are safe for use in hair dye formulations at concentrations of up to 2.0%. The CIR Expert Panel re-affirmed the above conclusion on December 2012.	IJT 16(S1):131-143, 1997; IJT 36(Suppl 2):14-58, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
2-Amino-6-Chloro-4-Nitrophenol Hydrochloride	SQ	On the basis of the animal and clinical data included in this report, the CIR Expert Panel concludes that 2-Amino-6-Chloro-4-Nitrophenol and its hydrochloride salt are safe for use in hair dye formulations at concentrations of up to 2.0%.	IJT 16(S1):131-143, 1997
2-Bromo-2-Nitropropane-1,3-Diol	SQ	The evidence at hand indicates 2-Bromo-2-Nitropropane-1,3-Diol to be safe as a cosmetic ingredient at concentrations up to and including 0.1 percent except under circumstances where its action with amines or amides can result in the formation of nitrosamines or nitrosamides.	JEPT 4(4):47-61, 1980; JACT 3(3):139-155, 1984; IJT 25(Suppl. 2) :1-89,2006
2-Chloro-p-Phenylenediamine	S		JACT 11(4):521-530, 1992; IJT 30(Suppl. 2):73-127, 2011
2-Chloro-p-Phenylenediamine Sulfate	S		JACT 11(4):521-530, 1992; IJT 30(Suppl. 2):73-127, 2011
2-Ethoxy Ethoxy Ethyl Methacrylate	SQ	Based on available data, the CIR Expert Panel concluded that 2-Ethoxy Ethoxy Ethyl Methacrylate ... is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	IJT 24(Suppl 5):53-100, 2005
2-Methyl-5-Hydroxyethylaminophenol	S		JACT 9(2):185-202, 1990; IJT 27(Suppl. 1):77-142, 2008
2-Methylresorcinol	S		JACT 5(3):167-203, 1986; IJT 27(Suppl. 1):77-142, 2008
2-Nitro-p-Phenylenediamine	S		JACT 4(3):161-202, 1985; IJT 25(Suppl. 2) :1-89,2006
2-Oleamido-1,3-Octadecanediol	S		IJT 39(S3):5-25,2020
3-Methylamino-4-Nitrophenoxyethanol	S		IJT 27(Suppl. 2):41-51, 2008
3-Nitro-p-Hydroxyethylaminophenol	S		IJT 28(Suppl. 3):217-251, 2009
4-Amino-2-Hydroxytoluene	S		JACT 8(4):569-587, 1989; IJT 27(Suppl. 1):77-142, 2008
4-Amino-2-Nitrophenol	Z	Based on the data contained in this report, the CIR Expert Panel concludes that 2-amino-3-nitrophenol, 2-amino-4-nitrophenol,2-amino-4-nitrophenol sulfate, 2-amino-5-nitrophenol, 4-amino-3-nitrophenol, 3-nitro-p-hydroxyethylaminophenol, and 4-hydroxypropylamino-3-nitrophenol are safe as hair dye ingredients in the practices of use and concentration as described in this safety assessment, but the data are insufficient to make a determination of safety for 4-amino-2-nitrophenol.	IJT 28(Suppl. 3):217-251, 2009
4-Amino-3-Nitrophenol	S		IJT 28(Suppl. 3):217-251, 2009
4-Amino-m-Cresol	S		IJT 23 (Suppl. 2):1-22, 2004

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
4-Chloro-2-Aminophenol	SQ;l;Z	The CIR Expert Panel concludes that the available data support the safety of 6-Amino-m-Cresol, 4-Amino-m-Cresol, 5-Amino-4-Chloro-o-Cresol and 5-Amino-6-Chloro-o-Cresol as used in oxidative and nonoxidative (semipermanent) for dyes. The available data also support the safety of 6-Amino-o-Cresol and 4-Chloro-2-Aminophenol for use in oxidative hair dyes, but are insufficient to support the safety of 6-Amino-o-Cresol and 4-Chloro-2-Aminophenol and nonoxidative (semipermanent) hair dyes.	IJT 23 (Suppl. 2):1-22, 2004
4-Chlororesorcinol	S		JACT 15(4):284-294, 1996; IJT 36(Suppl 2):14-58, 2017
4-Hydroxybenzoic Acid	SQ	The CIR Expert Panel concluded that the following 20 parabens are safe in cosmetics in the present practices of use and concentration described in the safety assessment when the sum of the combined concentration of parabens in any given formulation does not exceed 0.8 %...4-Hydroxybenzoic Acid...	IJT 39(S1):5-97,2020
4-Hydroxypropylamino-3-Nitrophenol	S		IJT 28(Suppl. 3):217-251, 2009
4-Methoxy-m-Phenylenediamine	U	On the basis of the information included in this report the CIR Expert Panel concludes that 4-Methoxy-m-Phenylenediamine, 4-Methoxy-m-Phenylenediamine Sulfate and 4-Methoxy-m-Phenylenediamine HCL are unsafe for use in cosmetic products.	JACT 11(4):381-422, 1992
4-Methoxy-m-Phenylenediamine Sulfate	U	On the basis of the information included in this report the CIR Expert Panel concludes that 4-Methoxy-m-Phenylenediamine, 4-Methoxy-m-Phenylenediamine Sulfate and 4-Methoxy-m-Phenylenediamine HCL are unsafe for use in cosmetic products.	JACT 11(4):381-422, 1992
4-Methoxy-m-Phenylenediamine-HCl	U	On the basis of the information included in this report the CIR Expert Panel concludes that 4-Methoxy-m-Phenylenediamine, 4-Methoxy-m-Phenylenediamine Sulfate and 4-Methoxy-m-Phenylenediamine HCL are unsafe for use in cosmetic products.	JACT 11(4):381-422, 1992
4-Nitro-m-Phenylenediamine	Z	The safety of 4-Nitro-m-Phenylenediamine has not been documented and substantiated. The CIR Expert Panel cannot conclude that this ingredient is safe for use in cosmetic products until the appropriate safety data have been obtained and evaluated.	JACT 11(4):489-495, 1992
4-Nitro-o-Phenylenediamine	S		JACT 4(3):161-202, 1985; IJT 25(Suppl. 2) :1-89,2006
5-Amino-4-Chloro-o-Cresol	S		IJT 23 (Suppl. 2):1-22, 2004
5-Amino-6-Chloro-o-Cresol	S		IJT 23 (Suppl. 2):1-22, 2004

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
5-Bromo-5-Nitro-1,3-Dioxane	SQ	The evidence at hand indicates 5-Bromo-5-Nitro-1,3-Dioxane to be safe as a cosmetic ingredient at concentrations up to and including 0.1 percent except under circumstances where its action with amines or amides can result in the formation of nitrosamines or nitrosamides.	JACT 9(2):279-288, 1990; IJT 30(Suppl. 2):73-127, 2011
6-Amino-m-Cresol	S		IJT 23 (Suppl. 2):1-22, 2004
6-Amino-o-Cresol	SQ;l;Z	The CIR Expert Panel concludes that the available data support the safety of 6-Amino-m-Cresol, 4-Amino-m-Cresol, 5-Amino-4-Chloro-o-Cresol and 5-Amino-6-Chloro-o-Cresol as used in oxidative and nonoxidative (semipermanent) hair dyes. The available data also support the safety of 6-Amino-o-Cresol and 4-Chloro-2-Aminophenol for use in oxidative hair dyes, but are insufficient to support the safety of 6-Amino-o-Cresol and 4-Chloro-2-Aminophenol in nonoxidative (semipermanent) hair dyes.	IJT 23 (Suppl. 2):1-22, 2004
6-Hydroxyindole	S		IJT 33(Suppl. 3):24-35, 2014
Acacia Catechu Gum	Z	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: Acacia Catechu Gum...	IJT 24(Suppl. 3):75-118, 2005
Acacia Concinna Fruit Extract	UNS	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ... Acacia Concinna Fruit Extract...	IJT 24(Suppl. 3):75-118, 2005
Acacia Concinna Fruit Powder	UNS	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products:...Acacia Concinna Fruit Powder...	IJT 24(Suppl. 3):75-118, 2005
Acacia Dealbata	Z	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ... Acacia Dealbata ...	IJT 24(Suppl. 3):75-118, 2005
Acacia Dealbata Extract	Z	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ...Acacia Dealbata Leaf Extract....	IJT 24(Suppl. 3):75-118, 2005
Acacia Dealbata Leaf Extract	Z	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ...Acacia Dealbata Leaf Extract...	IJT 24(Suppl. 3):75-118, 2005

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Acacia Dealbata Leaf Wax	Z	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ... Acacia Dealbata Leaf Wax...	IJT 24(Suppl. 3):75-118, 2005
Acacia Decurrens	UNS	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products:...Acacia Decurrens Extract...	IJT 24(Suppl. 3):75-118, 2005
Acacia Decurrens Extract	UNS	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products:...Acacia Decurrens Extract...	IJT 24(Suppl. 3):75-118, 2005
Acacia Farnesiana	Z	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ... Acacia Farnesiana Extract...	IJT 24(Suppl. 3):75-118, 2005
Acacia Farnesiana Extract	UNS	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ...Acacia Farnesiana Extract...	IJT 24(Suppl. 3):75-118, 2005
Acacia Farnesiana Flower Wax	UNS	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ...Acacia Farnesiana Flower Wax...	IJT 24(Suppl. 3):75-118, 2005
Acacia Farnesiana Flower/Stem Extract	UNS	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ...Acacia Farnesiana Extract...	IJT 24(Suppl. 3):75-118, 2005
Acacia Farnesiana Gum	Z	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ...Acacia Farnesiana Gum...	IJT 24(Suppl. 3):75-118, 2005
Acacia Senegal Extract	UNS	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products: ... Acacia Senegal Extract.	IJT 24(Suppl. 3):75-118, 2005
Acacia Senegal Flower/Stem Extract	UNS	The Panel also concluded that the available data are insufficient to support the safety of the following ingredients in cosmetic products:... Acacia Senegal Flower/Stem Extract.	IJT 24(Suppl. 3):75-118, 2005
Acacia Senegal Gum	S		IJT 24(Suppl. 3):75-118, 2005
Acacia Senegal Gum Extract	S		IJT 24(Suppl. 3):75-118, 2005

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Acetamide MEA	SQ	The CIR Expert Panel concluded that the ethanolamides listed subsequently are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating. The Expert Panel cautioned that these ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Acetamide MEA	JACT 12(3):225-236, 1993; IJT 30(Suppl. 2):73-127, 2011; IJT 34(Suppl.1):18-34, 2015
Acetic Acid	S		IJT 31(Suppl. 1):112-136, 2012
Acetic/Linoleic/Palmitic Triglyceride	S		Final Report 12/2017 Available from CIR
Acetyl Arginine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Acetyl Arginine	IJT 36(Suppl. 1):17-56, 2017
Acetyl Carnitine	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Acetyl Carnitine..	IJT 31(Suppl. 3):296-341, 2012
Acetyl Carnitine HCl	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Acetyl Carnitine HCl...	IJT 31(Suppl. 3):296-341, 2012
Acetyl Cysteine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Acetyl Cysteine	IJT 36(Suppl. 1):17-56, 2017
Acetyl Glucosamine	SQ	The Expert Panel for Cosmetic Ingredient Safety concluded that Acetyl Glucosamine is safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	Final Report Available from CIR 06/2022
Acetyl Glutamic Acid	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Acetyl Glutamic Acid	IJT 36(Suppl. 1):17-56, 2017
Acetyl Glutamine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Acetyl Glutamine	IJT 36(Suppl. 1):17-56, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Acetyl Hexapeptide-8 Amide	SQ;l	The Expert Panel for Cosmetic Ingredient Safety concluded that Acetyl Hexapeptide-8 Amide is safe in cosmetics in the present practices of use and concentration described in this safety assessment when the concentration does not exceed 0.005%, and the available data are insufficient to make a determination that Acetyl Hexapeptide-8 Amide is safe under the intended conditions of use in cosmetic formulations at concentrations > 0.005%	Final Report Available from CIR 03/2021
Acetyl Histidine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Acetyl Histidine	IJT 36(Suppl. 1):17-56, 2017
Acetyl Methionine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Acetyl Methionine	IJT 36(Suppl. 1):17-56, 2017
Acetyl Proline	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Acetyl Proline	IJT 36(Suppl. 1):17-56, 2017
Acetyl Tributyl Citrate	S		IJT 21(Suppl.2):1-17, 2002
Acetyl Triethyl Citrate	S		IJT 21(Suppl.2):1-17, 2002
Acetyl Trihexyl Citrate	S		IJT 21(Suppl.2):1-17, 2002
Acetyl Trioctyl Citrate	S		IJT 21(Suppl.2):1-17, 2002
Acetyl Tyrosine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Acetyl Tyrosine	IJT 36(Suppl. 1):17-56, 2017
Acetylated Lanolin	S		JEPT 4(4):63-92, 1980; IJT 24(Suppl. 1):1-102, 2005
Acetylated Lanolin Alcohol	S		JEPT 4(4):63-92, 1980; IJT 24(Suppl. 1):1-102, 2005
Achillea Millefolium Extract	SQ	The CIR concluded that ...Achillea Millefolium Extract is safe in the present practices of use and concentration when formulated to be non-sensitizing.	IJT 20(S2):79-84, 2001; IJT 35(Suppl. 3):5-15, 2016
Achillea Millefolium Flower Extract	SQ	The CIR concluded that ...Achillea Millefolium Flower Extract is safe in the present practices of use and concentration when formulated to be non-sensitizing.	IJT 20(S2):79-84, 2001; IJT 35(Suppl. 3):5-15, 2016
Achillea Millefolium Flower/Leaf/Stem Extract	SQ	The CIR concluded that ...Achillea Millefolium Flower/Leaf/Stem Extract is safe in the present practices of use and concentration when formulated to be non-sensitizing.	IJT 20(S2):79-84, 2001; IJT 35(Suppl. 3):5-15, 2016
Acid Orange 3	SQ	On the basis of the animal and clinical data included in this report, the CIR Expert Panel concludes that Acid Orange 3 is safe for use in hair dye formulations at concentrations &lt; 0.2%.	IJT 19(S1):1-9, 2000

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Acrylates Crosspolymer-4	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates Crosspolymer-4...	Final Report 12/2018 Available from CIR
Acrylates Crosspolymer-5	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates Crosspolymer-5...	Final Report 12/2018 Available from CIR
Acrylates/Acrylamide Copolymer	S		Final Report 03/2022 Available from CIR
Acrylates/Ammonium Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Ammonium Methacrylate Copolymer...	IJT 21(Suppl 3):1-50, 2002;Final Report 12/2018 Available from CIR
Acrylates/Beheneth-25 Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Beheneth-25 Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Beheneth-25 Methacrylate/Steareth-30 Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Beheneth-25 Methacrylate/Steareth-30 Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Bis-Hydroxypropyl Dimethicone Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
Acrylates/C10-30 Alkyl Acrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/C10-30 Alkyl Acrylate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Acrylates/C10-30 Alkyl Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/C10-30 Alkyl Methacrylate Copolymer...	Final Report 12/2018 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Acrylates/C12-13 Alkyl Methacrylates/Methoxyethyl Acrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the cross-linked alkyl acrylates are safe in the present practices of use and concentration described in this safety assessment, except when they are polymerized in benzene. Acrylates/C10-30 alkyl acrylate cross polymer may be polymerized in benzene, and the available data is insufficient to make a determination of safety for this cross-linked alkyl acrylate when it is polymerized in benzene.	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Acrylates/C12-22 Alkyl Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/C12-22 Alkyl Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/C26-28 Olefin Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/C26-28 Olefin Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/C5-8 Alkyl Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/C5-8 Alkyl Acrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Ceteareth-20 Methacrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Ceteareth-20 Methacrylate Crosspolymer...	Final Report 12/2018 Available from CIR
Acrylates/Ceteareth-20 Methacrylate Crosspolymer-2	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Ceteareth-20 Methacrylate Crosspolymer-2...	Final Report 12/2018 Available from CIR
Acrylates/Ceteth-20 Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Ceteth-20 Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Dimethiconol Acrylate Copolymer	S		IJT 36(Suppl. 3):31-50, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Acrylates/Ethylhexyl Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Ethylhexyl Acrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Ethylhexyl Acrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Ethylhexyl Acrylate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Acrylates/Ethylhexyl Acrylate/Glycidyl Methacrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the cross-linked alkyl acrylates are safe in the present practices of use and concentration described in this safety assessment, except when they are polymerized in benzene. Acrylates/C10-30 alkyl acrylate cross polymer may be polymerized in benzene, and the available data is insufficient to make a determination of safety for this cross-linked alkyl acrylate when it is polymerized in benzene.	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Acrylates/Ethylhexyl Acrylate/Styrene Copolymer	S		Final Report 9/2014 Available from CIR
Acrylates/Hydroxyesters Acrylates Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating ... Acrylates/Hydroxyesters Acrylates Copolymer ...	IJT 21(Suppl. 3):1-50, 2002;Final Report 12/2018 Available from CIR
Acrylates/Hydroxyethyl Acrylate/Lauryl Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Hydroxyethyl Acrylate/Lauryl Acrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Hydroxyethyl Acrylate/Methoxyethyl Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Hydroxyethyl Acrylate/Methoxyethyl Acrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Laureth-25 Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Laureth-25 Methacrylate Copolymer...	Final Report 12/2018 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Acrylates/Lauryl Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Lauryl Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Lauryl Methacrylate/Tridecyl Methacrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Lauryl Methacrylate/Tridecyl Methacrylate Crosspolymer...	Final Report 12/2018 Available from CIR
Acrylates/Methacrylamide Copolymer	S		Final Report 03/2022 Available from CIR
Acrylates/Methoxy PEG-15 Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Methoxy PEG-15 Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Methoxy PEG-23 Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Methoxy PEG-23 Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Methoxy PEG-23 Methacrylate/Perfluorooctyl Ethyl Acrylate Copolymer	Z	The CIR Expert Panel concluded that the following two fluoropolymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment.Fluoropolymers PTFE Hexafluoropropylene/Tetrafluoroethylene Copolymer*.	Final Report 10/2018 available from CIR
Acrylates/Methoxy PEG-4 Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Methoxy PEG-4 Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Methoxy PEG-90 Methacrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Methoxy PEG-90 Methacrylate Crosspolymer...	Final Report 12/2018 Available from CIR
Acrylates/Octylacrylamide Copolymer	S		Final Report 03/2022 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Acrylates/Palmeth-25 Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Palmeth-25 Acrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/PEG-4 Dimethacrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/PEG-4 Dimethacrylate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Acrylates/Perfluorohexylethyl Methacrylate Copolymer	Z	The CIR Expert Panel concluded that the following two fluoropolymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment.Fluoropolymers PTFE Hexafluoropropylene/Tetrafluoroethylene Copolymer*.	Final Report 10/2018 available from CIR
Acrylates/PVP Copolymer	S		IJT 21(Suppl. 3):1-50, 2002;Final Report 12/2018 Available from CIR
Acrylates/Steareth-20 Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Steareth-20 Methacrylate Copolymer...	IJT 21(Suppl 3):1-50, 2002;Final Report 12/2018 Available from CIR
Acrylates/Steareth-20 Methacrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Steareth-20 Methacrylate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Acrylates/Steareth-30 Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Steareth-30 Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Steareth-50 Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Acrylates/Steareth-50 Acrylate Copolymer ...	IJT 21(Suppl. 3):1-50, 2002;Final Report 12/2018 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Acrylates/Stearyl Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Stearyl Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylates/Stearyl Methacrylate/VP Copolymer	S		Final Report 12/2018 Available from CIR
Acrylates/t-Butylacrylamide Copolymer	S		Final Report 03/2022 Available from CIR
Acrylates/VA Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/VA Copolymer...	IJT 21(Suppl 3):1-50, 2002;Final Report 12/2018 Available from CIR
Acrylates/VA Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/VA Crosspolymer...	Final Report 12/2018 Available from CIR
Acrylates/Vinyl Isodecanoate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Vinyl Isodecanoate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Acrylates/Vinyl Neodecanoate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylates/Vinyl Neodecanoate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Acrylates/VP Copolymer	S		Final Report 12/2018 Available from CIR
Acrylic Acid/C12-22 Alkyl Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylic Acid/C12-22 Alkyl Acrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylic Acid/Phosphorylcholine Glycol Acrylate Crosspolymer	S		Final Report Available from CIR 06/2022
Acrylic Acid/Stearyl Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Acrylic Acid/Stearyl Acrylate Copolymer...	Final Report 12/2018 Available from CIR
Acrylic Acid/VP Crosspolymer	S		Final Report 12/2018 Available from CIR

Alaria Esculenta Extract	S		Final Report 09/2019 Available from CIR
Alcaligenes Polysaccharides	S		IJT 35(Suppl. 1):5-49, 2016
		The CIR Expert Panel concluded that Alcohol Denat... denatured with t-Butyl Alcohol, Denatonium Benzoate, Diethyl Phthalate, or Methyl Alcohol are safe in the practices of use and concentration as described in this safety assessment, and, that Denatonium Benzoate is safe as a denaturant.	
		The CIR Expert Panel concluded that the available data are insufficient to support the safety of Alcohol Denat... denatured with Quassin, Brucine, and Brucine Sulfate in cosmetic products, and that the available data are insufficient to support the safety of Quassin, Brucine, and Brucine Sulfate as denaturants.	
Alcohol Denat.	UNS		IJT 27(Suppl. 1):1-43, 2008
		The safety of Aldioxa has not been documented and substantiated. The CIR Expert Panel cannot conclude that this ingredient is safe for use in cosmetic products until the appropriate safety data have been obtained and reevaluated.	
Aldioxa	UNS		JACT 12(3):237-242, 1993
Aleurites Moluccana Seed Oil	S		IJT 36(Suppl. 3):51-129, 2017

Allantoin Panthenol	S		IJT 29(Suppl. 2):84-97, 2010
Allantoin Polygalacturonic Acid	S		IJT 29(Suppl. 2):84-97, 2010
		The CIR Expert Panel concluded that the cross-linked alkyl acrylates are safe in the present practices of use and concentration described in this safety assessment, except when they are polymerized in benzene. Acrylates/C10-30 alkyl acrylate cross polymer may be polymerized in benzene, and the available data is insufficient to make a determination of safety for this cross-linked alkyl acrylate when it is polymerized in benzene.	
Allyl Methacrylate/Glycol Dimethacryate Crosspolymer	SQ		Final Report 12/2018 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Allyl Methacrylate/Glycol Dimethacrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Allyl Methacrylate/Glycol Dimethacrylate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Allyl Methacrylates Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Allyl Methacrylates Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Almond Meal	S		JACT 2(5):85-99, 1983; IJT 24(Suppl. 1):1-102, 2005
Almond Oil PEG-6 Esters	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...Almond Oil PEG-6 Esters...	IJT 33(Suppl 4):13-39, 2014
Almond Oil PEG-8 Esters	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...Almond Oil PEG-8 Esters...	IJT 33(Suppl 4):13-39, 2014
Almond Oil Propylene Glycol Esters	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in this safety assessment in cosmetics when formulated to be non-irritating...Almond Oil Propylene Glycol Esters....	Final Report 12/2014 Available from CIR
Almond Oil/Polyglyceryl-10 Esters	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Almond Oil/Polyglyceryl-10 Esters...	Final Report 9/2016 Available from CIR
Almondamide DEA	SQ	The CIR Expert Panel concluded that the following 33 diethanolamides are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating and when the levels of free diethanolamine in the diethanolamides do not exceed the present practices of use and concentration of diethanolamine itself. The Expert Panel cautions that ingredients should not be used in cosmetic products in which N-nitroso compounds can be formed...Almondamide DEA...	IJT 32(Suppl. 1):36-58, 2013

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Almondamidopropyl Betaine	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics as long as they are formulated to be non-sensitizing, which may be based on a QRA...Almondamidopropyl Betaine...	IJT 31(Suppl. 1):77-111, 2012
Almondamidopropyl Dimethylamine	SQ	The CIR Expert Panel concluded that the 24 fatty acid amidopropyl dimethylamines ingredients listed below are safe in cosmetics when they are formulated to be non-sensitizing, which may be based on a QRA...Almondamidopropyl Dimethylamine...	IJT 38(S1):39-69,2019
Aloe Andongensis Extract	Z	The CIR Expert Panel concluded that Aloe Barbadensis Flower Extract, Aloe Barbadensis Leaf, Aloe Barbadensis Leaf Extract, Aloe Barbadensis Leaf Juice, Aloe Barbadensis Polysaccharides, and Aloe Barbadensis Leaf Water are safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment, if anthraquinone levels in the ingredients do not exceed 50 ppm. The available data are insufficient to support the safety of Aloe Andongensis Extract, Aloe Andongensis Leaf Juice, Aloe Arborescens Leaf Extract, Aloe Arborescens Leaf Juice, Aloe Ferox Leaf Extract, Aloe Ferox Leaf Juice, or Aloe Ferox Leaf Juice Extract in cosmetic products.	IJT 26(Suppl. 2):1-50, 2007
Aloe Andongensis Leaf Extract	Z	The CIR Expert Panel concluded that Aloe Barbadensis Flower Extract, Aloe Barbadensis Leaf, Aloe Barbadensis Leaf Extract, Aloe Barbadensis Leaf Juice, Aloe Barbadensis Polysaccharides, and Aloe Barbadensis Leaf Water are safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment, if anthraquinone levels in the ingredients do not exceed 50 ppm. The available data are insufficient to support the safety of Aloe Andongensis Extract, Aloe Andongensis Leaf Juice, Aloe Arborescens Leaf Extract, Aloe Arborescens Leaf Juice, Aloe Ferox Leaf Extract, Aloe Ferox Leaf Juice, or Aloe Ferox Leaf Juice Extract in cosmetic products.	IJT 26(Suppl. 2):1-50, 2007

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Aloe Andongensis Leaf Juice	Z	The CIR Expert Panel concluded that Aloe Barbadensis Flower Extract, Aloe Barbadensis Leaf, Aloe Barbadensis Leaf Extract, Aloe Barbadensis Leaf Juice, Aloe Barbadensis Polysaccharides, and Aloe Barbadensis Leaf Water are safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment, if anthraquinone levels in the ingredients do not exceed 50 ppm. The available data are insufficient to support the safety of Aloe Andongensis Extract, Aloe Andongensis Leaf Juice, Aloe Arborescens Leaf Extract, Aloe Arborescens Leaf Juice, Aloe Ferox Leaf Extract, Aloe Ferox Leaf Juice, or Aloe Ferox Leaf Juice Extract in cosmetic products.	IJT 26(Suppl. 2):1-50, 2007
Aloe Arborescens Leaf Extract	UNS	The CIR Expert Panel concluded that Aloe Barbadensis Flower Extract, Aloe Barbadensis Leaf, Aloe Barbadensis Leaf Extract, Aloe Barbadensis Leaf Juice, Aloe Barbadensis Polysaccharides, and Aloe Barbadensis Leaf Water are safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment, if anthraquinone levels in the ingredients do not exceed 50 ppm. The available data are insufficient to support the safety of Aloe Andongensis Extract, Aloe Andongensis Leaf Juice, Aloe Arborescens Leaf Extract, Aloe Arborescens Leaf Juice, Aloe Ferox Leaf Extract, Aloe Ferox Leaf Juice, or Aloe Ferox Leaf Juice Extract in cosmetic products.	IJT 26(Suppl. 2):1-50, 2007
Aloe Arborescens Leaf Juice	Z	The CIR Expert Panel concluded that Aloe Barbadensis Flower Extract, Aloe Barbadensis Leaf, Aloe Barbadensis Leaf Extract, Aloe Barbadensis Leaf Juice, Aloe Barbadensis Polysaccharides, and Aloe Barbadensis Leaf Water are safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment, if anthraquinone levels in the ingredients do not exceed 50 ppm. The available data are insufficient to support the safety of Aloe Andongensis Extract, Aloe Andongensis Leaf Juice, Aloe Arborescens Leaf Extract, Aloe Arborescens Leaf Juice, Aloe Ferox Leaf Extract, Aloe Ferox Leaf Juice, or Aloe Ferox Leaf Juice Extract in cosmetic products.	IJT 26(Suppl. 2):1-50, 2007

Ammonium Polyacryloyldimethyl Taurate	S		Final Report 4/2017 Available from CIR
Ammonium Silver Zeolite	S		Final Report Available from CIR 06/2022
Ammonium Silver Zinc Aluminum Silicate	SQ;I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Ammonium Silver Zinc Aluminum Silicate.	Final Report 12/2021 Available from CIR
Ammonium Stearate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Ammonium Stearate...	JACT 1(2):143-177, 1982;IJT 22(Suppl. 1):1-35, 2003;Final Report 04/2019 Available from CIR
Ammonium Styrene/Acrylates Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Ammonium Styrene/Acrylates Copolymer...	IJT 21(Suppl 3):1-50, 2002;Final Report 12/2018 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Ammonium Styrene/Acrylates/Ethylhexyl Acrylate/Lauryl Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Ammonium Styrene/Acrylates/Ethylhexyl Acrylate/Lauryl Acrylate Copolymer...	Final Report 12/2018 Available from CIR
Ammonium Sulfite	S		IJT 22(Suppl. 2):63-88, 2003
Ammonium Tallate	S		IJT 28(Suppl. 3):252-258, 2009
Ammonium Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Ammonium Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure.	JACT 10(1):135-192, 1991; IJT 28(Suppl. 1):68-133, 2009
Ammonium VA/Acrylates Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Ammonium VA/Acrylates Copolymer...	IJT 21(Suppl 3):1-50, 2002;Final Report 12/2018 Available from CIR
Ammonium Xylenesulfonate	SQ	Ammonium Xylenesulfonate ... safe as cosmetic ingredient in the present practice of use and concentration as described in this safety assessment, when formulated to be nonirritating	IJT 30(Suppl. 3):270-283, 2011
Amodimethicone	S		IJT 22(Suppl. 2):11-35, 2003
Amodimethicone	SQ/I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 30 dimethicone, methicone, and substituted-methicone polymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for use of these ingredients in products that may be incidentally inhaled when applied using airbrush devices: Amodimethicone	Final Report 03/2022 Available from CIR
Amodimethicone Hydroxystearate	S		IJT 22(Suppl. 2):11-35, 2003

Ingredient	Finding†	Conclusion	Citation‡
Arachideth-20	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Arachideth-20...	IJT 31(Suppl. 2):169-244, 2012
Arachidic Acid	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Arachidic Acid...	Final Report 04/2019 Available from CIR
Arachidonic Acid	UNS	The safety of this ingredient has not been documented and substantiated for cosmetic product use. The CIR Expert Panel cannot conclude whether Arachidonic Acid is safe for use in cosmetic products until such time that the appropriate safety data have been obtained and evaluated.	JACT 12(5):481-506, 1993; JACT 12(5):507-559, 1993;
Arachidyl Behenate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Arachidyl Erucate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Arachidyl Glucoside	SQ	The CIR Expert Panel concluded that the 19 alkyl glucosides listed below are safe in the present practices of use and concentrations when formulated to be nonirritating...Arachidyl Glucoside...	IJT 32(Suppl. 3):22-48, 2013
Arachidyl Glycol	S		IJT 31(Suppl. 2):147-168, 2012
Arachidyl Propionate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	JACT 9(2):143-152, 1990; IJT 27(Suppl. 1):77-142, 2008; IJT 34(Suppl.2):5-69, 2015
Arachis Hypogaea (Peanut) Flour	Z	Based on the available data, the CIR Expert Panel concludes that Peanut (Arachis Hypogaea) Oil, Hydrogenated Peanut Oil, Peanut Acid, and Peanut Glycerides are safe for use in cosmetic formulations. The available data are insufficient to support the safety of Peanut (Arachis Hypogaea) Flour for use in cosmetic products.	IJT 20(S2):65-77, 2001
Arachis Hypogaea (Peanut) Oil	S		IJT 20(S2):65-77, 2001; IJT 36(Suppl. 3):51-129, 2017

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Behenyl Isostearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Behenyl Methacrylate/Perfluorooctylethyl Methacrylate Copolymer	Z	The CIR Expert Panel concluded that the following two fluoropolymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment. Fluoropolymers PTFE Hexafluoropropylene/Tetrafluoroethylene Copolymer*.	Final Report 10/2018 available from CIR
Behenyl Methacrylate/t-Butyl Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating.. Behenyl Methacrylate/t-Butyl Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Behenyl Oliviate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Behenyl/Isostearyl Beeswax	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Bentonite	S		IJT 22(Suppl. 1):37-102, 2003
Benzaldehyde	S		IJT 25(Suppl. 1):11-27, 2006
		On the basis of the data presented in this report, the CIR Expert Panel concludes that Benzalkonium Chloride, at concentrations up to 0.1% free, active ingredient, is safe as a cosmetic ingredient as presently used.	
Benzalkonium Chloride	SQ	Note: In 2006, the CIR Expert Panel considered available new data on this ingredient and confirmed the above conclusion.	JACT 8(4):589-625, 1989; IJT 27(Suppl. 1):77-142, 2008
Benzalkonium Montmorillonite	SQ	The CIR Expert Panel concluded that the alkonium clay ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Benzalkonium Montmorillonite...	Final Report 4/2016 Available from CIR
Benzalkonium Sepiolite	SQ	The CIR Expert Panel concluded that the alkonium clay ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Benzalkonium Sepiolite...	Final Report 4/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		On the basis of the available animal and clinical data, the Expert Panel concludes that Benzethonium Chloride and Methylbenzethonium Chloride are safe at concentrations of 0.5 percent in cosmetics applied to the skin. A maximum concentration of 0.02 percent is safe for cosmetics used in the eye area. Note: FDA has prohibited the use of Methylene Chloride in cosmetic products, action which supercedes this CIR conclusion (21CFR700.19).

IJT 31(Suppl. 2):169-244, 2012
C11-15 Pareth-9	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...C11-15 Pareth-9...	IJT 31(Suppl. 2):169-244, 2012
C11-15 Sec-Pareth-12	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...C11-15 Sec-Pareth-12...	IJT 31(Suppl. 2):169-244, 2012

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
C11-21 Pareth-10	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...C11-21 Pareth-10...	IJT 31(Suppl. 2):169-244, 2012
C11-21 Pareth-3	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...C11-21 Pareth-3...	IJT 31(Suppl. 2):169-244, 2012
C12-13 Alkyl Ethylhexanoate	SQ	The Panel concluded that the alkyl ethylhexanoates, listed below, are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...C12-13 Alkyl Ethylhexanoate...	IJT 34(Suppl.3):61-73, 2015
C12-13 Pareth-1	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...C12-13 Pareth-1...	IJT 31(Suppl. 2):169-244, 2012
C12-13 Pareth-10	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...C12-13 Pareth-10...	IJT 31(Suppl. 2):169-244, 2012
C12-13 Pareth-15	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...C12-13 Pareth-15...	IJT 31(Suppl. 2):169-244, 2012

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Calcium Glycolate	SQ	Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Calcium Glycolate...	IJT 17(S1):1-241, 1998; IJT 36(Suppl 2):14-58, 2017
Calcium Hydrolyzed Collagen	S		IJT 41(S2):21S-42S, 2022
Calcium Hydroxide	SQ	The CIR Expert Panel concluded that ... Calcium Hydroxide is safe in hair straighteners and depilatories under conditions of recommended use; users should minimize skin contact. Å These ingredients are safe for all other present practices of use and concentration described in this safety assessment when formulated to be nonirritating.	IJT 40(Suppl 2):16-35;2021
Calcium Lactate	SQ	Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Calcium Lactate... Calcium Potassium Carbomer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Calcium Potassium Carbomer...	Final Report 12/2018 Available from CIR
Calcium Potassium Sodium Phosphate	SQ	The CIR Expert Panel concluded that the following 31 ingredients are safe in the present practices of use and concentration in cosmetics as described in this safety assessment, when formulated to be non-irritating...Calcium Potassium Sodium Phosphate...	IJT 40(S1):34-85;2021
Calcium Pyrophosphate	SQ	The CIR Expert Panel concluded that the following 31 ingredients are safe in the present practices of use and concentration in cosmetics as described in this safety assessment, when formulated to be non-irritating...Calcium Pyrophosphate...	IJT 40(S1):34-85;2021
Calcium Salicylate	SQ	The Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in the safety assessment, when formulated to be non-irritating and non-sensitizing, which may be based on a quantitative risk assessment (QRA)...Calcium Salicylate...	IJT 22(Suppl 3):1-108, 2003;Final Report 04/2019 Available from CIR
Calcium Silicate	S		IJT 22(Suppl. 1):37-102, 2003
Calcium Silicate	SQ;l	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Calcium Silicate.	Final Report 12/2021 Available from CIR
Calcium Sodium Borosilicate	S		IJT 32(Suppl. 3):65-72, 2013
Calcium Starch Isododecenyloctanoate	S		Final Report 9/2015 Available from CIR
Calcium Starch Octenylsuccinate	S		Final Report 9/2015 Available from CIR
Calcium Stearate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Calcium Stearate	IJT 22(Suppl. 1):1-35, 2003; JACT 1(2):143-177, 1982;Final Report 04/2019 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Calcium Stearoyl Lactylate	SQ	The Panel concluded that the following alkanoyl lactyl lactate salts are safe in cosmetics in the present practices of use and concentration described in the safety assessment, when formulated to be non-irritating and non-sensitizing, which may be based on a QRA or other accepted methodologies...Calcium Stearoyl Lactylate...	Final Report 06/2019 Available from CIR
Calcium Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Calcium Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure. Calcium Thioglycolate in depilatories is safe when formulated to be non-irritating under conditions of recommended use.	IJT 28(Suppl. 1):68-133, 2009
Calcium Titanium Borosilicate	S		IJT 32(Suppl. 3):65-72, 2013
Calcium Undecylenate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Calcium Undecylenate...	Final Report 04/2019 Available from CIR
Calcium Xylenesulfonate	SQ	Calcium Xylenesulfonate ... safe as cosmetic ingredient in the present practice of use and concentration as described in this safety assessment, when formulated to be nonirritating	IJT 30(Suppl. 3):270-283, 2011
Calcium/Sodium PVM/MA Copolymer	S		IJT 30(Suppl. 2):128-144, 2011
Calendula Officinalis	I	The CIR Expert Panel concludes that the available data are insufficient to support the safety of Calendula Officinalis Extract and Calendula Officinalis for use in cosmetic products.	IJT 20(S2):13-20, 2001
Calendula Officinalis Extract	S		IJT 20(S2):13-20, 2001; IJT 29(Suppl 4):221-243, 2010
Calendula Officinalis Extract - XXX	S		IJT 29(Suppl 4):221-243, 2010
Calendula Officinalis Flower	S		IJT 20(S2):13-20, 2001; IJT 29(Suppl 4):221-243, 2010
Calendula Officinalis Flower Extract	S		IJT 20(S2):13-20, 2001; IJT 29(Suppl 4):221-243, 2010
Calendula Officinalis Flower Oil	S		IJT 29(Suppl 4):221-243, 2010
Calendula Officinalis Seed Oil	S		IJT 29(Suppl 4):221-243, 2010
Calliblepharis Ciliata Extract	I	The Expert Panel for Cosmetic Ingredient Safety concluded that the available data are insufficient to make a determination under the intended conditions of use in cosmetic formulations.	Final Report Available from CIR 09/2021

Cetearyl Rice Branate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Cetearyl Stearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Ceteth-1	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Ceteth-1...	IJT 18(S2):1-8, 1999;IJT 31(Suppl. 2):169-244, 2012
Ceteth-10	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Ceteth-10...	IJT 18(S2):1-8, 1999;IJT 31(Suppl. 2):169-244, 2012
Ceteth-12	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Ceteth-12...	IJT 18(S2):1-8, 1999;IJT 31(Suppl. 2):169-244, 2012
Ceteth-13	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Ceteth-13...	IJT 31(Suppl. 2):169-244, 2012

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Ceteth-14	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Ceteth-14...	IJT 18(S2):1-8, 1999;IJT 31(Suppl. 2):169-244, 2012
Ceteth-15	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Ceteth-15...	IJT 18(S2):1-8, 1999;IJT 31(Suppl. 2):169-244, 2012
Ceteth-150	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Ceteth-150...	IJT 31(Suppl. 2):169-244, 2012
Ceteth-16	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Ceteth-16...	IJT 18(S2):1-8, 1999;IJT 31(Suppl. 2):169-244, 2012
Ceteth-17	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Ceteth-17...	IJT 31(Suppl. 2):169-244, 2012

This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Cetoleth-5...	IJT 31(Suppl. 2):169-244, 2012
Cetoleth-6	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Cetoleth-6...	IJT 31(Suppl. 2):169-244, 2012
Cetrimonium Bromide	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Cetrimonium Bromide...	IJT 16(S3):195-220, 1997; IJT 31(Suppl. 3):296-341, 2012
Cetrimonium Chloride	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Cetrimonium Chloride...	IJT 16(S3):195-220, 1997; IJT 31(Suppl. 3):296-341, 2012
Cetrimonium Methosulfate	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Cetrimonium Methosulfate...	IJT 31(Suppl. 3):296-341, 2012
Cetyl Acetate	S		IJT 31(Suppl. 1):112-136, 2012
Cetyl Alcohol	S		JACT 7(3):359-413, 1988; IJT 27(Suppl. 1):77-142, 2008
Cetyl Babassuate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Cetyl Behenate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Cetyl Betaine	SQ	The CIR Expert Panel concluded that the eleven alkyl betaines listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Cetyl Betaine...	Final Report 3/2014 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Cetyl Caprate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Cetyl Caprylate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Cetyl Dimethicone	S		IJT 22(Suppl. 2):11-35, 2003
Cetyl Dimethicone	SQ/I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 30 dimethicone, methicone, and substituted-methicone polymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for use of these ingredients in products that may be incidentally inhaled when applied using airbrush devices: Cetyl Dimethicone	Final Report 03/2022 Available from CIR
Cetyl Dimethicone/Bis-Vinyldimethicone Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
Cetyl Dimethyloctanoate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Cetyl Esters	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 16(S1):123-130, 1997; IJT 34(Suppl.2):5-69, 2015
Cetyl Ethylhexanoate	SQ	The Panel concluded that the alkyl ethylhexanoates, listed below, are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Cetyl Ethylhexanoate...	IJT 34(Suppl.3):61-73, 2015
Cetyl Glyceryl Ether	S		IJT 32(Suppl. 3):5-21, 2013
Cetyl Glycol	S		IJT 31(Suppl. 2):147-168, 2012
Cetyl Hexacosyl Dimethicone/Bis-Vinyldimethicone Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
Cetyl Hydroxyethylcellulose	S		Final Report 3/2009 Available from CIR
Cetyl Isononanoate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 30(Suppl. 3):228-269, 2011; IJT 34(Suppl.2):5-69, 2015

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Cetyl Lactate	SQ	Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Cetyl Lactate...	JACT 1(2):97-107, 1982; IJT 17(S1):1-241, 1998; IJT 36(Suppl 2):14-58, 2017
Cetyl Laurate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Cetyl Myristate	S		IJT 29(Suppl. 3):162-186,2010; IJT 34(Suppl.2):5-69, 2015
Cetyl Myristoleate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Cetyl Oleate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Cetyl Palmitate	S		JACT 1(2):13-35, 1982; IJT 24(Suppl. 1):1-102, 2005; IJT 34(Suppl.2):5-69, 2015
Cetyl PEG-8 Dimethicone	S		Final Report 12/2014 Available from CIR
Cetyl PEG/PPG-10/1 Dimethicone	S		Final Report 12/2014 Available from CIR
Cetyl PEG/PPG-15/15 Butyl Ether Dimethicone	S		Final Report 12/2014 Available from CIR
Cetyl PEG/PPG-7/3 Dimethicone	S		Final Report 12/2014 Available from CIR
Cetyl Phosphate	SQ	The CIR Expert Panel concluded the following 28 alkyl phosphates are safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...Cetyl Phosphate...	IJT 38(S2):12-32,2019
Cetyl Ricinoleate	SQ	The CIR Expert Panel concluded that eh alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating	IJT 26(Suppl. 3):31-77, 2007;IJT 34(Suppl.2):5-69, 2015

Chamomilla Recutita (Matricaria) Oil	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration in cosmetics, described in this safety assessment, when formulated to be non-sensitizing...Chamomilla Recutita (Matricaria) Oil...	Final Report 6/2016 Available from CIR
Chenopodium Quinoa Seed Oil	S		IJT 36(Suppl. 3):51-129, 2017
Chimyl Alcohol	S		IJT 32(Suppl. 3):5-21, 2013
Chimyl Isostearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Chimyl Stearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Chlorhexidine	SQ	On the basis of the data presented in this report, the CIR Expert Panel concludes that Chlorhexidine and its salts are safe for use in cosmetic products at concentrations up to: 0.14% calculated as Chlorhexidine free base; 0.19% as Chlorhexidine Diacetate; 0.20% as Chlorhexidine Digluconate; and 0.16% as Chlorhexidine Dihydrochloride.	JACT 12(3):201-223, 1993; IJT 18(S2):69, 1999; IJT 30(Suppl. 2):73-127, 2011
Chlorhexidine Diacetate	SQ	On the basis of the data presented in this report, the CIR Expert Panel concludes that Chlorhexidine and its salts are safe for use in cosmetic products at concentrations up to: 0.14% calculated as Chlorhexidine free base; 0.19% as Chlorhexidine Diacetate; 0.20% as Chlorhexidine Digluconate; and 0.16% as Chlorhexidine Dihydrochloride.	JACT 12(3):201-223, 1993; IJT 18(S2):69, 1999; IJT 30(Suppl. 2):73-127, 2011
Chlorhexidine Digluconate	SQ	On the basis of the data presented in this report, the CIR Expert Panel concludes that Chlorhexidine and its salts are safe for use in cosmetic products at concentrations up to: 0.14% calculated as Chlorhexidine free base; 0.19% as Chlorhexidine Diacetate; 0.20% as Chlorhexidine Digluconate; and 0.16% as Chlorhexidine Dihydrochloride.	JACT 12(3):201-223, 1993; IJT 18(S2):69, 1999; IJT 30(Suppl. 2):73-127, 2011
Chlorhexidine Dihydrochloride	SQ	On the basis of the data presented in this report, the CIR Expert Panel concludes that Chlorhexidine and its salts are safe for use in cosmetic products at concentrations up to: 0.14% calculated as Chlorhexidine free base; 0.19% as Chlorhexidine Diacetate; 0.20% as Chlorhexidine Digluconate; and 0.16% as Chlorhexidine Dihydrochloride.	JACT 12(3):201-223, 1993; IJT 18(S2):69, 1999; IJT 30(Suppl. 2):73-127, 2011
Chloroacetamide	U	Based on the data included in this report and the reconfirmation that Chloroacetamide is a potential human sensitizer at use concentrations, the Expert Panel concludes that Chloroacetamide is unsafe for use as a cosmetic ingredient.	JACT 10(1):21-32, 1991
Chlorophene	Z	The CIR Expert Panel concludes that the available data are insufficient to support safety of Dichlorophene or Chlorophene.	IJT 23(Suppl. 1):1-27, 2004
Chlorothymol	SQ	The CIR Expert panel concludes Sodium p-Chloro-m-Cresol, p-Chloro-m-Cresol, Chlorothymol, m-Cresol, o-Cresol, Isopropyl Cresols, Thymol, o-Cymen-5-ol, Cavacrol are safe at concentrations up to 0.5% in cosmetics; however, the available data are insufficient to support the safety of p-Cresol and Mixed Cresols for use in cosmetic products.	IJT 25(Suppl. 1):29-127, 2006

IJT 40(S3):5-38, 2021
Citrus Clementina Juice	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Clementina Juice...	IJT 40(S3):5-38, 2021
Citrus Clementina Leaf Cell Extract	SQ	The CIR Expert Panel concluded that the following 33 Citrus flower- and leaf-derived ingredients are safe in the present practices of use and concentration when formulated to be non-irritating and non-sensitizing...Citrus Clementina Leaf Cell Extract...	IJT 40(S3):53-76,2021

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Citrus Clementina Peel Oil	SQ	The CIR Expert Panel concluded the citrus-derived peel oils listed above are safe for use in cosmetic products, excluding rinse-off products, do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP), and when formulated to be non-sensitizing and non-irritating...Citrus Clementina Peel Oil...	IJT 38(S2):33-59,2019
Citrus Depressa Flower Water	SQ	The CIR Expert Panel concluded that the following 33 Citrus flower- and leaf-derived ingredients are safe in the present practices of use and concentration when formulated to be non-irritating and non-sensitizing...Citrus Depressa Flower Water...	IJT 40(S3):53-76,2021
Citrus Depressa Fruit Extract	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Depressa Fruit Extract...	IJT 40(S3):5-38, 2021
Citrus Depressa Fruit Water	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Depressa Fruit Water...	IJT 40(S3):5-38, 2021
Citrus Depressa Peel Extract	SQ	The CIR Expert Panel concluded the following 47 Citrus peel-derived ingredients are safe in the present practices of use and concentration in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-MOP...Citrus Depressa Peel Extract...	IJT 40(S3):77-99, 2021
Citrus Depressa Peel Powder	SQ	The CIR Expert Panel concluded the following 47 Citrus peel-derived ingredients are safe in the present practices of use and concentration in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-MOP...Citrus Depressa Peel Powder...	IJT 40(S3):77-99, 2021
Citrus Depressa Seed Oil	SQ	The CIR Expert Panel concluded that the following 18 ingredients are safe in the present practices of use and concentration when formulated to be non-irritating and non-sensitizing...Citrus Depressa Seed Oil...	IJT 40(S3):38-52,2021

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Citrus Glauca Fruit Extract	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Glauca Fruit Extract...	IJT 40(S3):5-38, 2021
Citrus Glauca Seed Oil	SQ	The CIR Expert Panel concluded that the following 18 ingredients are safe in the present practices of use and concentration when formulated to be non-irritating and non-sensitizing...Citrus Glauca Seed Oil...	IJT 40(S3):38-52,2021
Citrus Grandis (Grapefruit)	Z	The CIR Expert Panel concluded that the following 18 ingredients are safe in the present practices of use and concentration when formulated to be non-irritating and non-sensitizing...Citrus Grandis (Grapefruit)...	IJT 40(S3):38-52,2021
Citrus Grandis (Grapefruit) Extract	SQ	The CIR Expert Panel concluded that the following 18 ingredients are safe in the present practices of use and concentration when formulated to be non-irritating and non-sensitizing...Citrus Grandis (Grapefruit) Extract...	IJT 40(S3):38-52,2021
Citrus Grandis (Grapefruit) Fruit Extract	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Grandis (Grapefruit) Fruit Extract...	IJT 40(S3):5-38, 2021
Citrus Grandis (Grapefruit) Fruit Water	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Grandis (Grapefruit) Fruit Water...	IJT 40(S3):5-38, 2021
Citrus Grandis (Grapefruit) Fruit/Peel Water	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Grandis (Grapefruit) Fruit/Peel Water...	IJT 40(S3):5-38, 2021

Citrus Limon (Lemon) Peel Water	SQ	The CIR Expert Panel concluded the following 47 Citrus peel-derived ingredients are safe in the present practices of use and concentration in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-MOP...Citrus Limon (Lemon) Peel Water...	IJT 40(S3):77-99, 2021
Citrus Limon (Lemon) Peel Wax	SQ	The CIR Expert Panel concluded the following 47 Citrus peel-derived ingredients are safe in the present practices of use and concentration in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-MOP...Citrus Limon (Lemon) Peel Wax...	IJT 40(S3):77-99, 2021
Citrus Limon (Lemon) Seed Oil	S		IJT 36(Suppl. 3):51-129, 2017
Citrus Madurensis Fruit Extract	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Madurensis Fruit Extract...	IJT 40(S3):5-38, 2021

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Citrus Madurensis Fruit Juice	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Madurensis Fruit Juice...	IJT 40(S3):5-38, 2021
Citrus Medica Vulgaris Fruit Extract	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Medica Vulgaris Fruit Extract...	IJT 40(S3):5-38, 2021
Citrus Medica Vulgaris Peel Oil	SQ	The CIR Expert Panel concluded the citrus-derived peel oils listed above are safe for use in cosmetic products, excluding rinse-off products, do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP), and when formulated to be non-sensitizing and non-irritating...Citrus Medica Vulgaris Peel Oil...	IJT 38(S2):33-59,2019
Citrus Natsudaikai Flower Oil	SQ	The CIR Expert Panel concluded that the following 33 Citrus flower- and leaf-derived ingredients are safe in the present practices of use and concentration when formulated to be non-irritating and non-sensitizing...Citrus Natsudaikai Flower Oil...	IJT 40(S3):53-76,2021
Citrus Natsudaikai Flower Water	SQ	The CIR Expert Panel concluded that the following 33 Citrus flower- and leaf-derived ingredients are safe in the present practices of use and concentration when formulated to be non-irritating and non-sensitizing...Citrus Natsudaikai Flower Water...	IJT 40(S3):53-76,2021
Citrus Natsudaikai Peel Extract	SQ	The CIR Expert Panel concluded the following 47 Citrus peel-derived ingredients are safe in the present practices of use and concentration in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-MOP...Citrus Natsudaikai Peel Extract...	IJT 40(S3):77-99, 2021
Citrus Nobilis (Mandarin Orange)	SQ	The CIR Expert Panel concluded that the following 18 ingredients are safe in the present practices of use and concentration when formulated to be non-irritating and non-sensitizing...Citrus Nobilis (Mandarin Orange)...	IJT 40(S3):38-52,2021

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Citrus Nobilis (Mandarin Orange) Fruit Extract	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Nobilis (Mandarin Orange) Fruit Extract...	IJT 40(S3):5-38, 2021
Citrus Nobilis (Mandarin Orange) Fruit Juice	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Nobilis (Mandarin Orange) Fruit Juice... IJT 40(S3):77-99, 2021
Citrus Unshiu Peel Powder	SQ	The CIR Expert Panel concluded the following 47 Citrus peel-derived ingredients are safe in the present practices of use and concentration in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-MOP...Citrus Unshiu Peel Powder...	IJT 40(S3):77-99, 2021
Citrus Unshiu Peel Water	SQ	The CIR Expert Panel concluded the following 47 Citrus peel-derived ingredients are safe in the present practices of use and concentration in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-MOP...Citrus Unshiu Peel Water...	IJT 40(S3):77-99, 2021
Citrus Unshiu/Citrus Reticulata/Citrus Iyo Fruit Water	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Unshiu/Citrus Reticulata/Citrus Iyo Fruit Water...	IJT 40(S3):5-38, 2021

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Citrus Unshiu/Sinensis/Reticulata Fruit Extract	SQ	The CIR Expert Panel concluded the following Citrus fruit-derived ingredients are safe for use in both rinse-off and leave-on cosmetic products when formulated to be non-sensitizing and non-irritating, provided that leave-on products do not contain more than 0.0015% (15 ppm) 5-methoxypsoralen (5-MOP)...Citrus Unshiu/Sinensis/Reticulata Fruit Extract...	IJT 40(S3):5-38, 2021
Cladosiphon Novae-Caledoniae Extract	I	The Panel also concluded that the available data are insufficient to support a conclusion of safety for the remaining 14 ingredients are under intended conditions of use in cosmetic formulations	Final Report 09/2019 Available from CIR
Cladosiphon Okamuraanus Extract	S		Final Report 09/2019 Available from CIR
Coal Tar	UNS	The available data are insufficient to support the safety of Coal Tar for use in cosmetic products as described in this safety assessment.	IJT 27(Suppl. 2):1-24, 2008
Cocamide DEA	SQ	The CIR Expert Panel concluded that the following 33 diethanolamides are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating and when the levels of free diethanolamine in the diethanolamides do not exceed the present practices of use and concentration of diethanolamine itself. The Expert Panel cautions that ingredients should not be used in cosmetic products in which N-nitroso compounds can be formed...Cocamide DEA...	JACT 5(5):415-454, 1986; JACT 15(6):527-542, 1996; IJT 32(Suppl. 1):36-58, 2013
Cocamide MEA	SQ	The CIR Expert Panel concluded that the ethanolamides listed subsequently are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating. The Expert Panel cautioned that these ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Cocamide MEA	IJT 18(S2):9-16, 1999; IJT 34(Suppl.1):18-34, 2015
Cocamide Methyl MEA	SQ	The CIR Expert Panel concluded that the ethanolamides listed subsequently are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating. The Expert Panel cautioned that these ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Cocamide Methyl MEA...	IJT 34(Suppl.1):18-34, 2015

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Cocamide MIPA	SQ	The CIR Expert Panel concluded that the 14 alkyl amide MIPA ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Cocamide MIPA...	Final Report 12/2019 Available from CIR
Cocamidopropyl Betainamide MEA Chloride	SQ	The CIR Expert Panel concluded that the ethanolamides listed subsequently are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating. The Expert Panel cautioned that these ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Cocamidopropyl Betainamide MEA Chloride...	IJT 34(Suppl.1):18-34, 2015
Cocamidopropyl Betaine	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics as long as they are formulated to be non-sensitizing, which may be based on a QRA...Cocamidopropyl Betaine...	JACT 10(1):33-52, 1991; IJT 31(Suppl. 1):77-111, 2012
Cocamidopropyl Dimethylamine	SQ	The CIR Expert Panel concluded that the 24 fatty acid amidopropyl dimethylamines ingredients listed below are safe in cosmetics when they are formulated to be non-sensitizing, which may be based on a QRA...Cocamidopropyl Dimethylamine...	IJT 38(S1):39-69,2019
Cocamidopropyl Hydroxysultaine	S		Final Report 06/2018 Available from CIR
Cocamidopropylamine Oxide	S; I	Based on the data contained in this report, the CIR Expert Panel concludes that Cocamidopropylamine Oxide is safe as a cosmetic ingredient in rinse-off cosmetic products in the practices of use and concentrations described in this safety assessment, but the data are insufficient to make a determination of safety for use in leave-on cosmetic products.	IJT 19(S2):1-5, 2000; IJT 27(Suppl. 1):55-62, 2008
Coceth-10	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Coceth-10...	IJT 31(Suppl. 2):169-244, 2012

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Disodium Capryloyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Disodium Capryloyl Glutamate	IJT 36(Suppl. 1):17-56, 2017
Disodium Coceth-3 Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Disodium Coceth-3 Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Disodium Cocoamphodiacetate	S		JACT 9(2):121-142, 1990; IJT 27(Suppl. 1):77-142, 2008
Disodium Cocoamphodipropionate	S		JACT 9(2):121-142, 1990; IJT 27(Suppl. 1):77-142, 2008
Disodium Cocoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Disodium Cocoyl Glutamate	IJT 36(Suppl. 1):17-56, 2017
Disodium Cupric Citrate	S		IJT 33(Suppl.2):16-46, 2014
Disodium Deceth-5 Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Disodium Deceth-5 Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Disodium Deceth-6 Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Disodium Deceth-6 Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Disodium EDTA	S		IJT 21(Suppl.2):95-142, 2002
Disodium Etidronate	S		Final Report 4/2017 Available from CIR
Disodium Fumarate	S		Final Report 3/2009 Available from CIR
Disodium Glucose Phosphate	I	The Panel also concluded that the available data are insufficient to make a determination that the polyol phosphates listed below are safe under the intended conditions of use in cosmetic formulations. Disodium Glucose Phosphate...	Final Report 10/2018 Available from CIR
Disodium Glycyrrhizate	S		IJT 26(Suppl. 2):79-112, 2007
Disodium Hydrogenated Tallow Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Disodium Hydrogenated Tallow Glutamate	IJT 36(Suppl. 1):17-56, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Disodium Laneth-5 Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Disodium Laneth-5 Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Disodium Laureth Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Disodium Laureth Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Disodium Laureth-12 Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Disodium Laureth-12 Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Disodium Laureth-6 Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Disodium Laureth-6 Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Disodium Laureth-9 Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Disodium Laureth-9 Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Disodium Lauriminodipropionate	S		IJT 32(Suppl. 3):49-55, 2013
Disodium Lauroyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Disodium Lauroyl Glutamate	IJT 36(Suppl. 1):17-56, 2017
Disodium Lauryl Phosphate	SQ	The CIR Expert Panel concluded the following 28 alkyl phosphates are safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...Disodium Lauryl Phosphate...	IJT 38(S2):12-32,2019
Disodium Malyl Tyrosinate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Disodium Malyl Tyrosinate	IJT 36(Suppl. 1):17-56, 2017
Disodium N-Lauroyl Aspartate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Disodium N-Lauroyl Aspartate	IJT 36(Suppl. 1):17-56, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Disodium Oleth-3 Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Disodium Oleth-3 Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Disodium Oleyl Phosphate	SQ	The CIR Expert Panel concluded the following 28 alkyl phosphates are safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...Disodium Oleyl Phosphate...	IJT 38(S2):12-32,2019
Disodium Phosphate	SQ	The CIR Expert Panel concluded that the following 31 ingredients are safe in the present practices of use and concentration in cosmetics as described in this safety assessment, when formulated to be non-irritating...Disodium Phosphate...	IJT 40(S1):34-85;2021
Disodium Pyrophosphate	SQ	The CIR Expert Panel concluded that the following 31 ingredients are safe in the present practices of use and concentration in cosmetics as described in this safety assessment, when formulated to be non-irritating...Disodium Pyrophosphate...	IJT 40(S1):34-85;2021
Disodium Sebacate	S		IJT 31(Suppl 1):5-76, 2012
Disodium Stearoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Disodium Stearoyl Glutamate	IJT 36(Suppl. 1):17-56, 2017
Disodium Succinate	S		IJT 31(Suppl 1):5-76, 2012
Disodium Succinoyl Glycyrhethinate	S		IJT 26(Suppl. 2):79-112, 2007
Disodium Ubiquinone	S		Final Report 03/2022 Available from CIR
Disodium Undecylenoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Disodium Undecylenoyl Glutamate	IJT 36(Suppl. 1):17-56, 2017
Disperse Black 9	S		JACT 5(3):205-223, 1986; IJT 27(Suppl. 1):77-142, 2008
Disperse Blue 1	SQ	Based upon the animal and use data presented in this report, the CIR Expert Panel concludes that Disperse Blue 1 is safe for use in hair dyes at concentrations up to 1%.	JACT 14(6):433-451, 1995; IJT 30(Suppl. 2):73-127, 2011
Disperse Blue 7	Z	The CIR Expert Panel concluded that the available data are insufficient to support the safety of Disperse Blue 7 as a hair dye ingredient in cosmetic formulations.	IJT 26(Suppl. 2):65-77, 2007
Disperse Violet 1	S		JACT 10(1):103-111, 1991; IJT 30(Suppl. 2):73-127, 2011

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Disperse Yellow 3	Z	The CIR Panel concludes that the available data are insufficient to support the safety of Disperse Yellow 3 for use in cosmetic products.	JACT 15(4):311-319, 1996
Distarch Phosphate	S		Final Report Available from CIR 09/2022
Distarch Phosphate Acetate	S		Final Report Available from CIR 09/2022
Disteardimonium Hectorite	S		IJT 32(Suppl. 4):33-40, 2013
Distearyl Citrate	S		IJT 33(Suppl.2):16-46, 2014
		The CIR Expert Panel concludes that Dilauryl Thiodipropionate, Thiodipropionic Acid, Dicetyl Thiodipropionate, Dimyristyl Thiodipropionate, Distearyl Thiodipropionate, and Ditridecyl Thiodipropionate are safe as cosmetic ingredients in the practices of use and concentration given in this safety assessment when formulated to be non-irritating.	
Distearyl Thiodipropionate	SQ		IJT 29(Suppl. 3):137-150,2010
Ditridecyl Adipate	S		IJT 31(Suppl 1):5-76, 2012
Ditridecyl Dimer Dilinoleate	S		IJT 22(Suppl.2):45-61, 2003
		The CIR Expert Panel concluded that the following 8 dialkyl sulfosuccinate salts are safe in the present practices of use and concentration in cosmetics in this safety assessment when formulated to be non-irritating...Ditridecyl Sodium Sulfosuccinate...	
Ditridecyl Sodium Sulfosuccinate	SQ		IJT 35(Suppl. 3):34-46, 2016
		The CIR Expert Panel concludes that Dilauryl Thiodipropionate, Thiodipropionic Acid, Dicetyl Thiodipropionate, Dimyristyl Thiodipropionate, Distearyl Thiodipropionate, and Ditridecyl Thiodipropionate are safe as cosmetic ingredients in the practices of use and concentration given in this safety assessment when formulated to be non-irritating.	
Ditridecyl Thiodipropionate	SQ		IJT 29(Suppl. 3):137-150,2010
Divinyldimethicone/Dimethicone Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
DMDM Hydantoin	S		JACT 7(3):245-277, 1988; IJT 27(Suppl. 1):77-142, 2008
Docosahexenoic/Docosapentenoic/Oleic/Palmitic Triglyceride	S		Final Report 12/2017 Available from CIR
Dodecanedioic Acid	S		IJT 31(Suppl 1):5-76, 2012
		The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Dodecylhexadecyltrimonium Chloride...	
Dodecylhexadecyltrimonium Chloride	SQ		IJT 31(Suppl. 3):296-341, 2012
Drometizole	S		JACT 5(5):455-470, 1986; IJT 27(Suppl. 1):63-75, 2008
		The Panel also concluded that the available data are insufficient to support a conclusion of safety for the remaining 14 ingredients are under intended conditions of use in cosmetic formulations	
Durvillaea Antarctica Extract	I		Final Report 9/2019 Available from CIR

Erucic Acid	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Erucic Acid...	Final Report 04/2019 Available from CIR
Erucyl Arachidate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Erucyl Erucate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Erucyl Oleate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Erythorbic Acid	S		IJT 18(S3):1-26, 1999
Ethanolamine	SQ	The CIR Expert Panel concluded that ethanolamine and the 12 related ethanolamine salts, listed below, are safe in the present practices of use and concentration described in this safety assessment (rinse-off products only) when formulated to be non-irritating. The Panel cautioned that ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Ethanolamine...	JACT 2(7):183-235, 1983; IJT 34(Suppl.2):84-98, 2015
Ethanolamine HCl	SQ	The CIR Expert Panel concluded that ethanolamine and the 12 related ethanolamine salts, listed below, are safe in the present practices of use and concentration described in this safety assessment (rinse-off products only) when formulated to be non-irritating. The Panel cautioned that ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Ethanolamine HCl...	IJT 34(Suppl.2):84-98, 2015

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Ethanolamine Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Ethanolamine Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure.	IJT 28(Suppl. 1):68-133, 2009
Ethoxy Ethyl Methacrylate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Ethoxy Ethyl Methacrylate is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	IJT 24(Suppl 5):53-100, 2005
Ethoxydiglycol	S		JACT 4(5):223-248, 1985; IJT 25(Suppl. 2) :1-89,2006
Ethoxyethanol	U	On the basis of the animal and clinical data included in this report, the CIR Expert Panel concludes that Ethoxyethanol and Ethoxyethanol Acetate are unsafe for use in cosmetic products.	IJT 18(S2):53-67, 1999; IJT 21(Suppl 1):9-62, 2002
Ethoxyethanol Acetate	U	On the basis of the animal and clinical data included in this report, the CIR Expert Panel concludes that Ethoxyethanol and Ethoxyethanol Acetate are unsafe for use in cosmetic products.	IJT 18(S2):53-67, 1999; IJT 21(Suppl 1):9-62, 2002
Ethoxyethyl Methacrylate	SQ	Based on available data, the CIR Expert Panel concluded that ... Ethoxyethyl Methacrylate is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	IJT 24(Suppl 5):53-100, 2005
Ethyl Acetate	S		JACT 8(4):681-705, 1989; IJT 27(Suppl. 1):77-142, 2008
Ethyl Benzoate	S		IJT 31(Suppl.3):342-372, 2012
Ethyl Citrates	S		IJT 33(Suppl.2):16-46, 2014
Ethyl Ester of PVM/MA Copolymer	S		IJT 30(Suppl. 2):128-144, 2011
Ethyl Glucoside	SQ	The CIR Expert Panel concluded that the 19 alkyl glucosides listed below are safe in the present practices of use and concentrations when formulated to be nonirritating...Ethyl Glucoside...	IJT 32(Suppl. 3):22-48, 2013

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Ethyl Glycolate	SQ	Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Ethyl Glycolate...	IJT 17(S1):1-241, 1998; IJT 36(Suppl 2):14-58, 2017
Ethyl Hexanediol	S		JACT 13(6):418-436, 1994; IJT 30(Suppl. 2):73-127, 2011
Ethyl Lactate	SQ	Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Ethyl Lactate...	IJT 17(S1):1-241, 1998; IJT 36(Suppl 2):14-58, 2017
Ethyl Methacrylate	SQ	Based on the available data on the formulation of nail products containing Ethyl Methacrylate, the CIR Expert Panel concludes that this ingredient is safe as used when application is accompanied by directions to avoid skin contact because of the sensitizing potential of Ethyl Methacrylate.	JACT 14(6):452-467, 1995; IJT 21(Suppl 1):63-79, 2002
Ethyl Myristate	S		IJT 29(Suppl. 3):162-186,2010
Ethyl Pelargonate	S		Final Report 3/2015 Available from CIR
Ethyl Polysilsesquioxane	S		Final Report 12/2017 Available from CIR
Ethyl Ricinoleate	S		IJT 26(Suppl. 3):31-77, 2007

Eucalyptus Globulus Leaf Water	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-sensitizing:...Eucalyptus Globulus Leaf Water...	Final Report 09/2018 available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-sensitizing:...	
Eucalyptus Globulus Leaf/Twig Oil	SQ	Eucalyptus Globulus Leaf/Twig Oil...	Final Report 09/2018 available from CIR
Euterpe Edulis Fruit Extract	S		Final Report 06/2020 Available from CIR
Euterpe Edulis Juice Extract	S		Final Report 06/2020 Available from CIR
Euterpe Oleracea Fruit Extract	S		Final Report 06/2020 Available from CIR
Euterpe Oleracea Fruit Oil	S		IJT 36(Suppl. 3):51-129, 2017
Euterpe Oleracea Juice	S		Final Report 06/2020 Available from CIR
Euterpe Oleracea Palm Heart Extract	S		Final Report 06/2020 Available from CIR
Euterpe Oleracea Pulp Powder	S		Final Report 06/2020 Available from CIR
Euterpe Oleracea Seed Powder	S		Final Report 06/2020 Available from CIR
Euterpe Oleracea Sterols	S		Final Report 12/2013 Available from CIR
Ferric Citrate	S		IJT 33(Suppl.2):16-46, 2014
Ferrous Fumarate	S		Final Report 3/2009 Available from CIR
Fibroin	S		IJT 39(S3):127-144,2020
Fibronectin	S		IJT 41(S2):21S-42S, 2022
		The CIR Expert Panel concluded that formaldehyde and methylene glycol are safe for use in cosmetics when formulated to ensure use at the minimal effective concentration, but in no case should the formalin concentration exceed 0.2% (w/w), which would be 0.074% (w/w) calculated as formaldehyde or 0.118% (w/w) calculated as methylene glycol. Additionally, formaldehyde and methylene glycol are safe in the present practices of use and concentration in nail hardening products. However, formaldehyde and methylene glycol are unsafe in the present practices of use and concentration in hair smoothing products (a.k.a. hair straightening products).	
		Formalin is an aqueous solution wherein formaldehyde (gas) has been added to water to a saturation point, which is typically 37% formaldehyde (w/w). Because of the equilibrium between formaldehyde and methylene glycol in aqueous solution, formalin is composed of both formaldehyde and methylene glycol.	JACT 3(3):157-184, 1984; IJT 25(Suppl. 2) :1-89,2006; IJT 32(Suppl. 4):5-32, 2013
Formaldehyde	S,SQ;U		
		The CIR Expert Panel concluded that formic acid and sodium formate are safe in the present practices of use and concentration in cosmetics, as described in this safety assessment, when formulated to be non-irritating.	
Formic Acid	SQ		IJT 16(Suppl.3):221-234, 1997; IJT 35(Suppl. 2):41-54, 2016
Fragaria Ananassa (Strawberry) Seed Oil	S		IJT 36(Suppl. 3):51-129, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Glyceryl Dipalmitate	SQ	The Expert Panel concluded that Â ... Glyceryl Dipalmitate is safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment provided that the content of 1,2-diesters is not high enough to induce epidermal hyperplasia.	Final Report 6/2002 Available from CIR;IJT 26(Suppl. 3):1-30, 2007
Glyceryl Dipalmitoleate	SQ	The Expert Panel concluded that Â ... Glyceryl Dipalmitoleate is safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment provided that the content of 1,2-diesters is not high enough to induce epidermal hyperplasia.	Final Report 6/2002 Available from CIR;IJT 26(Suppl. 3):1-30, 2007
Glyceryl Diricinoleate	SQ	The Expert Panel concluded that Â ... Glyceryl Diricinoleate is safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment provided that the content of 1,2-diesters is not high enough to induce epidermal hyperplasia.	IJT 26(Suppl. 3):1-30, 2007
Glyceryl Distearate	SQ	The Expert Panel concluded that Â ... Glyceryl Dioleate is safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment provided that the content of 1,2-diesters is not high enough to induce epidermal hyperplasia.	Final Report 6/2002 Available from CIR;IJT 26(Suppl. 3):1-30, 2007
Glyceryl Erucate	S		;IJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020
Glyceryl Ethylhexanoate	S		IJT 39(S3):93-126,2020
Glyceryl Ethylhexanoate/Stearate/Adipate	S		IJT 39(S3):93-126,2020
Glyceryl Glycerylricinate	S		IJT 26(Suppl. 2):79-112, 2007
Glyceryl Heptanoate	S		IJT 39(S3):93-126,2020
Glyceryl Hydrogenated Rapeseedate	S		IJT 39(S3):93-126,2020
Glyceryl Hydrogenated Rosinate	S		IJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020
Glyceryl Hydrogenated Soyate	S		IJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020
Glyceryl Hydroxystearate	S		FIJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020
Glyceryl Isopalmitate	S		IJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020
Glyceryl Isostearate	S		IJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020
Glyceryl Isostearate/Myristate	S		Final Report 5/2000 Available from CIR;IJT 23 (Suppl. 2):55-94,2004;IJT 29(Suppl. 3):162-186,2010
Glyceryl Isostearates	S		Final Report 5/2000 Available from CIR;IJT 23 (Suppl. 2:55-94,)2004
Glyceryl Isotridecanoate/Stearate/Adipate	S		IJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020
Glyceryl Lanolate	S		IJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Glyceryl Stearate Succinate	SQ	The Expert Panel concluded that ... Glyceryl Stearate Succinate is safe as cosmetic ingredients in the practices of use and concentrations as described in this safety assessment provided that the content of 1,2-diesters is not high enough to induce epidermal hyperplasia.	Final Report 6/2002 Available from CIR;IJT 26(Suppl. 3):1-30, 2007
Glyceryl Stearate/Acetate	S		Final Report 5/2000 Available from CIR;IJT 23 (Suppl. 2:55-94,)2004
Glyceryl Stearate/Malate	S		IJT 39(S3):93-126,2020
Glyceryl Stearate/Maleate	S		5/19/2000 FR; IJT 23 (Suppl. 2:55-94,)2004
Glyceryl Tallowate	S		IJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020
Glyceryl Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Glyceryl Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure.	JACT 10(1):135-192, 1991; IJT 28(Suppl. 1):68-133, 2009
Glyceryl Thiopropionate	S		Final Report 5/2000 Available from CIR;IJT 23 (Suppl. 2:55-94,)2004
Glyceryl Tri-Hydrogenated Rosinate	S		Final Report 12/2017 Available from CIR
Glyceryl Triacetyl Hydroxystearate	S		IJT 20(suppl 4):61-94, 2001;Final Report 12/2017 Available from CIR
Glyceryl Triacetyl Ricinoleate	S		IJT 20(suppl 4):61-94, 2001;Final Report 12/2017 Available from CIR
Glyceryl Tripalmitate/Palm Kernelate/Olivate/Macadamate/Rapeseedate	S		Final Report 12/2017 Available from CIR
Glyceryl Undecylenate	S		IJT 23 (Suppl. 2:55-94,)2004;IJT 39(S3):93-126,2020
Glyceryl/Polyglyceryl-6 Isostearate/Behenate Esters	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Glyceryl/Polyglyceryl-6 Isostearate/Behenate Esters...	Final Report 9/2016 Available from CIR
Glyceryl/Sorbitol Oleate/Hydroxystearate	S		Final Report 5/2000 Available from CIR;IJT 23 (Suppl. 2:55-94,)2004
Glycine	S		IJT 32(Suppl. 4):41-64, 2013
Glycine Max (Soybean) Callus Culture	I	The Panel also concluded that the available data are insufficient to make a determination of safety under the intended conditions of use in cosmetic formulations for the following 4 ingredients:... Glycine Max (Soybean) Callus Culture	Final Report 06/2020 Available from CIR

Quick Reference Table

Glycolic Acid	SQ	Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Glycolic Acid... Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Hazel (Corylus Rostrata) Extract	Z	The CIR Panel concludes that the available data are insufficient to support the safety of Hazel (Corylus Avellana) Nut Oil, Hazel (Corylus Americana) Nut Oil, Hazel (Corylus Avellana) Nut Extract, Hazel (Corylus Americana) Nut Extract, Hazel (Corylus Rostrata) Nut Extract, Hazel (Corylus Avellana) Extract, Hazel (Corylus Americana) Extract, and Hazel (Corylus Rostrata) Extract for use in cosmetic products.	IJT 20(S1):15-20, 2001
Hazel (Corylus Rostrata) Nut Extract	Z	The CIR Panel concludes that the available data are insufficient to support the safety of Hazel (Corylus Avellana) Nut Oil, Hazel (Corylus Americana) Nut Oil, Hazel (Corylus Avellana) Nut Extract, Hazel (Corylus Americana) Nut Extract, Hazel (Corylus Rostrata) Nut Extract, Hazel (Corylus Avellana) Extract, Hazel (Corylus Americana) Extract, and Hazel (Corylus Rostrata) Extract for use in cosmetic products.	IJT 20(S1):15-20, 2001
Hazel Seed Oil PEG-8 Esters	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...Hazel Seed Oil PEG-8 Esters...	IJT 33(Suppl 4):13-39, 2014
Hazelnut Seed Oil Polyglyceryl-6 Esters	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Hazelnut Seed Oil Polyglyceryl-6 Esters...	Final Report 9/2016 Available from CIR
HC Blue No. 1	U	On the basis of the available data included in this report, the Expert Panel concludes that HC Blue No. 1 is unsafe for use in cosmetic formulations.	JACT 13(5):344-360, 1994
HC Blue No. 2	S		JACT 13(5):361-373, 1994; IJT 30(Suppl. 2):73-127, 2011
HC Orange No. 1	SQ	On the basis of the animal and clinical data included in this report, the CIR Expert Panel concludes that HC Orange No. 1 is safe for use in hair dye formulations at concentrations up to 3.0%.	IJT 17(S4):21-37, 1998; IJT 36(Suppl 2):14-58, 2017
HC Red No. 1	SQ	On the basis of the animal and clinical data included in this report, the CIR Expert Panel concludes that HC Red No. 1 is safe as used in hair dye formulations at concentrations of &#8804; 0.5%. The CIR Expert Panel re-affirmed the above conclusion June 2011.	JACT 15(4):320-336, 1996; IJT 36(Suppl 2):14-58, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		On the basis of the available data presented in this report, the CIR Expert Panel concludes that HC Red No. 3 is safe as a "coal tar" hair dye ingredient at the current concentrations of use, with the condition that it should not be used in products containing N-nitrosating agents.	
HC Red No. 3	SQ		JACT 11(4):509-519, 1992; IJT 30(Suppl. 2):73-127, 2011
HC Red No. 7	S		IJT 27(Suppl. 1):45-54, 2008
		The CIR Expert Panel concludes that HC Yellow No. 2 is safe for use in hair dyes at concentrations up to 3%. The limitation on the concentration is based upon the available clinical sensitization data.	
HC Yellow No. 2	SQ		JACT 13(3):157-166, 1994; IJT 30(Suppl. 2):73-127, 2011
HC Yellow No. 4	S		IJT 17(S4):39-70, 1998; IJT 36(Suppl 2):14-58, 2017
HC Yellow No. 5	S		IJT 26(Suppl. 2):113-124, 2007
HDI/Di-C12-14 Alkyl Tartrate/Hydrogenated Dilinoleyl Alcohol Copolymer	S		Final Report 06/2016 available from CIR
HDI/PEI-45/SMDI Crosspolymer	S		Final Report 06/2016 available from CIR
HDI/PPG/Polycaprolactone Crosspolymer	S		Final Report 06/2016 available from CIR
HDI/Trimethylol Hexyllactone Crosspolymer	S		Final Report 06/2016 available from CIR
HEA/Sodium Acryloyldimethyltaurate/Steareth-20 Methacrylate Copolymer	S		Final Report 4/2017 Available from CIR
Hectorite	S		IJT 22(Suppl. 1):37-102, 2003
HEDTA	S		IJT 21(Suppl.2):95-142, 2002
Helianthus Annuus (Sunflower) Extract	I;UNS		Final Report 9/2016 Available from CIR

Helianthus Annuus (Sunflower) Seed Extract	S		Final Report 9/2016 Available from CIR
Helianthus Annuus (Sunflower) Seed Flour	S		Final Report 9/2016 Available from CIR
Helianthus Annuus (Sunflower) Seed Oil	S		IJT 36(Suppl. 3):51-129, 2017
Helianthus Annuus (Sunflower) Seed Oil Unsaponifiables	S		IJT 36(Suppl. 3):51-129, 2017
Helianthus Annuus (Sunflower) Seed Wax	S		Final Report 9/2016 Available from CIR
Helianthus Annuus (Sunflower) Seedcake	S		Final Report 9/2016 Available from CIR
Helianthus Annuus (Sunflower) Sprout Extract	I;Z		Final Report 9/2016 Available from CIR
		Based on available data, the CIR Expert Panel concluded that...HEMA is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	
HEMA	SQ		IJT 24(Suppl 5):53-100, 2005

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Heptyl Undecylenate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Heptylundecyl Hydroxystearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Hexacosyl Glycol	S		IJT 31(Suppl. 2):147-168, 2012
Hexadecyl D-glucoside	SQ	The CIR Expert Panel concluded that the 19 alkyl glucosides listed below are safe in the present practices of use and concentrations when formulated to be nonirritating...Hexadecyl D-glucoside...	IJT 32(Suppl. 3):22-48, 2013
Hexafluoropropylene/Tetrafluoroethylene Copolymer	S		Final Report 10/2018 available from CIR
Hexamidine	SQ	Hexamidine and Hexamidine Diisethionate are safe for the use in cosmetic products in the practices and concentrations of use as described in this safety assessment if used at concentrations less than or equal to 0.10%.	IJT 26(Suppl. 3):79-88, 2007
Hexamidine Diisethionate	SQ	Hexamidine and Hexamidine Diisethionate are safe for the use in cosmetic products in the practices and concentrations of use as described in this safety assessment if used at concentrations less than or equal to 0.10%.	IJT 26(Suppl. 3):79-88, 2007
Hexanediol	S		Final Report 06/2018 available from CIR
Hexanediol Distearate	S		Final Report 9/2017 Available from CIR
Hexapeptide-12	S		Final Report 06/10/2014 Available from CIR
Hexyl Dimethicone	SQ/I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 30 dimethicone, methicone, and substituted-methicone polymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for use of these ingredients in products that may be incidentally inhaled when applied using airbrush devices: Hexyl Dimethicone	Final Report 03/2022 Available from CIR
Hexyl Isostearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Hexyl Laurate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Hexyl Methacrylate	SQ	Based on available data, the CIR Expert Panel concluded that ...Hexyl Methacrylate is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	IJT 24(Suppl 5):53-100, 2005
Hexyl Methicone	S		IJT 22(Suppl. 2):11-35, 2003
Hexyl Methicone	SQ/I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 30 dimethicone, methicone, and substituted-methicone polymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for use of these ingredients in products that may be incidentally inhaled when applied using airbrush devices: Hexyl Methicone	Final Report 03/2022 Available from CIR
Hexyl Salicylate	SQ	The Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in the safety assessment, when formulated to be non-irritating and non-sensitizing, which may be based on a quantitative risk assessment (QRA)...Hexyl Salicylate...	Final Report 04/2019 Available from CIR
Hexyldeceth-2	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Hexyldeceth-2...	IJT 31(Suppl. 2):169-244, 2012
Hexyldeceth-20	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Hexyldeceth-20... Hydrolyzed Vegetable Protein	S		IJT 41(S2):5S-20S, 2022
Hydrolyzed Wheat Gluten	SQ	The CIR Expert Panel concluded that hydrolyzed wheat gluten and hydrolyzed wheat protein are safe for use in cosmetics when formulated to restrict peptides to a weight-average MW of 3500 Da or less.	IJT 37(Suppl. 1):55-66, 2018
Hydrolyzed Wheat Protein	SQ	The CIR Expert Panel concluded that hydrolyzed wheat gluten and hydrolyzed wheat protein are safe for use in cosmetics when formulated to restrict peptides to a weight-average MW of 3500 Da or less.	IJT 37(Suppl. 1):55-66, 2018
Hydrolyzed Wheat Protein/PVP Crosspolymer	S		Final Report 12/2018 Available from CIR
Hydrolyzed Wheat Starch	S		Final Report 9/2015 Available from CIR
Hydrolyzed Whey Protein	S		IJT 41(S2):43S-56S, 2022
Hydrolyzed Yogurt Protein	S		IJT 41(S2):43S-56S, 2022
Hydrolyzed Zein	S		IJT 41(S2):5S-20S, 2022
Hydroquinone	U	The CIR Expert Panel concluded that hydroquinone is safe at concentrations of less than or equal to 1% for cosmetic formulations designed for discontinuous, brief use followed by rinsing from the skin and hair. Hydroquinone is safe for use in nail adhesives and in artificial nail coatings, as a polymerization inhibitor, that are cured by LED light. Hydroquinone is unsafe for use in other leave-on cosmetic products.	JACT 5(3):123-165, 1986;JACT 13(3):167-230, 1994;IJT 29(Suppl. 4):274-287, 2010;Final Report 12/2014 Available from CIR
Hydroxy Tetramethylpiperidine Oxide	S		Final Report Available from CIR 03/2021

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Isolaureth-10	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Isolaureth-10...	IJT 31(Suppl. 2):169-244, 2012
Isolaureth-3	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Isolaureth-3...	IJT 31(Suppl. 2):169-244, 2012
Isolaureth-6	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Isolaureth-6...	IJT 31(Suppl. 2):169-244, 2012
Isolauryl Behenate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isoleucine	S		IJT 32(Suppl. 4):41-64, 2013
Isomalt	S		IJT 38(S1):5-38,2019
Isomerized Jojoba Oil	S		Final Report 9/2008 Available from CIR
Isomerized Linoleic Acid	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Isomerized Linoleic Acid...	Final Report 04/2019 Available from CIR
Isomerized Safflower Acid	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Isomerized Safflower Acid...	Final Report 04/2019 Available from CIR
Isomerized Safflower Glycerides	S		Final Report 12/2017 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Isomyreth-3	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Isomyreth-3...	IJT 31(Suppl. 2):169-244, 2012
Isomyreth-9	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Isomyreth-9...	IJT 31(Suppl. 2):169-244, 2012
Isononyl Isononanoate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 30(Suppl. 3):228-269, 2011; IJT 34(Suppl.2):5-69, 2015
Isooctane	S		
Isooctyl Caprylate/Caprates	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isooctyl Tallate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isooctyl Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Isooctyl Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure.	IJT 28(Suppl. 1):68-133, 2009
Isopentane	S		JACT 1(4):127-142, 1982; IJT 24(Suppl. 1):1-102, 2005
Isopentyldiol	S		Final Report 06/2018 available from CIR
Isopolyglyceryl-3 Dimethiconol	S		IJT 36(Suppl. 3):31-50, 2017
Isoprene/Pentadiene Copolymer	S		IJT 39(S2):59-90,2020

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Isopropanolamine	SQ	The Panel concludes that Diisopropanolamine, Triisopropanolamine, Isopropanolamine, and Mixed Isopropanolamines are safe as cosmetic ingredients in the present practices of use and concentration. The isopropanolamines should not be used in products containing N-nitrosating agents.	JACT 6(1):53-76, 1987; IJT 25(Suppl. 2) :1-89,2006
Isopropyl Acetate	S		IJT 31(Suppl. 1):112-136, 2012
Isopropyl Alcohol	S		IJT 31(Suppl. 1):112-136, 2012
Isopropyl Arachidate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isopropyl Avocadoate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isopropyl Babassuate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isopropyl Behenate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isopropyl Benzoate	S		IJT 31(Suppl.3):342-372, 2012
Isopropyl Citrate	S		IJT 33(Suppl.2):16-46, 2014
Isopropyl Cresols	SQ	The CIR Expert panel concludes Sodium p-Chloro-m-Cresol, p-Chloro-m-Cresol, Chlorothymol, m-Cresol, o-Cresol, Isopropyl Cresols, Thymol, o-Cymen-5-ol, Cavacrol are safe at concentrations up to 0.5% in cosmetics; however, the available data are insufficient to support the safety of p-Cresol and Mixed Cresols for use in cosmetic products.	IJT 25(Suppl. 1):29-127, 2006
Isopropyl Ester of PVM/MA Copolymer	S		IJT 30(Suppl. 2):128-144, 2011
Isopropyl Hydroxystearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isopropyl Isostearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	JACT 11(1):43-49, 1992; IJT 30(Suppl. 2):73-127, 2011; IJT 34(Suppl.2):5-69, 2015

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Isopropyl Jojobate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isopropyl Lactate	SQ	Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Isopropyl Lactate...	IJT 17(S1):1-241, 1998; IJT 36(Suppl 2):14-58, 2017
Isopropyl Lanolate	S		JEPT 4(4):121-132, 1980; IJT 22(Suppl. 1):1-35, 2003
Isopropyl Laurate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isopropyl Linoleate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	JACT 11(1):51-56, 1992; IJT 34(Suppl.2):5-69, 2015
Isopropyl Myristate	S		JACT 1(4):55-80, 1982; IJT 24(Suppl. 1):1-102, 2005; IJT 29(Suppl. 3):162-186,2010; IJT 34(Suppl.2):5-69, 2015
Isopropyl Oleate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	JACT 11(1):51-56, 1992; IJT 34(Suppl.2):5-69, 2015
Isopropyl Palmitate	S		JACT 1(2):13-35, 1982; IJT 24(Suppl. 1):1-102, 2005; IJT 34(Suppl.2):5-69, 2015
Isopropyl Ricinoleate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating	IJT 26(Suppl. 3):31-77, 2007;IJT 34(Suppl.2):5-69, 2015
Isopropyl Stearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	JACT 4(5):107-146, 1985; IJT 24(Suppl. 1):1-102, 2005; IJT 34(Suppl.2):5-69, 2015

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Isopropyl Tallowate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Isopropyl Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Isopropyl Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure.	IJT 28(Suppl. 1):68-133, 2009
Isopropyl Titanium Triisostearate	SQ	The CIR Expert Panel concluded that Isopropyl Titanium Triisostearate is safe in cosmetics in the present practices of use and concentration described in the safety assessment, when used as a surface modifier.	Final Report 04/2019 Available from CIR
Isopropyl Titanium Triisostearate/Triethoxysilylethyl Polydimethylsiloxylethyl Dimethicone Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
Isopropylamine Dodecylbenzenesulfonate	SQ	Salts of alkylbenzene sulfonates, including ammonium dodecylbenzenesulfonate, calcium dodecylbenzenesulfonate, DEA-dodecylbenzenesulfonate, isopropylamine dodecylbenzenesulfonate, magnesium isodecylbenzenesulfonate, MIPA-dodecylbenzenesulfonate, potassium dodecylbenzenesulfonate, sodium decylbenzenesulfonate, SDDBS, sodium tridecylbenzenesulfonate, TEA-DDBS, and TEA-tridecylbenzenesulfonate, are safe as cosmetic ingredients in the practices of use given in this safety assessment when formulated to be nonirritating.	IJT 29(Suppl. 4):288-305, 2010
Isopropylidenediphenyl Bisglycidyl Methacrylate	SQ	Based on available data, the CIR Expert Panel concluded that ... Isopropylidenediphenyl Bisglycidyl Methacrylate is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	IJT 24(Suppl 5):53-100, 2005

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Isopropylparaben	SQ	The CIR Expert Panel concluded that the following 20 parabens are safe in cosmetics in the present practices of use and concentration described in the safety assessment when the sum of the combined concentration of parabens in any given formulation does not exceed 0.8 %...Isopropylparaben...	IJT 39(S1):5-97,2020
Isostearamide DEA	SQ	The CIR Expert Panel concluded that the following 33 diethanolamides are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating and when the levels of free diethanolamine in the diethanolamides do not exceed the present practices of use and concentration of diethanolamine itself. The Expert Panel cautions that ingredients should not be used in cosmetic products in which N-nitroso compounds can be formed...Isostearamide DEA...	Final Report 8/1995 Available from CIR; IJT 32(Suppl. 1):36-58, 2013
Isostearamide MEA	SQ	The CIR Expert Panel concluded that the ethanolamides listed subsequently are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating. The Expert Panel cautioned that these ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed..Isostearamide MEA	Final Report 8/1995 Available from CIR; IJT 34(Suppl.1):18-34, 2015
Isostearamide MIPA	SQ	The CIR Expert Panel concluded that the 14 alkyl amide MIPA ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Isostearamide MIPA...	Final Report 12/2019 Available from CIR
Isostearamidopropyl Betaine	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics as long as they are formulated to be non-sensitizing, which may be based on a QRA...Isostearamidopropyl Betaine...	IJT 31(Suppl. 1):77-111, 2012
Isostearamidopropyl Dimethylamine	SQ	The CIR Expert Panel concluded that the 24 fatty acid amidopropyl dimethylamines ingredients listed below are safe in cosmetics when they are formulated to be non-sensitizing, which may be based on a QRA...Isostearamidopropyl Dimethylamine...	IJT 38(S1):39-69,2019

Ingredient	Finding†	Conclusion	Citation‡
Isostearamidopropyl Morpholine Lactate	SQ	On the basis of the data presented in this report, the CIR Expert Panel concludes that Isostearamidopropyl Morpholine Lactate is safe for use as a cosmetic ingredient in rinse-off formulations in the present concentrations and practices of use. The Panel also concludes that the available data are insufficient to support safety in leave-on formulations.	IJT 18(S3):51-56, 1999; IJT 36(Suppl 2):14-58, 2017
Isosteareth-10	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Isosteareth-10...	IJT 31(Suppl. 2):169-244, 2012
Isosteareth-12	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Isosteareth-12...	IJT 31(Suppl. 2):169-244, 2012
Isosteareth-15	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Isosteareth-15...	IJT 31(Suppl. 2):169-244, 2012
Isosteareth-16	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Isosteareth-16... Ingredient	Finding†	Conclusion	Citation‡
Laureth-7	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Laureth-7...	IJT 31(Suppl. 2):169-244, 2012
Laureth-8	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Laureth-8...	IJT 31(Suppl. 2):169-244, 2012
Laureth-9	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Laureth-9...	IJT 31(Suppl. 2):169-244, 2012
Lauric Acid	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Lauric Acid...	JACT 6(3):321-401, 1987;IJT 25(Suppl. 2) :1-89,2006;Final Report Available 04/2019 from CIR
Lauric/Palmitic/Oleic Triglyceride	S		Final Report 12/2017 Available from CIR
Lauriminodipropionic Acid	S		IJT 32(Suppl. 3):49-55, 2013
Lauroyl Arginine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Lauroyl Arginine	IJT 36(Suppl. 1):17-56, 2017
Lauroyl Collagen Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Lauroyl Collagen Amino Acids	IJT 36(Suppl. 1):17-56, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Lauroyl Ethyltrimonium Methosulfate	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Lauroyl Ethyltrimonium Methosulfate...	IJT 31(Suppl. 3):296-341, 2012
Lauroyl Glutamic Acid	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Lauroyl Glutamic Acid	IJT 36(Suppl. 1):17-56, 2017
Lauroyl Lysine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Lauroyl Lysine...	IJT 36(Suppl. 1):17-56, 2017
Lauroyl Proline	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Lauroyl Proline...	IJT 36(Suppl. 1):17-56, 2017
Lauroyl Sarcosine	SQ	The CIR Expert Panel concluded that the following ingredients are safe as used in cosmetics when formulated to be non-irritating. The Expert Panel cautions that these ingredients should not be used in cosmetic products in which N-nitroso compounds can be found...Lauroyl Sarcosine...	IJT 20(S1):1-14, 2001;IJT 40(S2):117-133,2021
Lauroyl Silk Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Lauroyl Silk Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Laurtrimonium Bromide	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Laurtrimonium Bromide...	IJT 31(Suppl. 3):296-341, 2012
Laurtrimonium Chloride	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Laurtrimonium Chloride...	IJT 31(Suppl. 3):296-341, 2012
Lauryl Acrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Lauryl Acrylate Crosspolymer...	Final Report 12/2018 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Lauryl Acrylate/VA Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Lauryl Acrylate/VA Copolymer...	IJT 21(Suppl 3):1-50, 2002;Final Report 12/2018 Available from CIR
Lauryl Acrylate/VA Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Lauryl Acrylate/VA Crosspolymer...	Final Report 12/2018 Available from CIR
Lauryl Behenate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Lauryl Betaine	SQ	The CIR Expert Panel concluded that the eleven alkyl betaines listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Lauryl Betaine...	Final Report 3/2014 Available from CIR
Lauryl Cocoate	SQ	The CIR Expert Panel concludes that Ammonium Cocomonoglyceride Sulfate, Butylene Glycol Cocoate, Caprylic/Capric/Coco Glycerides, Cocoglycerides, Coconut Acid, Coconut Alcohol, Coconut Oil Decyl Esters, Cocos Nucifera (Coconut) Oil, Decyl Cocoate, Ethylhexyl Cocoate, Hydrogenated Coco-Glycerides, Hydrogenated Coconut Acid, Hydrogenated Coconut Oil, Isodecyl Cocoate, Lauryl Cocoate, Magnesium Cocoate, Methyl Cocoate, Octyldodecyl Cocoate, Pentaerythrityl Cocoate, Potassium Cocoate, Potassium Hydrogenated Cocoate, Sodium Cocoate, Sodium Cocomonoglyceride Sulfate, Sodium Hydrogenated Cocoate, and Tridecyl Cocoate are safe for use as cosmetic ingredients.	IJT 30(Suppl. 1):5-16, 2011; IJT 34(Suppl.2):5-69, 2015
Lauryl Dimethicone PEG-15 Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
Lauryl Dimethicone/Polyglycerin-3 Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
Lauryl Ethylhexanoate	SQ	The Panel concluded that the alkyl ethylhexanoates, listed below, are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Lauryl Ethylhexanoate...	IJT 34(Suppl.3):61-73, 2015
Lauryl Glucoside	SQ	The CIR Expert Panel concluded that the 19 alkyl glucosides listed below are safe in the present practices of use and concentrations when formulated to be nonirritating...Lauryl Glucoside...	IJT 32(Suppl. 3):22-48, 2013
Lauryl Glycol	S		IJT 31(Suppl. 2):147-168, 2012
Lauryl Hydroxysultaine	S		Final Report 06/2018 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Lauryl Isopentyl-PEG/PPG-18/18 Methicone	S		Final Report 12/2014 Available from CIR
Lauryl Isostearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Lauryl Lactate	SQ	Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Lauryl Lactate...	IJT 17(S1):1-241, 1998; IJT 36(Suppl 2):14-58, 2017
Lauryl Laurate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Lauryl Methacrylate	SQ	Based on available data, the CIR Expert Panel concluded that ... Lauryl Methacrylate is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	IJT 24(Suppl 5):53-100, 2005
Lauryl Methacrylate/Glycol Dimethacrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Lauryl Methacrylate/Glycol Dimethacrylate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Lauryl Methacrylate/Sodium Methacrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Lauryl Methacrylate/Sodium Methacrylate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Lauryl Myristate	S		IJT 29(Suppl. 3):162-186,2010; IJT 34(Suppl.2):5-69, 2015

Magnesium Hydroxide	SQ	The CIR Expert Panel concluded that ... Magnesium Hydroxide is safe in hair straighteners and depilatories under conditions of recommended use; users should minimize skin contact. Â These ingredients are safe for all other present practices of use and concentration described in this safety assessment when formulated to be nonirritating.	IJT 40(Suppl 2):16-35;2021
Magnesium Isododecylbenzenesulfonate	SQ	Salts of alkylbenzene sulfonates, including ammonium dodecylbenzenesulfonate, calcium dodecylbenzenesulfonate, DEA-dodecylbenzenesulfonate, isopropylamine dodecylbenzenesulfonate, magnesium isodecylbenzenesulfonate, MIPA-dodecylbenzenesulfonate, potassium dodecylbenzenesulfonate, sodium decylbenzenesulfonate, SDDBS, sodium tridecylbenzenesulfonate, TEA-DDBS, and TEA-tridecylbenzenesulfonate, are safe as cosmetic ingredients in the practices of use given in this safety assessment when formulated to be nonirritating.	IJT 29(Suppl. 4):288-305, 2010
Magnesium Lanolate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Magnesium Lanolate...	Final Report 04/2019 Available from CIR
Magnesium Laurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Magnesium Laurate...	Final Report 04/2019 Available from CIR
Magnesium Laureth Sulfate	S		IJT 29(Suppl. 3) :151-161,2010

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Magnesium Laureth-3 Sulfosuccinate	SQ	The CIR Expert Panel concluded that the following cosmetic ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Magnesium Laureth-3 Sulfosuccinate...	IJT 34(Suppl. 2):70-83, 2015
Magnesium Methyl Cocoyl Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Magnesium Methyl Cocoyl Taurate...	Final Report 12/2015 Available from CIR
Magnesium Myreth Sulfate	S		IJT 29(Suppl. 3) :151-161,2010
Magnesium Myristate	S		IJT 29(Suppl. 3):162-186,2010
Magnesium Oleth Sulfate	S		IJT 29(Suppl. 3) :151-161,2010
Magnesium Palmitate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Magnesium Palmitate...	Final Report 04/2019 Available from CIR
Magnesium Palmitoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Magnesium Palmitoyl Glutamate...	IJT 36(Suppl. 1):17-56, 2017
Magnesium PCA	SQ	The CIR Expert Panel concluded that PCA (i.e., 2-pyrrolidone-5-carboxylic acid), calcium PCA, magnesium PCA, potassium PCA, and sodium PCA are safe in cosmetics in the present practices of use and concentration described in this safety assessment. PCA and its salts should not be used in cosmetic products in which N-nitroso compounds can be formed.	IJT 38(S2):5-11,2019
Magnesium Phosphate	SQ	The CIR Expert Panel concluded that the following 31 ingredients are safe in the present practices of use and concentration in cosmetics as described in this safety assessment, when formulated to be non-irritating...Magnesium Phosphate...	IJT 40(S1):34-85;2021
Magnesium Salicylate	SQ	The Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in the safety assessment, when formulated to be non-irritating and non-sensitizing, which may be based on a quantitative risk assessment (QRA)...Magnesium Salicylate...	IJT 22(Suppl 3):1-108, 2003;Final Report 04/2019 Available from CIR

Ingredient	Finding†	Conclusion	Citation‡
Magnesium Silicate	SQ;I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Magnesium Silicate.	Final Report 12/2021 Available from CIR
Magnesium Silicate	S		IJT 22(Suppl. 1):37-102, 2003
Magnesium Stearate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Magnesium Stearate	IJT 22(Suppl. 1):1-35, 2003; JACT 1(2):143-177, 1982;Final Report 04/2019 Available from CIR
Magnesium Sulfate	S		IJT 37(Suppl. 1):47-54, 2018
Magnesium Tallowate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Magnesium Tallowate...	Final Report 04/2019 Available from CIR
Magnesium Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Magnesium Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure.	IJT 28(Suppl. 1):68-133, 2009
Magnesium Trisilicate	SQ;I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Magnesium Trisilicate.	Final Report 12/2021 Available from CIR
Magnesium Trisilicate	S		IJT 22(Suppl. 1):37-102, 2003

Methoxy PEG-23 Methacrylate/Glyceryl Diisostearate Methacrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Methoxy PEG-23 Methacrylate/Glyceryl Diisostearate Methacrylate Copolymer...	Final Report 12/2018 Available from CIR
Methoxy PEG-25	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Methoxy PEG-25...	IJT 31(Suppl. 2):169-244, 2012
Methoxy PEG-40	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Methoxy PEG-40...	IJT 31(Suppl. 2):169-244, 2012
Methoxy PEG-7	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Methoxy PEG-7...	IJT 31(Suppl. 2):169-244, 2012
Methoxy PEG/PPG-25/4 Dimethicone	S		Final Report 12/2014 Available from CIR
Methoxydiglycol Methacrylate	SQ	Based on available data, the CIR Expert Panel concluded that... Methoxydiglycol Methacrylate is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	IJT 24(Suppl 5):53-100, 2005
Methoxyisopropanol	S		IJT 27(Suppl. 2):25-39, 2008
Methoxyisopropyl Acetate	S		IJT 27(Suppl. 2):25-39, 2008
Methyl Acetate	S		IJT 31(Suppl. 1):112-136, 2012
Methyl Alcohol	SQ	Based on the data presented in this safety assessment, the CIR Expert Panel concludes that Methyl Alcohol is safe as used to denature alcohol used in cosmetic products.	IJT 20(S1):57-85, 2001

Ingredient	Finding†	Conclusion	Citation‡
Methyl Salicylate	SQ	The Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in the safety assessment, when formulated to be non-irritating and non-sensitizing, which may be based on a quantitative risk assessment (QRA)...Methyl Salicylate...	IJT 22(Suppl 3):1-108, 2003;Final Report 04/2019 Available from CIR
Methyl Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Methyl Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure.	IJT 28(Suppl. 1):68-133, 2009
Methylbenzethonium Chloride	SQ	On the basis of the available animal and clinical data, the Expert Panel concludes that Benzethonium Chloride and Methylbenzethonium Chloride are safe at concentrations of 0.5 percent in cosmetics applied to the skin. A maximum concentration of 0.02 percent is safe for cosmetics used in the eye area. Note: FDA has prohibited the use of Methylene Chloride in cosmetic products, action which supercedes this CIR conclusion (21CFR700.19).	JACT 4(5):65-106, 1985; IJT 25(Suppl. 2) :1-89,2006
Methylcellulose	S		Final Report 3/2009 Available from CIR
Methylchloroisothiazolinone	SQ	The Panel concluded that the ingredient mixture MCI/MI is safe in cosmetics when formulated to be non-sensitizing, based on the results of a QRA or similar methodology; however, at no point should concentrations exceed 7.5 ppm in leave on products or 15 ppm in rinse-off products.	IJT 40(S1):20-33;2021
Methyldibromo Glutaronitrile	SQ	Based on the available data, the CIR Expert Panel concludes Methyldibromo Glutaronitrile to be safe as used in rinse off products, and safe up to 0.025% in leave on products.	JACT 15(2):140-165, 1996; IJT 36(Suppl 2):14-58, 2017
Methylene Chloride	SQ	On the basis of the data included in this report, the CIR Expert Panel concludes that MeCl <sub>2</sub> is safe for use in cosmetic products designed for brief discontinuous use.  *Note: FDA has prohibited the use of Methylene Chloride in cosmetic products, action which supercedes this CIR conclusion (21CFR700.19).	JACT 7(6):741-835, 1988; IJT 27(Suppl. 1):77-142, 2008

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		<p>The CIR Expert Panel concluded that formaldehyde and methylene glycol are safe for use in cosmetics when formulated to ensure use at the minimal effective concentration, but in no case should the formalin concentration exceed 0.2% (w/w), which would be 0.074% (w/w) calculated as formaldehyde or 0.118% (w/w) calculated as methylene glycol. Additionally, formaldehyde and methylene glycol are safe in the present practices of use and concentration in nail hardening products. However, formaldehyde and methylene glycol are unsafe in the present practices of use and concentration in hair smoothing products (a.k.a. hair straightening products).</p> <p>Formalin is an aqueous solution wherein formaldehyde (gas) has been added to water to a saturation point, which is typically 37% formaldehyde (w/w). Because of the equilibrium between formaldehyde and methylene glycol in aqueous solution, formalin is composed of both formaldehyde and methylene glycol.</p>	
Methylene Glycol	S;SQ;U		IJT 32(Suppl. 4):5-32, 2013
		<p>The Expert Panel for Cosmetic Ingredient Safety concluded that Methylisothiazolinone is safe for use in rinse-off cosmetic products at concentrations up to 100 ppm (i.e. 0.01%) and safe in leave-on cosmetic products when they are formulated to be non-sensitizing, which may be determined based on a QRA or similar methodology.</p>	
Methylisothiazolinone	SQ		IJT 38(S1):70-84,2019;IJT 40(S1):5-19, 2021
		<p>The CIR Expert Panel concluded that the following 20 parabens are safe in cosmetics in the present practices of use and concentration described in the safety assessment when the sum of the combined concentration of parabens in any given formulation does not exceed 0.8 %...Methylparaben...</p>	
Methylparaben	SQ		JACT 3(5):147-209, 1984; IJT 27 (Suppl. 4):1-82, 2008;IJT 39(Suppl. 1):5-97, 2020

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Myristyl Stearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	JACT 4(5):107-146, 1985; IJT 24(Suppl. 1):1-102, 2005; IJT 34(Suppl.2):5-69, 2015
Myristyl Sultaine	S		
Myrtrimonium Bromide	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Myrtrimonium Bromide...	IJT 31(Suppl. 3):296-341, 2012
N,N-Bis(2-Hydroxyethyl)-p-Phenylenediamine Sulfate	S		
n-Butane	S		
n-Butyl Alcohol	S		
N-Phenyl-p-Phenylenediamine	SQ	On the basis of the data included in this report, the CIR Expert Panel concludes that N-Phenyl-p-Phenylenediamine... safe for use in hair dyes at concentrations up to 1.7% (as the free base).	JACT 13(5):374-394, 1994; IJT 30(Suppl. 2):73-127, 2011
N-Phenyl-p-Phenylenediamine HCl	SQ		
N-Phenyl-p-Phenylenediamine Sulfate	SQ		
Neopentyl Glycol Dicaprate	S	On the basis of the data included in this report, the CIR Expert Panel concludes that ... N-Phenyl-p-Phenylenediamine Sulfate are safe for use in hair dyes at concentrations up to 1.7% (as the free base).	JACT 13(5):374-394, 1994; IJT 30(Suppl. 2):73-127, 2011
Neopentyl Glycol Dicaprylate/Dicaprate	S		
Neopentyl Glycol Dicaprylate/Dipelargonate/Dicaprate	S		
Neopentyl Glycol Diethylhexanoate	S		
Neopentyl Glycol Diheptanoate	S		
Neopentyl Glycol Diisononanoate	S		
Neopentyl Glycol Diisostearate	S		
Neopentyl Glycol Dilaurate	S		
Nereocystis Luetkeana Extract	S		
Niacin	S		
Niacinamide	S		
Nitrocellulose	S

Octyldodecyl Ethylhexanoate	SQ	The Panel concluded that the alkyl ethylhexanoates, listed below, are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Octyldodecyl Ethylhexanoate...	IJT 34(Suppl.3):61-73, 2015
Octyldodecyl Glucoside	SQ	The CIR Expert Panel concluded that the 19 alkyl glucosides listed below are safe in the present practices of use and concentrations when formulated to be nonirritating...Octyldodecyl Glucoside...	IJT 32(Suppl. 3):22-48, 2013
Octyldodecyl Hydroxystearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Isostearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Meadowfoamate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Myristate	S		IJT 29(Suppl. 3):162-186,2010; IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Neodecanoate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Octyldodecyl Neopentanoate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Octyldodecanoate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Oleate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Olivatate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Ricinoleate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating	IJT 26(Suppl.3):31-77, 2007;IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Safflowerate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Stearate	SQ	The CIR Expert Panel concluded that the alkyl esters, listed subsequently, are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	IJT 34(Suppl.2):5-69, 2015
Octyldodecyl Stearoyl Stearate	S		IJT 20(suppl 3):51-59, 2001; IJT 24(Suppl. 3):65-74, 2005
Octyldodecyltrimonium Chloride	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Octyldodecyltrimonium Chloride...	IJT 31(Suppl. 3):296-341, 2012
Oenothera Biennis (Evening Primrose) Oil	S		IJT 36(Suppl. 3):51-129, 2017
Olea Europaea (Olive) Fruit Oil	S		IJT 36(Suppl. 3):51-129, 2017
Olea Europaea (Olive) Husk Oil	S		IJT 36(Suppl. 3):51-129, 2017
Olea Europaea (Olive) Oil Unsaponifiables	S		IJT 36(Suppl. 3):51-129, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Oleamide DEA	SQ	The CIR Expert Panel concluded that the following 33 diethanolamides are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating and when the levels of free diethanolamine in the diethanolamides do not exceed the present practices of use and concentration of diethanolamine itself. The Expert Panel cautions that ingredients should not be used in cosmetic products in which N-nitroso compounds can be formed...Oleamide DEA...	JACT 5(5):415-454, 1986; IJT 32(Suppl. 1):36-58, 2013
Oleamide MEA	SQ	The CIR Expert Panel concluded that the ethanolamides listed subsequently are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating. The Expert Panel cautioned that these ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Oleamide MEA...	IJT 34(Suppl.1):18-34, 2015
Oleamide MIPA	SQ	The CIR Expert Panel concluded that the 14 alkyl amide MIPA ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Oleamide MIPA...	Final Report 12/2019 Available from CIR
Oleamidopropyl Betaine	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics as long as they are formulated to be non-sensitizing, which may be based on a QRA...Oleamidopropyl Betaine...	IJT 31(Suppl. 1):77-111, 2012
Oleamidopropyl Dimethylamine	SQ	The CIR Expert Panel concluded that the 24 fatty acid amidopropyl dimethylamines ingredients listed below are safe in cosmetics when they are formulated to be non-sensitizing, which may be based on a QRA...Oleamidopropyl Dimethylamine...	IJT 38(S1):39-69,2019
Oleamidopropyl Hydroxysultaine	S		Final Report 06/2018 Available from CIR
Oleic Acid	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Oleic Acid...	JACT 6(3):321-401, 1987;IJT 25(Suppl. 2) :1-89,2006;Final Report Available 04/2019 from CIR
Oleic/Linoleic Triglyceride	S		Final Report 12/2017 Available from CIR
Oleic/Palmitic/Lauric/Myristic/Linoleic Triglyceride	S		Final Report 12/2017 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Oleoyl Sarcosine	SQ	The CIR Expert Panel concluded that the following ingredients are safe as used in cosmetics when formulated to be non-irritating. The Expert Panel cautions that these ingredients should not be used in cosmetic products in which N-nitroso compounds can be found...Oleoyl Sarcosine...	IJT 20(S1):1-14, 2001;IJT 40(S2):117-133,2021
Oleoyl Tyrosine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Oleoyl Tyrosine...	IJT 36(Suppl. 1):17-56, 2017
Oleth-10	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Oleth-10...	IJT 18(S2):17-24, 1999;IJT 31(Suppl. 2):169-244, 2012
Oleth-100	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Oleth-100...	IJT 31(Suppl. 2):169-244, 2012
Oleth-106	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Oleth-106...	IJT 31(Suppl. 2):169-244, 2012
Oleth-11	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Oleth-11...	IJT 18(S2):17-24, 1999;IJT 31(Suppl. 2):169-244, 2012

Oxidized Keratin	S		IJT 40(Suppl 2):36-51;2021

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Oxyquinoline	SQ	Based on the available information, the CIR Expert Panel concludes that Oxyquinoline and Oxyquinoline Sulfate are safe as used as stabilizers for hydrogen peroxide in leave-on hair care cosmetic products. There are insufficient data to support the safety of Oxyquinoline and Oxyquinoline Sulfate in leave-on cosmetic products.	JACT 11(4):497-507, 1992; IJT 25(Suppl. 1):1-9, 2006
Oxyquinoline Sulfate	SQ	Based on the available information, the CIR Expert Panel concludes that Oxyquinoline and Oxyquinoline Sulfate are safe as used as stabilizers for hydrogen peroxide in leave-on hair care cosmetic products. There are insufficient data to support the safety of Oxyquinoline and Oxyquinoline Sulfate in leave-on cosmetic products.	JACT 11(4):497-507, 1992; IJT 25(Suppl. 1):1-9, 2006
Ozokerite	S		JACT 3(3):43-99, 1984; IJT 24(Suppl. 1):1-102, 2005
p-Aminophenol	S		JACT 7(3):279-333, 1988; IJT 27(Suppl. 1):77-142, 2008
p-Chloro-m-Cresol	SQ	The CIR Expert panel concludes Sodium p-Chloro-m-Cresol, p-Chloro-m-Cresol, Chlorothymol, m-Cresol, o-Cresol, Isopropyl Cresols, Thymol, o-Cymen-5-ol, Cavacrol are safe at concentrations up to 0.5% in cosmetics; however, the available data are insufficient to support the safety of p-Cresol and Mixed Cresols for use in cosmetic products.	IJT 16(Suppl.3):235-268, 1997;IJT 25(Suppl. 1):29-127, 2006
p-Cresol	Z	The CIR Expert panel concludes Sodium p-Chloro-m-Cresol, p-Chloro-m-Cresol, Chlorothymol, m-Cresol, o-Cresol, Isopropyl Cresols, Thymol, o-Cymen-5-ol, Cavacrol are safe at concentrations up to 0.5% in cosmetics; however, the available data are insufficient to support the safety of p-Cresol and Mixed Cresols for use in cosmetic products.	IJT 25(Suppl. 1):29-127, 2006
p-Hydroxyanisole	SQ; U	The CIR Expert Panel concluded that p-Hydroxyanisole is safe for use in nail adhesives and in artificial nail coatings, as a polymerization inhibitor, that are cured by LED light; and unsafe for use in all other cosmetics due to dermal depigmentation potential.	JACT 4(5):31-63, 1985;Final Report 12/2014 Available from CIR
p-Methylaminophenol	S		Final Report 12/2007 Available from CIR
p-Methylaminophenol Sulfate	S		JACT 10(1):53-65, 1991;Final Report 12/2007 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Palm Kernel Acid	S		IJT 36(Suppl. 3):51-129, 2017
Palm Kernel Oil Polyglyceryl-4 Esters	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Palm Kernel Oil Polyglyceryl-4 Esters...	Final Report 9/2016 Available from CIR
Palm Kernelamide DEA	SQ	The CIR Expert Panel concluded that the following 33 diethanolamides are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating and when the levels of free diethanolamine in the diethanolamides do not exceed the present practices of use and concentration of diethanolamine itself. The Expert Panel cautions that ingredients should not be used in cosmetic products in which N-nitroso compounds can be formed...Palm Kernelamide DEA...	IJT 32(Suppl. 1):36-58, 2013
Palm Kernelamide MEA	SQ	The CIR Expert Panel concluded that the ethanolamides listed subsequently are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating. The Expert Panel cautioned that these ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Palm Kernelamide MEA...	IJT 34(Suppl.1):18-34, 2015
Palm Kernelamide MIPA	SQ	The CIR Expert Panel concluded that the 14 alkyl amide MIPA ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Palm Kernelamide MIPA...	Final Report 12/2019 Available from CIR
Palm Kernelamidopropyl Betaine	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics as long as they are formulated to be non-sensitizing, which may be based on a QRA...Palm Kernelamidopropyl Betaine...	IJT 31(Suppl. 1):77-111, 2012
Palm Oil PEG-8 Esters	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...Palm Oil PEG-8 Esters...	IJT 33(Suppl 4):13-39, 2014

Quick Reference Table

PEG-10 Laurate	SQ	On the basis of the available data, the CIR Expert Panel concludes that ... PEG-10 Laurate is safe for use in cosmetics at concentrations up to 25%.	IJT 19(S2):29-41, 2000
PEG-10 Methyl Ether Dimethicone	S		Final Report 12/2014 Available from CIR
PEG-10 Oleamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-10 Oleamine...	Final Report 6/2015 Available from CIR
PEG-10 Olive Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-10 Olive Glycerides...	IJT 39(S2):26-58,2020
PEG-10 Polydimethylsiloxylethyl Dimethicone/Bis-Vinyl Dimethicone Crosspolymer	S		Final Report 12/2014 Available from CIR
PEG-10 Propylene Glycol	S		IJT 20(suppl 4):13-26, 2001;Final Report 12/2016 Available from CIR
PEG-10 Sorbitan Laurate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-10 Sorbitan Laurate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-10 Soy Sterol	S		IJT 19(S1):29-46, 2000; IJT 23(Suppl. 2:23-47,)2004
PEG-10 Soyamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-10 Soyamine...	Final Report 6/2015 Available from CIR
PEG-10 Stearamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-10 Stearamide...	Final Report 06/2019 Available from CIR
PEG-10 Stearamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-10 Stearamine...	Final Report 6/2015 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-10 Sunflower Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-10 Sunflower Glycerides...	IJT 39(S2):26-58,2020
PEG-10 Tsubakiate Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-10 Tsubakiate Glycerides...	IJT 39(S2):26-58,2020
PEG-10/Lauryl Dimethicone Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
PEG-100	S		Final Report 6/2010 Available from CIR
PEG-100 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-100 Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-100 Hydrogenated Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-100 Hydrogenated Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-100 Lanolin	S		IJT 18(S1):61-68, 1999; IJT 37(Suppl. 1):19-27, 2018
PEG-100 Stearate	S		JACT 2(7):17-34, 1983; IJT 24(Suppl. 1):1-102, 2005
PEG-11 Avocado Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-11 Avocado Glycerides...	IJT 39(S2):26-58,2020
PEG-11 Babassu Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-11 Babassu Glycerides...	IJT 39(S2):26-58,2020
PEG-11 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-11 Castor Oil...	IJT 33(Suppl 4):13-39, 2014

PEG-150 Distearate PEG-150 Lanolin	SQ S	The CIR Expert Panel concluded that butylene glycol diisononanoate, cetearyl isononanoate, cetearyl nonanoate, cetyl isononanoate, cholesteryl nonanoate, diethylene glycol diethyl-hexanoate/ diisononanoate, dipentaerythrityl pentaiononanoate, ethylhexyl isononanoate, isodecyl isononanoate, isononyl isononanoate, isotridecyl isononanoate, neopentyl glycol diisononanoate, PEG-2 diisononanoate, PEG-5 isononanoate, pentaerythrityl tetraiononanoate, polyglyceryl-20 octaiononanoate, tridecyl isononanoate, ethylhexyl pelargonate, pentaerythrityl tetrapelargonate, cellobiose octanonoate, diethylene glycol diisononanoate, dihydrocholesteryl nonanoate, glycereth-7 diisononanoate, isostearyl isononanoate, phytosteryl nonanoate, propylene glycol diisononanoate, ethyl pelargonate, isobutyl pelargonate, methyl pelargonate, neopentyl glycol dicaprylate/dipelargonate/dicaprate, and pelargonic acid are safe as cosmetic ingredients in the present practices of use and concentration described in this safety assessment.	Final Report 3/2015 Available from CIR IJT 18(S1):61-68, 1999; IJT 37(Suppl. 1):19-27, 2018
PEG-150 Laurate PEG-150 Pentaerythrityl Tetrastearate	SQ S	On the basis of the available data, the CIR Expert Panel concludes that ... PEG-150 Laurate is safe for use in cosmetics at concentrations up to 25%.	IJT 19(S2):29-41, 2000 Final Report 6/2014 Available from CIR
PEG-150 Stearate PEG-16	S S		JACT 2(7):17-34, 1983; IJT 24(Suppl. 1):1-102, 2005 Final Report 6/2010 Available from CIR
PEG-16 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-16 Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-16 Cetyl/Oleyl/Stearyl/Lanolin Alcohol Ether	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...PEG-16 Cetyl/Oleyl/Stearyl/Lanolin Alcohol Ether...	IJT 31(Suppl. 2):169-244, 2012

PEG-20 Distearate	SQ	The CIR Expert Panel concluded that butylene glycol diisononanoate, cetearyl isononanoate, cetearyl nonanoate, cetyl isononanoate, cholesteryl nonanoate, diethylene glycol diethyl-hexanoate/ diisononanoate, dipentaerythrityl pentaiononanoate, ethylhexyl isononanoate, isodecyl isononanoate, isononyl isononanoate, isotridecyl isononanoate, neopentyl glycol diisononanoate, PEG-2 diisononanoate, PEG-5 isononanoate, pentaerythrityl tetraiononanoate, polyglyceryl-20 octaiononanoate, tridecyl isononanoate, ethylhexyl pelargonate, pentaerythrityl tetrapelargonate, cellobiose octanonoate, diethylene glycol diisononanoate, dihydrocholesteryl nonanoate, glycereth-7 diisononanoate, isostearyl isononanoate, phytosteryl nonanoate, propylene glycol diisononanoate, ethyl pelargonate, isobutyl pelargonate, methyl pelargonate, neopentyl glycol dicaprylate/dipelargonate/dicaprate, and pelargonic acid are safe as cosmetic ingredients in the present practices of use and concentration described in this safety assessment.	Final Report 3/2015 Available from CIR
PEG-20 Evening Primrose Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-20 Evening Primrose Glycerides...	IJT 39(S2):26-58,2020
PEG-20 Glyceryl Diisostearate	S		Final Report Available from CIR 09/2022
PEG-20 Hydrogenated Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-20 Hydrogenated Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-20 Hydrogenated Castor Oil Isostearate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-20 Hydrogenated Castor Oil Isostearate...	IJT 33(Suppl 4):13-39, 2014

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-20 Hydrogenated Castor Oil Laurate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-20 Hydrogenated Castor Oil Laurate...	IJT 33(Suppl 4):13-39, 2014
PEG-20 Hydrogenated Castor Oil PCA Isostearate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-20 Hydrogenated Castor Oil PCA Isostearate...	IJT 33(Suppl 4):13-39, 2014
PEG-20 Hydrogenated Castor Oil Triisostearate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-20 Hydrogenated Castor Oil Triisostearate...	IJT 33(Suppl 4):13-39, 2014
PEG-20 Hydrogenated Lanolin	S		IJT 18(S1):61-68, 1999; IJT 37(Suppl. 1):19-27, 2018
PEG-20 Hydrogenated Palm Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-20 Hydrogenated Palm Glycerides...	IJT 39(S2):26-58,2020
PEG-20 Hydrogenated Tallow Amine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-20 Hydrogenated Tallow Amine...	Final Report 6/2015 Available from CIR
PEG-20 Lanolin	S		JACT 1(4):91-102, 1982; IJT 37(Suppl. 1):19-27, 2018
PEG-20 Laurate	SQ	On the basis of the available data, the CIR Expert Panel concludes that ...PEG-20 Laurate is safe for use in cosmetics at concentrations up to 25%.	IJT 19(S2):29-41, 2000
PEG-20 Methyl Glucose Distearate	S		IJT 35(Suppl. 2):12-40, 2016
PEG-20 Methyl Glucose Sesquicaprylate/Sesquicaprate	S		IJT 35(Suppl. 2):12-40, 2016
PEG-20 Methyl Glucose Sesquilaurate	S		IJT 35(Suppl. 2):12-40, 2016
PEG-20 Methyl Glucose Sesquistearate	S		IJT 35(Suppl. 2):12-40, 2016
PEG-20 Oleamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-20 Oleamine...	Final Report 6/2015 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-20 Sorbitan Beeswax	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-20 Sorbitan Beeswax...	IJT 20(suppl 4):27-38, 2001;Final Report 6/2015 Available from CIR
PEG-20 Sorbitan Cocoate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-20 Sorbitan Cocoate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-20 Sorbitan Isostearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-20 Sorbitan Isostearate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-20 Sorbitan Oleate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-20 Sorbitan Oleate...	Final Report 6/2015 Available from CIR
PEG-20 Sorbitan Triisostearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-20 Sorbitan Triisostearate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-20 Stearate	S		JACT 2(7):17-34, 1983; IJT 24(Suppl. 1):1-102, 2005
PEG-20 Tallow Amine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-20 Tallow Amine...	Final Report 6/2015 Available from CIR
PEG-20 Tsubakiate Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-20 Tsubakiate Glycerides...	IJT 39(S2):26-58,2020
PEG-200	S		Final Report 6/2010 Available from CIR
PEG-200 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-200 Castor Oil...	IJT 33(Suppl 4):13-39, 2014

PEG-240/HDI Copolymer Bis-Decyltetradeceth-20 Ether	S		Final Report 06/2016 available from CIR
PEG-25 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-25 Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-25 Hydrogenated Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-25 Hydrogenated Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-25 Lanolin	S		IJT 18(S1):61-68, 1999; IJT 37(Suppl. 1):19-27, 2018
PEG-25 Moringa Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-25 Moringa Glycerides...	IJT 39(S2):26-58,2020

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-25 Oleamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-25 Oleamine...	IJT 18(S1):43-50, 1999;Final Report 6/2015 Available from CIR
PEG-25 Propylene Glycol Stearate	S		IJT 20(suppl 4):13-26, 2001;Final Report 12/2016 Available from CIR
PEG-25 Soy Sterol	S		IJT 19(S1):29-46, 2000; IJT 23(Suppl. 2:23-47,)2004
PEG-25 Tallow Amine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-25 Tallow Amine...	Final Report 6/2015 Available from CIR
PEG-250 Distearate	SQ	The CIR Expert Panel concluded that butylene glycol diisononanoate, cetearyl isononanoate, cetearyl nonanoate, cetyl isononanoate, cholesteryl nonanoate, diethylene glycol diethyl-hexanoate/ diisononanoate, dipentaerythrityl pentaiononanoate, ethylhexyl isononanoate, isodecyl isononanoate, isononyl isononanoate, isotridecyl isononanoate, neopentyl glycol diisononanoate, PEG-2 diisononanoate, PEG-5 isononanoate, pentaerythrityl tetraiononanoate, polyglyceryl-20 octaiononanoate, tridecyl isononanoate, ethylhexyl pelargonate, pentaerythrityl tetrapelargonate, cellobiose octanonanoate, diethylene glycol diisononanoate, dihydrocholesteryl nonanoate, glycereth-7 diisononanoate, isostearyl isononanoate, phytosteryl nonanoate, propylene glycol diisononanoate, ethyl pelargonate, isobutyl pelargonate, methyl pelargonate, neopentyl glycol dicaprylate/dipelargonate/dicaprate, and pelargonic acid are safe as cosmetic ingredients in the present practices of use and concentration described in this safety assessment.	Final Report 3/2015 Available from CIR
PEG-25M	S		Final Report 6/2010 Available from CIR
PEG-26 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-26 Castor Oil...	IJT 33(Suppl 4):13-39, 2014

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-26 Jojoba Alcohol	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...PEG-26 Jojoba Alcohol...	IJT 31(Suppl. 2):169-244, 2012
PEG-27 Lanolin	S		JACT 1(4):91-102, 1982; IJT 37(Suppl. 1):19-27, 2018
PEG-29 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-29 Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-2M	S		Final Report 6/2010 Available from CIR
PEG-3 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-3 Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-3 Cocamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-3 Cocamide...	Final Report 06/2019 Available from CIR
PEG-3 Cocamide DEA	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-3 Cocamide DEA...	Final Report 06/2019 Available from CIR
PEG-3 Cocamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-3 Cocamine...	IJT 18(S1):43-50, 1999;Final Report 6/2015 Available from CIR

Ingredient	Finding†	Conclusion	Citation‡
PEG-30 Hydrogenated Castor Oil Triisostearate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-30 Hydrogenated Castor Oil Triisostearate...	IJT 33(Suppl 4):13-39, 2014
PEG-30 Hydrogenated Lanolin	S		IJT 18(S1):61-68, 1999; IJT 37(Suppl. 1):19-27, 2018
PEG-30 Hydrogenated Tallow Amine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-30 Hydrogenated Tallow Amine...	Final Report 6/2015 Available from CIR
PEG-30 Lanolin	S		JACT 1(4):91-102, 1982; IJT 37(Suppl. 1):19-27, 2018
PEG-30 Oleamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-30 Oleamine...	IJT 18(S1):43-50, 1999;Final Report 6/2015 Available from CIR
PEG-30 sorbitan beeswax	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-30 sorbitan beeswax...	Final Report 06/16/2015 available from CIR
PEG-30 Sorbitan Tetraoleate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-30 Sorbitan Tetraoleate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-30 Sorbitol Tetraoleate Laurate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-30 Sorbitol Tetraoleate Laurate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-30 Soy Sterol	S		IJT 19(S1):29-46, 2000; IJT 23(Suppl. 2:23-47,)2004
PEG-30 Tallow Amine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-30 Tallow Amine...	Final Report 6/2015 Available from CIR
PEG-32	S		JACT 12(5):429-457, 1993;Final Report 6/2010 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-32 Dilaurate	SQ	<p>The CIR Expert Panel concluded that butylene glycol diisononanoate, cetearyl isononanoate, cetearyl nonanoate, cetyl isononanoate, cholesteryl nonanoate, diethylene glycol diethyl-hexanoate/ diisononanoate, dipentaerythrityl pentaiononanoate, ethylhexyl isononanoate, isodecyl isononanoate, isononyl isononanoate, isotridecyl isononanoate, neopentyl glycol diisononanoate, PEG-2 diisononanoate, PEG-5 isononanoate, pentaerythrityl tetraiononanoate, polyglyceryl-20 octaiononanoate, tridecyl isononanoate, ethylhexyl pelargonate, pentaerythrityl tetrapelargonate, cellobiose octanonoate, diethylene glycol diisononanoate, dihydrocholesteryl nonanoate, glycereth-7 diisononanoate, isostearyl isononanoate, phytosteryl nonanoate, propylene glycol diisononanoate, ethyl pelargonate, isobutyl pelargonate, methyl pelargonate, neopentyl glycol dicaprylate/dipelargonate/dicaprate, and pelargonic acid are safe as cosmetic ingredients in the present practices of use and concentration described in this safety assessment.</p>	Final Report 3/2015 Available from CIR
PEG-32 Dioleate	SQ	<p>The CIR Expert Panel concluded that butylene glycol diisononanoate, cetearyl isononanoate, cetearyl nonanoate, cetyl isononanoate, cholesteryl nonanoate, diethylene glycol diethyl-hexanoate/ diisononanoate, dipentaerythrityl pentaiononanoate, ethylhexyl isononanoate, isodecyl isononanoate, isononyl isononanoate, isotridecyl isononanoate, neopentyl glycol diisononanoate, PEG-2 diisononanoate, PEG-5 isononanoate, pentaerythrityl tetraiononanoate, polyglyceryl-20 octaiononanoate, tridecyl isononanoate, ethylhexyl pelargonate, pentaerythrityl tetrapelargonate, cellobiose octanonoate, diethylene glycol diisononanoate, dihydrocholesteryl nonanoate, glycereth-7 diisononanoate, isostearyl isononanoate, phytosteryl nonanoate, propylene glycol diisononanoate, ethyl pelargonate, isobutyl pelargonate, methyl pelargonate, neopentyl glycol dicaprylate/dipelargonate/dicaprate, and pelargonic acid are safe as cosmetic ingredients in the present practices of use and concentration described in this safety assessment.</p>	Final Report 3/2015 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		The CIR Expert Panel concluded that butylene glycol diisononanoate, cetearyl isononanoate, cetearyl nonanoate, cetyl isononanoate, cholesteryl nonanoate, diethylene glycol diethyl-hexanoate/ diisononanoate, dipentaerythrityl pentaiononanoate, ethylhexyl isononanoate, isodecyl isononanoate, isononyl isononanoate, isotridecyl isononanoate, neopentyl glycol diisononanoate, PEG-2 diisononanoate, PEG-5 isononanoate, pentaerythrityl tetraiononanoate, polyglyceryl-20 octaiononanoate, tridecyl isononanoate, ethylhexyl pelargonate, pentaerythrityl tetrapelargonate, cellobiose octanonanoate, diethylene glycol diisononanoate, dihydrocholesteryl nonanoate, glycereth-7 diisononanoate, isostearyl isononanoate, phytosteryl nonanoate, propylene glycol diisononanoate, ethyl pelargonate, isobutyl pelargonate, methyl pelargonate, neopentyl glycol dicaprylate/dipelargonate/dicaprate, and pelargonic acid are safe as cosmetic ingredients in the present practices of use and concentration described in this safety assessment.	
PEG-32 Distearate	SQ		Final Report 3/2015 Available from CIR
PEG-32 Laurate	SQ	On the basis of the available data, the CIR Expert Panel concludes that ... PEG-32 Laurate is safe for use in cosmetics at concentrations up to 25%.	IJT 19(S2):29-41, 2000
PEG-32 Methyl Ether Dimethicone	S		Final Report 12/2014 Available from CIR
PEG-32 Stearate	S		JACT 2(7):17-34, 1983; IJT 24(Suppl. 1):1-102, 2005
PEG-33	S		Final Report 6/2010 Available from CIR
		The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-33 Castor Oil...	
PEG-33 Castor Oil	SQ		IJT 16(Suppl.3):269-306, 1997; IJT 33(Suppl 4):13-39, 2014
		The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-35 Almond Glycerides...	
PEG-35 Almond Glycerides	SQ		IJT 39(S2):26-58,2020
		The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-35 Castor Oil...	
PEG-35 Castor Oil	SQ		IJT 16(Suppl.3):269-306, 1997; IJT 33(Suppl 4):13-39, 2014

This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...PEG-40 Methyl Ether...	IJT 31(Suppl. 2):169-244, 2012
PEG-40 Olive Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-40 Olive Glycerides...	IJT 39(S2):26-58,2020
PEG-40 Sorbitan Diisostearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-40 Sorbitan Diisostearate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-40 Sorbitan Lanolate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-40 Sorbitan Lanolate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-40 Sorbitan Laurate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-40 Sorbitan Laurate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-40 Sorbitan Oleate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-40 Sorbitan Oleate...	Final Report 6/2015 Available from CIR
PEG-40 Sorbitan Perisostearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-40 Sorbitan Perisostearate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-40 Sorbitan Peroleate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-40 Sorbitan Peroleate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-40 Sorbitan Stearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-40 Sorbitan Stearate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-40 Sorbitan Tetraoleate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-40 Sorbitan Tetraoleate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-40 Sorbitol Hexaoleate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-40 Sorbitol Hexaoleate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-40 Soy Sterol	S		IJT 19(S1):29-46, 2000; IJT 23(Suppl. 2:23-47,)2004

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-45 Hydrogenated Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-45 Hydrogenated Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-45 Palm Kernel Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-45 Palm Kernel Glycerides...	Final Report 12/2014 Available from CIR
PEG-45 Safflower Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-45 Safflower Glycerides...	Final Report 12/2014 Available from CIR
PEG-450	S		Final Report 6/2010 Available from CIR
PEG-45M	S		Final Report 6/2010 Available from CIR
PEG-5 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-5 Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-5 Cocamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-5 Cocamide...	Final Report 06/2019 Available from CIR
PEG-5 Cocamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-5 Cocamine...	IJT 18(S1):43-50, 1999;Final Report 6/2015 Available from CIR
PEG-5 Hydrogenated Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-5 Hydrogenated Castor Oil...	IJT 33(Suppl 4):13-39, 2014

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-5 Hydrogenated Castor Oil Isostearate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-5 Hydrogenated Castor Oil Isostearate...	IJT 33(Suppl 4):13-39, 2014
PEG-5 Hydrogenated Castor Oil Triisostearate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-5 Hydrogenated Castor Oil Triisostearate...	IJT 33(Suppl 4):13-39, 2014
PEG-5 Hydrogenated Corn Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-5 Hydrogenated Corn Glycerides...	Final Report 12/2014 Available from CIR
PEG-5 Hydrogenated Lanolin	S		IJT 18(S1):61-68, 1999; IJT 37(Suppl. 1):19-27, 2018
PEG-5 Hydrogenated Tallow Amine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-5 Hydrogenated Tallow Amine...	Final Report 6/2015 Available from CIR
PEG-5 Isononanoate	S		Final Report 3/2015 Available from CIR
PEG-5 Lanolin	S		IJT 18(S1):61-68, 1999; IJT 37(Suppl. 1):19-27, 2018
PEG-5 Lanolinamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-5 Lanolinamide...	Final Report 06/2019 Available from CIR
PEG-5 Lauramide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-5 Lauramide...	Final Report 06/2019 Available from CIR
PEG-5 Oleamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-5 Oleamide...	Final Report 06/2019 Available from CIR

PEG-6 Lauramide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-6 Lauramide...	Final Report 06/2019 Available from CIR
PEG-6 Laurate	SQ	On the basis of the available data, the CIR Expert Panel concludes that ... PEG-6 Laurate is safe for use in cosmetics at concentrations up to 25%.	IJT 19(S2):29-41, 2000
PEG-6 Methyl Ether	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...PEG-6 Methyl Ether...	IJT 31(Suppl. 2):169-244, 2012
PEG-6 Methyl Ether Dimethicone	S		Final Report 12/2014 Available from CIR
PEG-6 Oleamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-6 Oleamide...	Final Report 06/2019 Available from CIR
PEG-6 Oleamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-6 Oleamine...	Final Report 6/2015 Available from CIR
PEG-6 Olive Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-6 Olive Glycerides...	Final Report 12/2014 Available from CIR
PEG-6 Propylene Glycol Caprylate/Caprates	S		Final Report 12/2016 Available from CIR
PEG-6 Sorbitan Beeswax	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-6 Sorbitan Beeswax...	IJT 20(suppl 4):27-38, 2001;Final Report 6/2015 Available from CIR
PEG-6 Sorbitan Oleate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-6 Sorbitan Oleate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-6 Sorbitan Stearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-6 Sorbitan Stearate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-6 Stearate	S		JACT 2(7):17-34, 1983; IJT 24(Suppl. 1):1-102, 2005
PEG-60	S		Final Report 6/2010 Available from CIR
PEG-60 Almond Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-60 Almond Glycerides...	Final Report 12/2014 Available from CIR
PEG-60 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-60 Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-60 Castor Oil Isostearate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-60 Castor Oil Isostearate...	IJT 33(Suppl 4):13-39, 2014
PEG-60 Corn Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-60 Corn Glycerides...	Final Report 12/2014 Available from CIR
PEG-60 Evening Primrose Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-60 Evening Primrose Glycerides...	Final Report 12/2014 Available from CIR
PEG-60 Glyceryl Diisostearate	S		Final Report Available from CIR 09/2022
PEG-60 Hydrogenated Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-60 Hydrogenated Castor Oil...	IJT 33(Suppl 4):13-39, 2014

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-60 Hydrogenated Castor Oil Laurate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-60 Hydrogenated Castor Oil Laurate...	IJT 33(Suppl 4):13-39, 2014
PEG-60 Hydrogenated Castor Oil PCA Isostearate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-60 Hydrogenated Castor Oil PCA Isostearate...	IJT 33(Suppl 4):13-39, 2014
PEG-60 Hydrogenated Castor Oil Triisostearate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-60 Hydrogenated Castor Oil Triisostearate...	IJT 33(Suppl 4):13-39, 2014
PEG-60 Lanolin	S		IJT 18(S1):61-68, 1999; IJT 37(Suppl. 1):19-27, 2018
PEG-60 Passiflora Edulis Seed Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-60 Passiflora Edulis Seed Glycerides...	Final Report 12/2014 Available from CIR
PEG-60 Passiflora Incarnata Seed Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-60 Passiflora Incarnata Seed Glycerides...	Final Report 12/2014 Available from CIR
PEG-60 Shea Butter Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-60 Shea Butter Glycerides...	Final Report 12/2014 Available from CIR
PEG-60 Sorbitan Stearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-60 Sorbitan Stearate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-60 Sorbitan Tetraoleate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-60 Sorbitan Tetraoleate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-60 Sorbitan Tetrastearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-60 Sorbitan Tetrastearate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-60 Sorbitol Tetrastearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-60 Sorbitol Tetrastearate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-60 Tsubakiate Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-60 Tsubakiate Glycerides...	Final Report 12/2014 Available from CIR
PEG-65 Hydrogenated Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-65 Hydrogenated Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-65M	S		Final Report 6/2010 Available from CIR
PEG-7	S		Final Report 6/2010 Available from CIR
PEG-7 Caprylic/Capric Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-7 Caprylic/Capric Glycerides...	Final Report 12/2014 Available from CIR
PEG-7 Cocamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxylated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-7 Cocamide...	Final Report 06/2019 Available from CIR
PEG-7 Cocoglycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-7 Cocoglycerides...	Final Report 12/2014 Available from CIR

 Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-8 Dioleate	SQ	<p>The CIR Expert Panel concluded that butylene glycol diisononanoate, cetearyl isononanoate, cetearyl nonanoate, cetyl isononanoate, cholesteryl nonanoate, diethylene glycol diethyl-hexanoate/ diisononanoate, dipentaerythrityl pentaiononanoate, ethylhexyl isononanoate, isodecyl isononanoate, isononyl isononanoate, isotridecyl isononanoate, neopentyl glycol diisononanoate, PEG-2 diisononanoate, PEG-5 isononanoate, pentaerythrityl tetraiononanoate, polyglyceryl-20 octaiononanoate, tridecyl isononanoate, ethylhexyl pelargonate, pentaerythrityl tetrapelargonate, cellobiose octanonoate, diethylene glycol diisononanoate, dihydrocholesteryl nonanoate, glycereth-7 diisononanoate, isostearyl isononanoate, phytosteryl nonanoate, propylene glycol diisononanoate, ethyl pelargonate, isobutyl pelargonate, methyl pelargonate, neopentyl glycol dicaprylate/dipelargonate/dicaprate, and pelargonic acid are safe as cosmetic ingredients in the present practices of use and concentration described in this safety assessment.</p>	Final Report 3/2015 Available from CIR
PEG-8 Distearate	SQ	<p>The CIR Expert Panel concluded that butylene glycol diisononanoate, cetearyl isononanoate, cetearyl nonanoate, cetyl isononanoate, cholesteryl nonanoate, diethylene glycol diethyl-hexanoate/ diisononanoate, dipentaerythrityl pentaiononanoate, ethylhexyl isononanoate, isodecyl isononanoate, isononyl isononanoate, isotridecyl isononanoate, neopentyl glycol diisononanoate, PEG-2 diisononanoate, PEG-5 isononanoate, pentaerythrityl tetraiononanoate, polyglyceryl-20 octaiononanoate, tridecyl isononanoate, ethylhexyl pelargonate, pentaerythrityl tetrapelargonate, cellobiose octanonoate, diethylene glycol diisononanoate, dihydrocholesteryl nonanoate, glycereth-7 diisononanoate, isostearyl isononanoate, phytosteryl nonanoate, propylene glycol diisononanoate, ethyl pelargonate, isobutyl pelargonate, methyl pelargonate, neopentyl glycol dicaprylate/dipelargonate/dicaprate, and pelargonic acid are safe as cosmetic ingredients in the present practices of use and concentration described in this safety assessment.</p>	Final Report 3/2015 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		The CIR Expert Panel concluded that butylene glycol diisononanoate, cetearyl isononanoate, cetearyl nonanoate, cetyl isononanoate, cholesteryl nonanoate, diethylene glycol diethyl-hexanoate/ diisononanoate, dipentaerythrityl pentaiononanoate, ethylhexyl isononanoate, isodecyl isononanoate, isononyl isononanoate, isotridecyl isononanoate, neopentyl glycol diisononanoate, PEG-2 diisononanoate, PEG-5 isononanoate, pentaerythrityl tetraiononanoate, polyglyceryl-20 octaiononanoate, tridecyl isononanoate, ethylhexyl pelargonate, pentaerythrityl tetrapelargonate, cellobiose octanonanoate, diethylene glycol diisononanoate, dihydrocholesteryl nonanoate, glycereth-7 diisononanoate, isostearyl isononanoate, phytosteryl nonanoate, propylene glycol diisononanoate, ethyl pelargonate, isobutyl pelargonate, methyl pelargonate, neopentyl glycol dicaprylate/dipelargonate/dicaprate, and pelargonic acid are safe as cosmetic ingredients in the present practices of use and concentration described in this safety assessment.	
PEG-8 Ditallate	SQ		Final Report 3/2015 Available from CIR
PEG-8 Hydrogenated Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-8 Hydrogenated Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-8 Hydrogenated Fish Glycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-8 Hydrogenated Fish Glycerides...	Final Report 12/2014 Available from CIR
PEG-8 Hydrogenated Tallow Amine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-8 Hydrogenated Tallow Amine...	Final Report 6/2015 Available from CIR
PEG-8 Laurate	SQ	On the basis of the available data, the CIR Expert Panel concludes that ... PEG-8 Laurate is safe for use in cosmetics at concentrations up to 25%.	IJT 19(S2):29-41, 2000
PEG-8 Methicone	S		Final Report 12/2014 Available from CIR
PEG-8 Methyl Ether Dimethicone	S		Final Report 12/2014 Available from CIR
PEG-8 PEG-4 Dimethicone	S		Final Report 12/2014 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-8 PPG-8 Dimethicone	S		Final Report 12/2014 Available from CIR
PEG-8 Propylene Glycol Cocoate	S		IJT 20(suppl 4):13-26, 2001;Final Report 12/2016 Available from CIR
PEG-8 Propylheptyl Ether	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...PEG-8 Propylheptyl Ether...	IJT 31(Suppl. 2):169-244, 2012
PEG-8 Sorbitan Beeswax	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-8 Sorbitan Beeswax...	IJT 20(suppl 4):27-38, 2001;Final Report 6/2015 Available from CIR
PEG-8 Soyamine	SQ	The Panel concluded that the following 47 PEGs cocamine and related ingredients are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-8 Soyamine...	Final Report 6/2015 Available from CIR
PEG-8 Stearate	S		JACT 2(7):17-34, 1983; IJT 24(Suppl. 1):1-102, 2005
PEG-8 Tallow Amide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PEG-8 Tallow Amide...	Final Report 06/2019 Available from CIR
PEG-80	S		Final Report 6/2010 Available from CIR
PEG-80 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-80 Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-80 Glyceryl Cocoate	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-80 Glyceryl Cocoate...	IJT 18(S1):33-42, 1999;Final Report 12/2014 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PEG-80 Hydrogenated Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-80 Hydrogenated Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-80 Methyl Glucose Laurate	S		IJT 35(Suppl. 2):12-40, 2016
PEG-80 Sorbitan Laurate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-80 Sorbitan Laurate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-80 Sorbitan Palmitate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...PEG-80 Sorbitan Palmitate...	IJT 19(S2):43-89, 2000;Final Report 6/2015 Available from CIR
PEG-800	S		Final Report 6/2010 Available from CIR
PEG-85 Lanolin	S		JACT 1(4):91-102, 1982; IJT 37(Suppl. 1):19-27, 2018
PEG-9	S		Final Report 6/2010 Available from CIR
PEG-9 Castor Oil	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...PEG-9 Castor Oil...	IJT 33(Suppl 4):13-39, 2014
PEG-9 Cocoglycerides	SQ	The CIR Expert Panel concluded the following 60 PEGylated alkyl glycerides are safe in cosmetics in the present practices of use and concentration when formulated to be non-irritating...PEG-9 Cocoglycerides...	Final Report 12/2014 Available from CIR
PEG-9 Dimethicone	S		JACT 1(4):35-54, 1982;IJT 24(Suppl. 1):1-102, 2005;Final Report 12/2014 Available from CIR

Final Report 9/2016 Available from CIR
Polyglyceryl-10 Dicoate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Dicoate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-10 Didecanoate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Didecanoate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Diisostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Diisostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Dilaurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Dilaurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Dimyristate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Dimyristate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Dioleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Dioleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Dipalmitate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Dipalmitate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Distearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Distearate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-10 Dodeca-Caprylate/Caprate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Dodeca-Caprylate/Caprate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Dodecabeheate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Dodecabeheate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Dodecacaprate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Dodecacaprate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Dodecacaprylate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Dodecacaprylate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Eicosanedioate/Tetradecanedioate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Eicosanedioate/Tetradecanedioate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Hepta(Behenate/Stearate)	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Hepta(Behenate/Stearate)...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Heptahydroxystearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Heptahydroxystearate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-10 Heptaoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Heptaoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Heptastearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Heptastearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Hexaerucate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Hexaerucate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Hexaisostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Hexaisostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Hexaoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Hexaoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Hydroxystearate/Stearate/Eicosadioate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Hydroxystearate/Stearate/Eicosadioate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Isostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Isostearate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-10 Laurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Laurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Linoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Linoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Mono/Dioleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Mono/Dioleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Myristate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Myristate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Nonaerucate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Nonaerucate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Nonaisostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Nonaisostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Oleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Oleate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-10 Palmate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Palmate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Palmitate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Palmitate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Pentacaprylate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Pentacaprylate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Pentahydroxystearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Pentahydroxystearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Pentaisostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Pentaisostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Pentalaurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Pentalaurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Pentalinoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Pentalinoleate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-10 Pentaoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Pentaoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Pentaricinoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Pentaricinoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Pentastearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Pentastearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Sesquistearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Sesquistearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Stearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Stearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Tetradecanedioate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Tetradecanedioate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Tetralaurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Tetralaurate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-10 Tetraoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Tetraoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Tricocoate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Tricocoate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Tridecanoate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Tridecanoate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Trierucate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Trierucate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Triisostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Triisostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Trilaurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Trilaurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Trioleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Trioleate...	Final Report 9/2016 Available from CIR

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-10 Tristearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Tristearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-10 Undecylenate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-10 Undecylenate...	Final Report 9/2016 Available from CIR
Polyglyceryl-15 Diisostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-15 Diisostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Caprate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Caprate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Caprylate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Caprylate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Diisostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Diisostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Dioleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Dioleate...	Final Report 9/2016 Available from CIR

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-2 Distearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Distearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Isopalmitate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Isopalmitate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Isopalmitate/Sebacate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Isopalmitate/Sebacate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Isostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Isostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Lanolin Alcohol Ether	S		IJT 37(Suppl. 1):19-27, 2018
Polyglyceryl-2 Laurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Laurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Myristate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Myristate...	Final Report 9/2016 Available from CIR
Polyglyceryl-2 Oleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-2 Oleate...	Final Report 9/2016 Available from CIR

Polyglyceryl-3 Caprate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Caprate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Caprylate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Caprylate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Cocoate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Cocoate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Di-Hydroxystearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Di-Hydroxystearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Dicaprate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Dicaprate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Dicitrate/Stearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Dicitrate/Stearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Dicocoate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Dicocoate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-3 Diisostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Diisostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Dioleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Dioleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Distearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Distearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Isostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Isostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Laurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Laurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Myristate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Myristate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Oleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Oleate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-3 Palmitate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Palmitate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Pentacaprylate/Caprates	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Pentacaprylate/Caprates...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Pentaolivate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Pentaolivate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Pentaricinoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Pentaricinoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Rice Branate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Rice Branate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Ricinoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Ricinoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Soyate/Shea Butterate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Soyate/Shea Butterate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-3 Stearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Stearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Stearate SE	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Stearate SE...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Triisostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Triisostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-3 Triolive	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-3 Triolive...	Final Report 9/2016 Available from CIR
Polyglyceryl-3/Lauryl Polydimethylsiloxyethyl Dimethicone Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
Polyglyceryl-4 Almondate/Shea Butterate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Almondate/Shea Butterate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Caprate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Caprate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Caprylate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Caprylate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-4 Caprylate/Caprates	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Caprylate/Caprates...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Cocoate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Cocoate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Dilaurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Dilaurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Distearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Distearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Hazelnutseedate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Hazelnutseedate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Isostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Isostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Isostearate/Laurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Isostearate/Laurate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-4 Laurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Laurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Laurate/Sebacate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Laurate/Sebacate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Laurate/Succinate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Laurate/Succinate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Oleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Oleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Pentaoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Pentaoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Pentalmitate/Stearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Pentalmitate/Stearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Pentastearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Pentastearate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-4 Punicate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Punicate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Stearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Stearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Sweet Almondate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Sweet Almondate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4 Tristearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-4 Tristearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-4-PEG-2 Cocamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Polyglyceryl-4-PEG-2 Cocamide...	Final Report 06/2019 Available from CIR
Polyglyceryl-5 Caprate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Caprate...	Final Report 9/2016 Available from CIR
Polyglyceryl-5 Dicaprylate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Dicaprylate...	Final Report 9/2016 Available from CIR

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-5 Dilaurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Dilaurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-5 Dioleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Dioleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-5 Hexastearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Hexastearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-5 Isostearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Isostearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-5 Laurate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Laurate...	Final Report 9/2016 Available from CIR
Polyglyceryl-5 Myristate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Myristate...	Final Report 9/2016 Available from CIR
Polyglyceryl-5 Oleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Oleate...	Final Report 9/2016 Available from CIR

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-5 Tristearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-5 Tristearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Adansonia Digitata Seedate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Adansonia Digitata Seedate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Apricot Kernelate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Apricot Kernelate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Argan Kernelate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Argan Kernelate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Behenate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Behenate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Caprate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Caprate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Caprylate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Caprylate...	Final Report 9/2016 Available from CIR

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-6 Stearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Stearate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Tetrabeheenate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Tetrabeheenate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Tetracaprylate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Tetracaprylate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Tetraoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Tetraoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Tricaprylate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Tricaprylate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Trichilia Emetica Seedate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Trichilia Emetica Seedate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Tristearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Tristearate...	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-6 Undecylenate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Undecylenate...	Final Report 9/2016 Available from CIR
Polyglyceryl-6 Ximenia Americana Seedate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-6 Ximenia Americana Seedate...	Final Report 9/2016 Available from CIR
Polyglyceryl-8 C12-20 Acid Ester	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-8 C12-20 Acid Ester...	Final Report 9/2016 Available from CIR
Polyglyceryl-8 Decabehenate/Caprata	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-8 Decabehenate/Caprata...	Final Report 9/2016 Available from CIR
Polyglyceryl-8 Decaerucate/Decaisostearate/Decaricinole	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-8 Decaerucate/Decaisostearate/Decaricinole...	Final Report 09/27/16 available from CIR
Polyglyceryl-8 Decaerucate/Decaisostearate/Decaricinoleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-8 Decaerucate/Decaisostearate/Decaricinoleate...	Final Report 9/2016 Available from CIR
Polyglyceryl-8 Oleate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-8 Oleate...	Final Report 9/2016 Available from CIR

Quick Reference Table

Ingredient	Finding†	Conclusion	Citation‡
Polyglyceryl-8 Stearate	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Polyglyceryl-8 Stearate...	Final Report 9/2016 Available from CIR
Polyhydroxyethylmethacrylate	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Polyhydroxyethylmethacrylate...	Final Report 12/2018 Available from CIR
Polyisobutene	S		IJT 27 (Suppl. 4):83-106, 2008;IJT 39(S2):59-90,2020
Polyisobutyl Methacrylate	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Polyisobutyl Methacrylate...	Final Report 12/2018 Available from CIR
Polyisoprene	S		IJT 39(S2):59-90,2020
Polymethyl Acrylate	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Polymethyl Acrylate...	Final Report 12/2018 Available from CIR
Polymethyl Methacrylate	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Polymethyl Methacrylate...	IJT 30(Suppl 1):54S-65S, 2011;Final Report 12/2018 Available from CIR
Polymethylsilsesquioxane	S		Final Report 12/2017 Available from CIR
Polymethylsilsesquioxane/Trimethylsiloxysilicate	S		Final Report 12/2017 Available from CIR
Polyoxymethylene Melamine	Z	The safety of this ingredient has not been documented and substantiated. The CIR Expert Panel cannot conclude whether Melamine/Formaldehyde Resin is safe for use in cosmetic products until such time that the appropriate safety data have been obtained and evaluated.	JACT 14(5):373-385, 1995

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		On the basis of the animal, clinical, and use data presented in this report, the CIR Expert Panel concludes that Polyoxymethylene Urea is safe for use as a cosmetic ingredient. Cosmetics containing Polyoxymethylene Urea should be formulated to ensure that concentrations of free formaldehyde not exceed 0.2%. It cannot be concluded that Polyoxymethylene Urea is safe for use in cosmetic products intended to be aerosolized.	
Polyoxymethylene Urea	SQ		JACT 14(3):204-220, 1995; IJT 30(Suppl. 2):73-127, 2011
Polypentaerythrityl Terephthalate	S		IJT 33(Suppl. 3):36-47, 2014
Polypentene	S		IJT 39(S2):59-90,2020
		The CIR Expert Panel concluded that the following two fluoropolymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment. Fluoropolymers PTFE Hexafluoropropylene/Tetrafluoroethylene Copolymer*.	
Polyperfluoroethoxymethoxy Difluoroethyl PEG Diisostearate	Z		Final Report 10/2018 available from CIR
		The CIR Expert Panel concluded that the following two fluoropolymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment. Fluoropolymers PTFE Hexafluoropropylene/Tetrafluoroethylene Copolymer*.	
Polyperfluoroethoxymethoxy Difluoroethyl PEG Ether	Z		Final Report 10/2018 available from CIR
		The CIR Expert Panel concluded that the following two fluoropolymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment. Fluoropolymers PTFE Hexafluoropropylene/Tetrafluoroethylene Copolymer*.	
Polyperfluoroethoxymethoxy Difluorohydroxyethyl Ether	Z		Final Report 10/2018 available from CIR
		The CIR Expert Panel concluded that the following two fluoropolymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment. Fluoropolymers PTFE Hexafluoropropylene/Tetrafluoroethylene Copolymer*.	
Polyperfluoroethoxymethoxy Difluoromethyl Ether	Z		Final Report 10/2018 available from CIR
Polyphosphorylcholine Glycol Acrylate	S		Final Report Available from CIR 06/2022
		The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating.. Polypropyl Methacrylate...

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polyquaternium-47	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Polyquaternium-47...	IJT 31(Suppl. 3):296-341, 2012
Polyquaternium-48	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Polyquaternium-48...	IJT 31(Suppl. 3):296-341, 2012
Polyquaternium-51	S		Final Report Available from CIR 06/2022
Polyquaternium-53	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Polyquaternium-53...	IJT 31(Suppl. 3):296-341, 2012
Polyquaternium-6	S		Final Report Available from CIR 09/2021
Polyquaternium-61	S		Final Report Available from CIR 06/2022
Polyquaternium-63	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Polyquaternium-63...	IJT 31(Suppl. 3):296-341, 2012
Polyquaternium-7	S		JACT 14(6):476-484, 1995; IJT 30(Suppl. 2):73-127, 2011
Polyquaternium-73	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Polyquaternium-73...	IJT 31(Suppl. 3):296-341, 2012
Polyquaternium-91	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Polyquaternium-91...	IJT 31(Suppl. 3):296-341, 2012
Polysilicone-11	S		Final Report Available from CIR 12/2020
Polysilicone-13	S		Final Report 12/2014 Available from CIR
Polysilicone-2	UNS	The CIR Expert Panel concluded that Polysilicone-2, Polysilicone-4, and Polysilicone-5 are safe when used to coat metal oxide particles and that the data are insufficient to determine safety if these ingredients are used independently in cosmetics.	Final Report 9/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Polysilicone-4	UNS	The CIR Expert Panel concluded that Polysilicone-2, Polysilicone-4, and Polysilicone-5 are safe when used to coat metal oxide particles and that the data are insufficient to determine safety if these ingredients are used independently in cosmetics.	Final Report 9/2016 Available from CIR
Polysilicone-5	UNS	The CIR Expert Panel concluded that Polysilicone-2, Polysilicone-4, and Polysilicone-5 are safe when used to coat metal oxide particles and that the data are insufficient to determine safety if these ingredients are used independently in cosmetics.	Final Report 9/2016 Available from CIR
Polysiphonia Lanosa Extract	I	The Expert Panel for Cosmetic Ingredient Safety concluded that the available data are insufficient to make a determination under the intended conditions of use in cosmetic formulations.	Final Report Available from CIR 09/2021
Polysorbate 20	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...Polysorbate 20...	JACT 3(5):1-82, 1984;Final Report 6/2015 Available from CIR
Polysorbate 21	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...Polysorbate 21...	JACT 3(5):1-82, 1984;Final Report 6/2015 Available from CIR
Polysorbate 40	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...Polysorbate 40...	JACT 3(5):1-82, 1984;Final Report 6/2015 Available from CIR
Polysorbate 60	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...Polysorbate 60...	JACT 3(5):1-82, 1984;Final Report 6/2015 Available from CIR
Polysorbate 61	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...Polysorbate 61...	JACT 3(5):1-82, 1984;Final Report 6/2015 Available from CIR
Polysorbate 65	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...Polysorbate 65...	JACT 3(5):1-82, 1984;Final Report 6/2015 Available from CIR

Porphyridium Cruentum Extract	I	The Expert Panel for Cosmetic Ingredient Safety concluded that the available data are insufficient to make a determination under the intended conditions of use in cosmetic formulations.	Final Report Available from CIR 09/2021
Porphyridium Purpureum Extract	I	The Expert Panel for Cosmetic Ingredient Safety concluded that the available data are insufficient to make a determination under the intended conditions of use in cosmetic formulations.	Final Report Available from CIR 09/2021
Portulaca Oleracea Extract	SQ	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 4 Portulaca oleracea-derived ingredients are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-sensitizing. Portulaca Oleracea Extract	Final Report Available from CIR 09/2022
Portulaca Oleracea Flower/Leaf/Stem Extract	SQ	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 4 Portulaca oleracea-derived ingredients are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-sensitizing. Portulaca Oleracea Flower/Leaf/Stem Extract* *Not reported to be in current use. Were ingredients in this group not in current use to be used in the future, the expectation is that they would be used in product categories and at concentrations comparable to others in this group.	Final Report Available from CIR 09/2022
Portulaca Oleracea Juice	SQ	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 4 Portulaca oleracea-derived ingredients are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-sensitizing. Portulaca Oleracea Juice* *Not reported to be in current use. Were ingredients in this group not in current use to be used in the future, the expectation is that they would be used in product categories and at concentrations comparable to others in this group.	Final Report Available from CIR 09/2022

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Portulaca Oleracea Water	SQ	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 4 Portulaca oleracea-derived ingredients are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-sensitizing. Portulaca Oleracea Water* *Not reported to be in current use. Were ingredients in this group not in current use to be used in the future, the expectation is that they would be used in product categories and at concentrations comparable to others in this group.	Final Report Available from CIR 09/2022 IJT 31(Suppl. 1):112-136, 2012
Potassium Acetate	S		
Potassium Acrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Potassium Acrylate Crosspolymer...	Final Report 12/2018 Available from CIR
Potassium Acrylates Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Potassium Acrylates Copolymer...	Final Report 12/2018 Available from CIR
Potassium Acrylates/Acrylamide Copolymer	S		Final Report 03/2022 Available from CIR
Potassium Acrylates/C10-30 Alkyl Acrylate Crosspolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Potassium Acrylates/C10-30 Alkyl Acrylate Crosspolymer...	IJT 36(Suppl 2):59-88, 2017;Final Report 12/2018 Available from CIR
Potassium Acrylates/Ethylhexyl Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Potassium Acrylates/Ethylhexyl Acrylate Copolymer...	Final Report 12/2018 Available from CIR
Potassium Alginate	S		Final Report 9/2015 Available from CIR
Potassium Aluminum Polyacrylate	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Potassium Aluminum Polyacrylate...	IJT 21(Suppl 3):1-50, 2002;Final Report 12/2018 Available from CIR
Potassium Ascorbyl Tocopheryl Phosphate	S		IJT 21(Suppl. 3):51-116, 2002;Final Report 3/2014 Available from CIR

		Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...

Potassium Sorbate	S		JACT 7(6):837-880, 1988; IJT 27(Suppl. 1):77-142, 2008
Potassium Soyate	S		IJT 36(Suppl. 3):51-129, 2017
Potassium Stearate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Potassium Stearate...	JACT 1(2):143-177, 1982;IJT 22(Suppl. 1):1-35, 2003;Final Report 04/2019 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Potassium Stearoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Potassium Stearoyl Glutamate...	IJT 36(Suppl. 1):17-56, 2017
Potassium Sulfite	S		IJT 22(Suppl. 2):63-88, 2003
Potassium Sunflowerseedate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Potassium Sunflowerseedate...	Final Report 04/2019 Available from CIR
Potassium Tallate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Potassium Tallate	IJT 28(Suppl. 3):252-258, 2009;Final Report 04/2019 Available from CIR
Potassium Tallowate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Potassium Tallowate...	Final Report 04/2019 Available from CIR
Potassium Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Potassium Taurate...	Final Report 12/2015 Available from CIR
Potassium Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Potassium Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure. Potassium Thioglycolate in depilatories is safe when formulated to be non-irritating under conditions of recommended use.	IJT 28(Suppl. 1):68-133, 2009
Potassium Toluenesulfonate	SQ	Potassium Toluenesulfonate safe ... as cosmetic ingredient in the present practice of use and concentration as described in this safety assessment, when formulated to be nonirritating	IJT 30(Suppl. 3):270-283, 2011

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Potassium Undecylenate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Potassium Undecylenate...	Final Report 04/2019 Available from CIR
Potassium Undecylenoyl Alginate	S		Final Report 9/2015 Available from CIR
Potassium Undecylenoyl Carrageenan	S		Final Report 9/2015 Available from CIR
Potassium Undecylenoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Potassium Undecylenoyl Glutamate...	IJT 36(Suppl. 1):17-56, 2017
Potassium Xylene Sulfonate	SQ	Potassium Xylene Sulfonate ... safe as cosmetic ingredient in the present practice of use and concentration as described in this safety assessment, when formulated to be nonirritating	IJT 30(Suppl. 3):270-283, 2011
Potassium Xylenesulfonate	SQ	Potassium Xylenesulfonate ... safe as cosmetic ingredient in the present practice of use and concentration as described in this safety assessment, when formulated to be nonirritating	IJT 30(Suppl. 3):270-283, 2011
Potassium-Coco-Hydrolyzed Animal Protein	S		JACT 2(7):75-86, 1983; IJT 24(Suppl. 1):1-102, 2005
Potato Starch Modified	S		Final Report 9/2015 Available from CIR
PPG-1 Hydroxyethyl Caprylamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PPG-1 Hydroxyethyl Caprylamide...	Final Report 06/2019 Available from CIR
PPG-1 Trideceth-13	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-1 Trideceth-13...	IJT 35(Suppl. 1):60-89, 2016
PPG-1 Trideceth-6	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-1 Trideceth-6...	IJT 35(Suppl. 1):60-89, 2016
PPG-1-Ceteth-1	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-1-Ceteth-1...	IJT 35(Suppl. 1):60-89, 2016

Ingredient	Finding†	Conclusion	Citation‡
PPG-2-Isodeceth-12	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Isodeceth-12...	IJT 35(Suppl. 1):60-89, 2016
PPG-2-Isodeceth-18	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Isodeceth-18...	IJT 35(Suppl. 1):60-89, 2016
PPG-2-Isodeceth-25	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Isodeceth-25...	IJT 35(Suppl. 1):60-89, 2016
PPG-2-Isodeceth-4	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Isodeceth-4...	IJT 35(Suppl. 1):60-89, 2016
PPG-2-Isodeceth-6	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Isodeceth-6...	IJT 35(Suppl. 1):60-89, 2016
PPG-2-Isodeceth-8	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Isodeceth-8...	IJT 35(Suppl. 1):60-89, 2016
PPG-2-Isodeceth-9	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Isodeceth-9...	IJT 35(Suppl. 1):60-89, 2016
PPG-2-Laureth-12	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Laureth-12...	IJT 35(Suppl. 1):60-89, 2016
PPG-2-Laureth-5	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Laureth-5...	IJT 35(Suppl. 1):60-89, 2016

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PPG-2-Laureth-8	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-Laureth-8...	IJT 35(Suppl. 1):60-89, 2016
PPG-2-PEG-11 Hydrogenated Lauryl Alcohol Ether	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-2-PEG-11 Hydrogenated Lauryl Alcohol Ether...	IJT 35(Suppl. 1):60-89, 2016
PPG-20	SQ	The CIR Expert Panel concluded that ... PPG-20 and any PG >= 3 are safe as cosmetic ingredients in present practices of use and concentration as described in this safety assessment when formulated to be nonirritating.	JACT 13(6):437-491, 1994;IJT 31(Suppl 2):245-260, 2012
PPG-20 Butyl Ether	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-20 Butyl Ether...	IJT 20(suppl 4):39-52, 2001;IJT 41(S1):5S-43S, 2022
PPG-20 Lanolin Alcohol Ether	S		IJT 37(Suppl. 1):19-27, 2018
PPG-20 Methyl Glucose Ether	S		IJT 35(Suppl. 2):12-40, 2016
PPG-20 Methyl Glucose Ether Acetate	S		IJT 35(Suppl. 2):12-40, 2016
PPG-20 Methyl Glucose Ether Distearate	S		IJT 35(Suppl. 2):12-40, 2016
PPG-20-Buteth-30	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-20-Buteth-30...	IJT 41(S1):5S-43S, 2022
PPG-20-Decyltetradeceth-10	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-20-Decyltetradeceth-10...	IJT 35(Suppl. 1):60-89, 2016
PPG-20-PEG-20 Hydrogenated Lanolin	S		IJT 37(Suppl. 1):19-27, 2018
PPG-22 Butyl Ether	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-22 Butyl Ether...	IJT 20(suppl 4):39-52, 2001;IJT 41(S1):5S-43S, 2022
PPG-23-Steareth-34	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-23-Steareth-34...	IJT 35(Suppl. 1):60-89, 2016

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PPG-24 Butyl Ether	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-24 Butyl Ether...	IJT 20(suppl 4):39-52, 2001;IJT 41(S1):5S-43S, 2022
PPG-24-Buteth-27	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-24-Buteth-27...	IJT 41(S1):5S-43S, 2022
PPG-25 Diethylmonium Chloride	UNS	The CIR Expert Panel concludes that the available data are insufficient to support the safety of PPG-9, -25, and -40 Diethylmonium Chloride for use in cosmetic products.	IJT 18(S3):57-59, 1999
PPG-25 Dimethicone	S		Final Report 12/2014 Available from CIR
PPG-25 Methyl Glucose Ether	S		IJT 35(Suppl. 2):12-40, 2016
PPG-25-Laureth-25	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-25-Laureth-25...	IJT 35(Suppl. 1):60-89, 2016
PPG-26	SQ	The CIR Expert Panel concluded that PG, tripropylene glycol, PPG-3, PPG-7, PPG-9, PPG-12, PPG-13, PPG-15, PPG-16, PPG-17, PPG-20, PPG-26, PPG-30, PPG-33, PPG-34, PPG-51, PPG-52, PPG-69 and any PG >= are safe as cosmetic ingredients in present practices of use and concentration as described in this safety assessment when formulated to be nonirritating.	JACT 13(6):437-491, 1994;IJT 31(Suppl 2):245-260, 2012
PPG-26 Butyl Ether	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-26 Butyl Ether...	IJT 20(suppl 4):39-52, 2001;IJT 41(S1):5S-43S, 2022
PPG-26-Buteth-26	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-26-Buteth-26...	IJT 19(S1):47-67, 2000;IJT 41(S1):5S-43S, 2022
PPG-26/HDI Copolymer	S		Final Report 06/2016 available from CIR
PPG-27 Dimethicone	S		Final Report 12/2014 Available from CIR
PPG-27/9 Butyl Ether Dimethicone	S		Final Report 12/2014 Available from CIR
PPG-28-Buteth-35	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-28-Buteth-35...	IJT 19(S1):47-67, 2000;IJT 41(S1):5S-43S, 2022

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PPG-3	SQ	The CIR Expert Panel concluded that ... PPG-3 and any PG >= 3 are safe as cosmetic ingredients in present practices of use and concentration as described in this safety assessment when formulated to be nonirritating.	IJT 31(Suppl 2):245-260, 2012
PPG-3 Butyl Ether	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-3 Butyl Ether...	IJT 41(S1):5S-43S, 2022
PPG-3 C12-14 Sec-Pareth-7	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-3 C12-14 Sec-Pareth-7...	IJT 35(Suppl. 1):60-89, 2016
PPG-3 Hydroxyethyl Soyamide	SQ	The CIR Expert Panel concluded that the following 40 alkoxyated fatty amides are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...PPG-3 Hydroxyethyl Soyamide...	Final Report 06/2019 Available from CIR
PPG-3 Methyl Ether	S		IJT 28(Suppl. 2):162-174, 2009
PPG-3-Buteth-5	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-3-Buteth-5...	IJT 41(S1):5S-43S, 2022
PPG-3-Isodeceth-1	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-3-Isodeceth-1...	IJT 35(Suppl. 1):60-89, 2016
PPG-3-Isosteareth-9	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-3-Isosteareth-9...	IJT 35(Suppl. 1):60-89, 2016
PPG-3-Laureth-10	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-3-Laureth-10...	IJT 35(Suppl. 1):60-89, 2016
PPG-3-Laureth-12	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-3-Laureth-12...	IJT 35(Suppl. 1):60-89, 2016

PPG-5-Ceteth-20	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-5-Ceteth-20...	IJT 35(Suppl. 1):60-89, 2016
PPG-5-Laureth-5	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-5-Laureth-5...	IJT 35(Suppl. 1):60-89, 2016
PPG-51	SQ	The CIR Expert Panel concluded that ... PPG-51 and any PG $\geq 3$ are safe as cosmetic ingredients in present practices of use and concentration as described in this safety assessment when formulated to be nonirritating.	IJT 31(Suppl 2):245-260, 2012

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
PPG-52	SQ	The CIR Expert Panel concluded that ... PPG-52 and any PG >= 3 are safe as cosmetic ingredients in present practices of use and concentration as described in this safety assessment when formulated to be nonirritating.	IJT 31(Suppl 2):245-260, 2012
PPG-52 Butyl Ether	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-52 Butyl Ether...	IJT 20(suppl 4):39-52, 2001;IJT 41(S1):5S-43S, 2022
PPG-53 Butyl Ether	SQ	The CIR Expert Panel concluded that the following butyl polyoxyalkylene ethers safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...PPG-53 Butyl Ether...	IJT 20(suppl 4):39-52, 2001;IJT 41(S1):5S-43S, 2022
PPG-6	SQ	The CIR Expert Panel concluded that ... PPG-6 and any PG >= 3 are safe as cosmetic ingredients in present practices of use and concentration as described in this safety assessment when formulated to be nonirritating.	IJT 31(Suppl 2):245-260, 2012
PPG-6 C12-15 Pareth-12	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-6 C12-15 Pareth-12...	IJT 35(Suppl. 1):60-89, 2016
PPG-6 C9-11 Pareth-5	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-6 C9-11 Pareth-5...	IJT 35(Suppl. 1):60-89, 2016
PPG-6 Trideceth-8	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-6 Trideceth-8...	IJT 35(Suppl. 1):60-89, 2016
PPG-6-Deceth-4	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-6-Deceth-4...	IJT 35(Suppl. 1):60-89, 2016
PPG-6-Deceth-9	SQ	The CIR Expert Panel concluded that the following 131 alkyl PEG/PPG ethers are safe in the present practices of use and concentration in cosmetics described in this safety assessment when formulated to be non-irritating...PPG-6-Deceth-9...	IJT 35(Suppl. 1):60-89, 2016

Propyl Benzoate	S		IJT 31(Suppl.3):342-372, 2012
Propyl Gallate	SQ	On the basis of the data presented in this report, the CIR Expert Panel concludes that Propyl Gallate is safe in the practices of use as described in this safety assessment at concentrations less than or equal to 0.1%.	JACT 4(3):23-64, 1985; IJT 26(Suppl. 3):89-118, 2007

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Propyl Glycolate...

Ingredient	Finding†	Conclusion	Citation‡
Punica Granatum Fruit/Root/Stem Powder	I	The Panel also concluded that the available data are insufficient to make a determination of safety under the intended conditions of use for the following 9 Punica granatum (pomegranate)-derived ingredients... Punica Granatum Fruit/Root/Stem Powder	Final Report 06/2020 Available from CIR
Punica Granatum Fruit/Sucrose Ferment Filtrate	I	The Panel also concluded that the available data are insufficient to make a determination of safety under the intended conditions of use for the following 9 Punica granatum (pomegranate)-derived ingredients... Punica Granatum Fruit/Sucrose Ferment Filtrate	Final Report 06/2020 Available from CIR
Punica Granatum Juice Extract	S		Final Report 06/2020 Available from CIR
Punica Granatum Leaf Cell Extract	I	The Panel also concluded that the available data are insufficient to make a determination of safety under the intended conditions of use for the following 9 Punica granatum (pomegranate)-derived ingredients... Punica Granatum Leaf Cell Extract	Final Report 06/2020 Available from CIR
Punica Granatum Peel Extract	I	The Panel also concluded that the available data are insufficient to make a determination of safety under the intended conditions of use for the following 9 Punica granatum (pomegranate)-derived ingredients... Punica Granatum Peel Extract	Final Report 06/2020 Available from CIR
Punica Granatum Pericarp Extract	S		Final Report 06/2020 Available from CIR
Punica Granatum Seed	S		Final Report 06/2020 Available from CIR
Punica Granatum Seed Cell Culture Lysate	I	The Panel also concluded that the available data are insufficient to make a determination of safety under the intended conditions of use for the following 9 Punica granatum (pomegranate)-derived ingredients... Punica Granatum Seed Cell Culture Lysate	Final Report 06/2020 Available from CIR
Punica Granatum Seed Extract	S		Final Report 06/2020 Available from CIR
Punica Granatum Seed Oil	S		IJT 36(Suppl. 3):51-129, 2017
Punica Granatum Seed Powder	S		Final Report 06/2020 Available from CIR
Punica Granatum Sterols	S		Final Report 12/2013 Available from CIR
PVM/MA Copolymer	S		IJT 30(Suppl. 2):128-144, 2011
PVP	S		Final Report 12/2018 Available from CIR
PVP/Decene Copolymer	S		Final Report 12/2018 Available from CIR
PVP/Dimethylaminoethylmethacrylate Copolymer	S		IJT 21(Suppl. 3):1-50, 2002;Final Report 12/2018 Available from CIR
PVP/VA/Itaconic Acid Copolymer	S		Final Report 12/2018 Available from CIR
PVP/VA/Vinyl Propionate Copolymer	S		Final Report 12/2018 Available from CIR
Pyrocatechol	U; UNS	The CIR Expert Panel concludes that Pyrocatechol is unsafe for use in leave-on products, and that the available data are insufficient to support the safety of Pyrocatechol as used in hair dyes.	JACT 5(3):123-165, 1986; IJT 16(S1):11-58, 1997
Pyrogallol	S		JACT 10(1):67-85, 1991

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Pyromallitic Glycidyl Dimethacrylate	SQ	Based on available data, the CIR Expert Panel concluded that ... Pyromallitic Glycidyl Dimethacrylate is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	IJT 24(Suppl 5):53-100, 2005
Pyrophyllite	S		IJT 22(Suppl. 1):37-102, 2003
Pyrophyllite	SQ;I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Pyrophyllite.	Final Report 12/2021 Available from CIR
Pyrus Malus (Apple) Bark Extract	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Bark Extract...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Carpel Powder	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Carpel Powder...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Fiber	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Fiber...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Flower Extract	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Flower Extract...	Final Report 4/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Pyrus Malus (Apple) Fruit	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Fruit...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Fruit Extract	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Fruit Extract...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Fruit Water	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Fruit Water...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Juice	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Juice...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Leaf Extract	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Leaf Extract...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Pectin Extract	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Pectin Extract...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Peel Extract	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Peel Extract...	Final Report 4/2016 Available from CIR

Pyrus Malus (Apple) Peel Powder	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Peel Powder...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Peel Wax	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Peel Wax...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Pulp Extract	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Pulp Extract...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Root Bark Powder	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Root Bark Powder...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Root Extract	I	The Panel concluded that the available data are insufficient for evaluating the safety of the following 5 apple-derived ingredients in cosmetic products.	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Seed Extract	SQ	The CIR Expert Panel concluded that the following 21 apple-derived ingredients are safe in the present practices of use and concentration as described in this safety assessment, when formulated to be non-irritating and non-sensitizing...Pyrus Malus (Apple) Seed Extract...	Final Report 4/2016 Available from CIR
Pyrus Malus (Apple) Stem Extract	I	The Panel concluded that the available data are insufficient for evaluating the safety of the following 5 apple-derived ingredients in cosmetic products.	Final Report 4/2016 Available from CIR
Quassin	Z	The CIR Expert Panel concluded ... that the available data are insufficient to support the safety of Quassin... as denaturants.	IJT 27(Suppl. 1):1-43, 2008
Quaternium-15	SQ	Quaternium-15 is safe as a cosmetic ingredient in the practices of use in this safety assessment at concentrations not to exceed 0.2%.	JACT 5(3):61-101, 1986; IJT 29(Suppl. 2):98-114, 2010; IJT 36(Suppl 2):14-58, 2017
Quaternium-18	S		JACT 1(2):71-83, 1982; IJT 22(Suppl. 1):1-35, 2003
Quaternium-18 Bentonite	S		JACT 1(2):71-83, 1982; IJT 22(Suppl. 1):1-35, 2003

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Quaternium-18 Hectorite	S		JACT 1(2):71-83, 1982; IJT 22(Suppl. 1):1-35, 2003; IJT 32(Suppl. 4):33-40, 2013
Quaternium-18/Benzalkonium Bentonite	SQ	The CIR Expert Panel concluded that the alkonium clay ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Quaternium-18/Benzalkonium Bentonite...	Final Report 4/2016 Available from CIR
Quaternium-22	S		JACT 14(6):485-497, 1995; IJT 30(Suppl. 2):73-127, 2011
Quaternium-26	SQ	Based on the available animal and clinical data in this report, the CIR Expert Panel concludes that Quaternium-26 is safe in the present practices of use. Quaternium-26 should not be used in products in which N-nitroso compounds may be formed.	IJT 19(S1):69-75, 2000
Quaternium-90 Bentonite	SQ	The CIR Expert Panel concluded that the alkonium clay ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Quaternium-90 Bentonite...	Final Report 4/2016 Available from CIR
Quaternium-90 Montmorillonite	SQ	The CIR Expert Panel concluded that the alkonium clay ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Quaternium-90 Montmorillonite...	Final Report 4/2016 Available from CIR
Quaternium-90 Sepiolite	SQ	The CIR Expert Panel concluded that the alkonium clay ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Quaternium-90 Sepiolite...	Final Report 4/2016 Available from CIR
Raffinose Isostearate	S		IJT 40(Suppl 2):52-116;2021

Sodium Behenate	SQ		Final Report 04/2019 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		The Panel concluded that the following alkanoyl lactyl lactate salts are safe in cosmetics in the present practices of use and concentration described in the safety assessment, when formulated to be non-irritating and non-sensitizing, which	
Sodium Behenoyl Lactylate	SQ	may be based on a QRA or other accepted methodologies...Sodium Behenoyl Lactylate...	Final Report 06/2019 Available from CIR
Sodium Benzoate	S		IJT 20(suppl 3):23-50, 2001; IJT 36(Suppl. 3):5-30, 2017
Sodium Benzotriazolyl Butylphenol Sulfonate	S		Final Report 3/2015 Available from CIR
Sodium Bicarbonate	S		JACT 6(1):121-138, 1987; IJT 25(Suppl. 2) :1-89,2006
Sodium Bisulfite	S		IJT 22(Suppl. 2):63-88, 2003
		The Expert Panel concludes that Sodium Borate and Boric Acid, in concentrations less than or equal to 5 percent, are safe as cosmetic ingredients when used as currently recommended; however, cosmetic formulations containing free Sodium Borate or Boric Acid at this concentration should not be used on infant skin or injured skin.	
		Note: In 2003, the CIR Expert Panel considered available new data on these ingredients and reaffirmed the above conclusion.	
Sodium Borate	SQ		JACT 2(7):87-125, 1983; IJT 25(Suppl. 2) :1-89,2006
		Based upon the data included in this report the CIR Expert Panel concludes that Sodium Bromate and Potassium Bromate may be used in cosmetic permanent wave formulations at concentrations not to exceed 10.17%, measured as Sodium Bromate.	
Sodium Bromate	SQ		JACT 13(5):400-414, 1994; IJT 30(Suppl. 2):73-127, 2011
Sodium Butyl Ester of PVM/MA Copolymer	S		IJT 30(Suppl. 2):128-144, 2011
		The CIR Expert Panel concluded that the following 20 parabens are safe in cosmetics in the present practices of use and	
		concentration described in the safety assessment when the sum of the combined concentration of parabens in any given	
		formulation does not exceed 0.8 %...Sodium Butylparaben...

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium C12-14 Olefin Sulfonate	SQ	Based on the available data the CIR Expert Panel concludes Sodium a-Olefin Sulfonates (of chain lengths C12-14, C14-16, C14-18 and C16-18) to be safe as used in rinse-off products and safe up to 2% in leave-on products. The concentration of the gamma sultone impurity of any formulation (leave-on or rinse-off) is limited to: unsubstituted alkane sultones =10 ppm; chlorosultones &#8804; 1 ppm and unsaturated sultones &#8804; 0.1 ppm.	IJT 17(S5):39-65, 1998
Sodium C12-15 Pareth Sulfate	S		IJT 29(Suppl. 3) :151-161,2010
Sodium C14-16 Olefin Sulfonate	SQ	Based on the available data the CIR Expert Panel concludes Sodium a-Olefin Sulfonates (of chain lengths C12-14, C14-16, C14-18 and C16-18) to be safe as used in rinse-off products and safe up to 2% in leave-on products. The concentration of the gamma sultone impurity of any formulation (leave-on or rinse-off) is limited to: unsubstituted alkane sultones =10 ppm; chlorosultones &#8804; 1 ppm and unsaturated sultones &#8804; 0.1 ppm.	IJT 17(S5):39-65, 1998
Sodium C14-18 Olefin Sulfonate	SQ	Based on the available data the CIR Expert Panel concludes Sodium a-Olefin Sulfonates (of chain lengths C12-14, C14-16, C14-18 and C16-18) to be safe as used in rinse-off products and safe up to 2% in leave-on products. The concentration of the gamma sultone impurity of any formulation (leave-on or rinse-off) is limited to: unsubstituted alkane sultones =10 ppm; chlorosultones &#8804; 1 ppm and unsaturated sultones &#8804; 0.1 ppm.	IJT 17(S5):39-65, 1998
Sodium C16-18 Olefin Sulfonate	SQ	Based on the available data the CIR Expert Panel concludes Sodium a-Olefin Sulfonates (of chain lengths C12-14, C14-16, C14-18 and C16-18) to be safe as used in rinse-off products and safe up to 2% in leave-on products. The concentration of the gamma sultone impurity of any formulation (leave-on or rinse-off) is limited to: unsubstituted alkane sultones =10 ppm; chlorosultones &#8804; 1 ppm and unsaturated sultones &#8804; 0.1 ppm.	IJT 17(S5):39-65, 1998
Sodium Camellia Japonica Seedate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Camellia Japonica Seedate... Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		Based on the available information included in this report, the CIR Expert Panel concludes that Glycolic and Lactic Acid, their common salts and their simple esters, are safe for use in cosmetic products at concentrations less than or equal to 10%, at final formulation pH greater than or equal to 3.5, when formulated to avoid increasing sun sensitivity or when directions for use include the daily use of sun protection. These ingredients are safe for use in salon products at concentrations less than or equal to 30%, at final formulation pH greater than or equal to 3.0, in products designed for brief, discontinuous use followed by thorough rinsing from the skin, when applied by trained professionals, and when application is accompanied by directions for the daily use of sun protection...Sodium Lactate...	
Sodium Lactate	SQ		IJT 17(S1):1-241, 1998; IJT 36(Suppl 2):14-58, 2017
Sodium Laneth Sulfate	S		IJT 29(Suppl. 3) :151-161,2010
		The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Lanolate...	
Sodium Lanolate	SQ		Final Report 04/2019 Available from CIR
		The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Lardate...	
Sodium Lardate	SQ		Final Report 04/2019 Available from CIR
		The CIR Expert Panel concludes that the available data are insufficient to support the safety of Sodium Lauraminopropionate and Sodium Lauriminodipropionate for use in cosmetics.	
Sodium Lauraminopropionate	Z		IJT 16(S1):1-9, 1997
		The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Laurate...	
Sodium Laurate	SQ		Final Report 04/2019 Available from CIR
		The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Laurate/Linoleate/Oleate/Palmitate...	
Sodium Laurate/Linoleate/Oleate/Palmitate	SQ		Final Report 04/2019 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium Laureth Sulfate	S		IJT 29(Suppl. 3) :151-161,2010; IJT 24(Suppl. 1):1-102, 2005; JACT 2(5):1-34, 1983
Sodium Lauriminodipropionate	S		IJT 16(S1):1-9, 1997; IJT 32(Suppl. 3):49-55, 2013
Sodium Lauroyl Aspartate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl Aspartate...	IJT 36(Suppl. 1):17-56, 2017
Sodium Lauroyl Collagen Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl Collagen Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Sodium Lauroyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl Glutamate...	IJT 36(Suppl. 1):17-56, 2017
Sodium Lauroyl Isethionate	SQ	The CIR Expert Panel concluded that the 12 isethionate salts listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl Isethionate...	IJT 36(Suppl. 1):5-16, 2017
Sodium Lauroyl Lactylate	SQ	The Panel concluded that the following alkanoyl lactyl lactate salts are safe in cosmetics in the present practices of use and concentration described in the safety assessment, when formulated to be non-irritating and non-sensitizing, which may be based on a QRA or other accepted methodologies...Sodium Lauroyl Lactylate...	Final Report 06/2019 Available from CIR
Sodium Lauroyl Methyl Isethionate	SQ	The CIR Expert Panel concluded that the 12 isethionate salts listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl Methyl Isethionate...	IJT 36(Suppl. 1):5-16, 2017
Sodium Lauroyl Millet Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl Millet Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Sodium Lauroyl Oat Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl Oat Amino Acids...	IJT 36(Suppl. 1):17-56, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium Lauroyl Sarcosinate	SQ	The CIR Expert Panel concluded that the following ingredients are safe as used in cosmetics when formulated to be non-irritating. The Expert Panel cautions that these ingredients should not be used in cosmetic products in which N-nitroso compounds can be found...Sodium Lauroyl Sarcosinate...	IJT 20(S1):1-14, 2001;IJT 40(S2):117-133,2021
Sodium Lauroyl Silk Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl Silk Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Sodium Lauroyl Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Lauroyl Taurate...	Final Report 12/2015 Available from CIR
Sodium Lauroyl Wheat Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl Wheat Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Sodium Lauroyl/Myristoyl Aspartate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Lauroyl/Myristoyl Aspartate...	IJT 36(Suppl. 1):17-56, 2017
Sodium Lauryl Phosphate	SQ	The CIR Expert Panel concluded the following 28 alkyl phosphates are safe in the present practices of use and concentration in cosmetics when formulated to be non-irritating...Sodium Lauryl Phosphate...	IJT 38(S2):12-32,2019
Sodium Lauryl Sulfate	SQ	Sodium Lauryl Sulfate and Ammonium Lauryl Sulfate appear to be safe in formulations designed for discontinuous, brief use followed by thorough rinsing from the surface of the skin. In products intended for prolonged contact with skin, concentrations should not exceed 1%.	JACT 2(7):127-181, 1983; IJT 24(Suppl. 1):1-102, 2005
Sodium Lauryl Sulfoacetate	S		JACT 6(3):261-277, 1987; IJT 25(Suppl. 2) :1-89,2006
Sodium Levulinate	S		Final Report Available from CIR 09/2021
Sodium Linoleate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Linoleate...	Final Report 04/2019 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium m-Nitrobenzenesulfonate	Z	The CIR Expert Panel concludes that the data available on Sodium m-Nitrobenzenesulfonate are insufficient to support the safety of this ingredient as used in cosmetic products.	JACT 15(4):337-347, 1996
Sodium Macadamia seed oil	S		IJT 36(Suppl. 3):51-129, 2017
Sodium Magnesium Aluminum Silicate	SQ;I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Sodium Magnesium Aluminum Silicate.	Final Report 12/2021 Available from CIR
Sodium Magnesium Silicate	SQ;I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Sodium Magnesium Silicate.	Final Report 12/2021 Available from CIR
Sodium Magnesium Silicate	S		IJT 22(Suppl. 1):37-102, 2003
Sodium Malate	SQ	On the basis of the animal and clinical data included in this report, the CIR Expert Panel concludes that Malic Acid and Sodium Malate are safe for use as pH adjusters in cosmetic formulations. The Expert Panel determined that the data are insufficient to determine the safety of these ingredients for any other functions.	IJT 20(S1):47-55, 2001
Sodium Manganese Sulfate	S		IJT 36(Suppl. 3):51-129, 2017
Sodium Mannose Phosphate	I	The Panel also concluded that the available data are insufficient to make a determination that the polyol phosphates listed below are safe under the intended conditions of use in cosmetic formulations...Sodium Mannose Phosphate...	Final Report 10/2018 Available from CIR
Sodium Metabisulfite	S		IJT 22(Suppl. 2):63-88, 2003

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium Metaphosphate	SQ	The CIR Expert Panel concluded that the following 31 ingredients are safe in the present practices of use and concentration in cosmetics as described in this safety assessment, when formulated to be non-irritating...Sodium Metaphosphate...	Final Report 9/2016 Available from CIR
Sodium Metasilicate	SQ;I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Sodium Metasilicate.	Final Report 12/2021 Available from CIR
Sodium Metasilicate	S		IJT 24(S1):103-117, 2005
Sodium Methacrylate/Styrene Copolymer	S		Final Report 9/2014 Available from CIR
Sodium Methyl Cocoyl Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Methyl Cocoyl Taurate...	Final Report 12/2015 Available from CIR
Sodium Methyl Isethionate	SQ	The CIR Expert Panel concluded that the 12 isethionate salts listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Methyl Isethionate...	IJT 36(Suppl. 1):5-16, 2017
Sodium Methyl Lauroyl Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Methyl Lauroyl Taurate...	Final Report 12/2015 Available from CIR
Sodium Methyl Myristoyl Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Methyl Myristoyl Taurate...	Final Report 12/2015 Available from CIR
Sodium Methyl Oleoyl Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Methyl Oleoyl Taurate...	Final Report 12/2015 Available from CIR
Sodium Methyl Palmitoyl Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Methyl Palmitoyl Taurate...	Final Report 12/2015 Available from CIR

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium Methyl Stearoyl Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Methyl Stearoyl Taurate...	Final Report 12/2015 Available from CIR
Sodium Methylparaben	SQ	The CIR Expert Panel concluded that the following 20 parabens are safe in cosmetics in the present practices of use and concentration described in the safety assessment when the sum of the combined concentration of parabens in any given formulation does not exceed 0.8 %...Sodium Methylparaben...	IJT 39(S1):5-97,2020
Sodium Methyltaurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Methyltaurate...	Final Report 12/2015 Available from CIR
Sodium Methyltaurate Isopalmitamide	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Methyltaurate Isopalmitamide...	Final Report 12/2015 Available from CIR
Sodium Methyltaurine Cocoyl Methyltaurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Methyltaurine Cocoyl Methyltaurate...	Final Report 12/2015 Available from CIR
Sodium Myreth Sulfate	S		IJT 29(Suppl. 3) :151-161,2010;JACT 11(1):157-163, 1992
Sodium Myristate	S		IJT 29(Suppl. 3):162-186,2010
Sodium Myristoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Myristoyl Glutamate...	IJT 36(Suppl. 1):17-56, 2017
Sodium Myristoyl Isethionate	SQ	The CIR Expert Panel concluded that the 12 isethionate salts listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Myristoyl Isethionate...	IJT 36(Suppl. 1):5-16, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium Myristoyl Sarcosinate	SQ	The CIR Expert Panel concluded that the following ingredients are safe as used in cosmetics when formulated to be non-irritating. The Expert Panel cautions that these ingredients should not be used in cosmetic products in which N-nitroso compounds can be found...Sodium Myristoyl Sarcosinate...	IJT 20(S1):1-14, 2001;IJT 40(S2):117-133,2021
Sodium Myristyl Sulfate	S		IJT 29(Suppl. 2):115-132, 2010
Sodium N-Isostearoyl Methyltaurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium N-Isostearoyl Methyltaurate...	Final Report 12/2015 Available from CIR
Sodium Naphthalenesulfonate	SQ	On the basis of the available data, the CIR Panel concludes that Sodium Polynaphthalenesulfonate and Sodium Naphthalenesulfonate are safe as used in cosmetic formulations intended to be applied to the skin. The available data, however, are insufficient to support the safety for use in cosmetic products which may contact mucous membranes or be ingested.	Final Report 3/1999 Available from CIR;IJT 22(Suppl. 2):37-44, 2003
Sodium Octoxynol-2 Ethane Sulfonate	SQ	The Panel also concluded that ... Sodium Octoxynol-2 Ethane Sulfonate is safe as used in rinse-off cosmetic products and safe at concentrations of 5% in leave-on cosmetic products.	IJT 23(Suppl. 1):59-111, 2004
Sodium Octoxynol-2 Sulfate	SQ	The Panel also concluded that ... Sodium Octoxynol-2 Sulfate is safe as used in rinse-off cosmetic products and safe at concentrations of 5% in leave-on cosmetic products.	IJT 23(Suppl. 1):59-111, 2004
Sodium Octoxynol-6 Sulfate	SQ	The Panel also concluded that Sodium Octoxynol-6 Sulfate is safe as used in rinse-off cosmetic products and safe at concentrations of 5% in leave-on cosmetic products.	IJT 23(Suppl. 1):59-111, 2004
Sodium Octoxynol-9 Sulfate	S		IJT 23(Suppl. 1):59-111, 2004
Sodium Oleate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Oleate...	Final Report 04/2019 Available from CIR
Sodium Oleoyl Isethionate	SQ	The CIR Expert Panel concluded that the 12 isethionate salts listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Oleoyl Isethionate...	IJT 36(Suppl. 1):5-16, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium Oleoyl Lactylate	SQ	The Panel concluded that the following alkanoyl lactyl lactate salts are safe in cosmetics in the present practices of use and concentration described in the safety assessment, when formulated to be non-irritating and non-sensitizing, which may be based on a QRA or other accepted methodologies...Sodium Oleoyl Lactylate...	Final Report 06/2019 Available from CIR
Sodium Oleoyl Sarcosinate	SQ	The CIR Expert Panel concluded that the following ingredients are safe as used in cosmetics when formulated to be non-irritating. The Expert Panel cautions that these ingredients should not be used in cosmetic products in which N-nitroso compounds can be found...Sodium Oleoyl Sarcosinate...	IJT 40(S2):117-133,2021
Sodium Oleth Sulfate	S		IJT 29(Suppl. 3) :151-161,2010
Sodium Oleyl Methyl Isethionate	SQ	The CIR Expert Panel concluded that the 12 isethionate salts listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Oleyl Methyl Isethionate...	IJT 36(Suppl. 1):5-16, 2017
Sodium Oleyl Sulfate	S		IJT 29(Suppl. 2):115-132, 2010
Sodium Oliviate	S		IJT 36(Suppl. 3):51-129, 2017
Sodium Olivoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Olivoyl Glutamate...	IJT 36(Suppl. 1):17-56, 2017
Sodium Oxidized Starch Acetate/Succinate	S		Final Report 9/2015 Available from CIR
Sodium p-Chloro-m-Cresol	SQ	The CIR Expert panel concludes Sodium p-Chloro-m-Cresol, p-Chloro-m-Cresol, Chlorothymol, m-Cresol, o-Cresol, Isopropyl Cresols, Thymol, o-Cymen-5-ol, Cavacrol are safe at concentrations up to 0.5% in cosmetics; however, the available data are insufficient to support the safety of p-Cresol and Mixed Cresols for use in cosmetic products.	IJT 25(Suppl. 1):29-127, 2006
Sodium Palm Kernelate	S		IJT 36(Suppl. 3):51-129, 2017
Sodium Palm Kerneloyl Isethionate	SQ	The CIR Expert Panel concluded that the 12 isethionate salts listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Palm Kerneloyl Isethionate...	IJT 36(Suppl. 1):5-16, 2017
Sodium Palmate	S		IJT 36(Suppl. 3):51-129, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium Palmitate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Palmitate...	Final Report 04/2019 Available from CIR
Sodium Palmitoyl Proline	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Palmitoyl Proline...	IJT 36(Suppl. 1):17-56, 2017
Sodium Palmitoyl Sarcosinate	SQ	The CIR Expert Panel concluded that the following ingredients are safe as used in cosmetics when formulated to be non-irritating. The Expert Panel cautions that these ingredients should not be used in cosmetic products in which N-nitroso compounds can be found...Sodium Palmitoyl Sarcosinate...	IJT 40(S2):117-133,2021
Sodium Palmoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Palmoyl Glutamate...	IJT 36(Suppl. 1):17-56, 2017
Sodium Pantothenate	S		Final Report 12/2017 Available from CIR
Sodium Paraben	SQ	The CIR Expert Panel concluded that the following 20 parabens are safe in cosmetics in the present practices of use and concentration described in the safety assessment when the sum of the combined concentration of parabens in any given formulation does not exceed 0.8 %...Sodium Paraben...	IJT 39(S1):5-97,2020
Sodium PCA	SQ	The CIR Expert Panel concluded that PCA (i.e., 2-pyrrolidone-5-carboxylic acid), calcium PCA, magnesium PCA, potassium PCA, and sodium PCA are safe in cosmetics in the present practices of use and concentration described in this safety assessment. PCA and its salts should not be used in cosmetic products in which N-nitroso compounds can be formed.	IJT 18(S2):25-34, 1999;IJT 38(S2):5-11,2019
Sodium Peanutate	S		IJT 36(Suppl. 3):51-129, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium PEG-50 Hydrogenated Castor Oil Succinate	SQ	The CIR Expert Panel concluded that the 130 PEGylated oil ingredients listed subsequently are safe in the present practices of use and concentration in cosmetics when formulated to be nonirritating. The conclusion supersedes the earlier conclusion issued by the expert panel in 1997...Sodium PEG-50 Hydrogenated Castor Oil Succinate...	IJT 33(Suppl 4):13-39, 2014
Sodium Pentetate	S		IJT 27(Suppl. 2):71-92, 2008
Sodium Persulfate	SQ; I	The CIR Expert Panel concluded that Ammonium, Potassium, and Sodium Persulfate are safe as used as oxidizing agents in hair colorants and hair lighteners designed for brief discontinuous use followed by thorough rinsing from the hair and skin. The Panel also concluded that the available data are insufficient for determining the safety of these persulfates in leave-on products and dentifrices.	IJT 20(suppl 3):7-21, 2001;Final Report 12/2017 Available from CIR
Sodium Phosphate	SQ	The CIR Expert Panel concluded that the following 31 ingredients are safe in the present practices of use and concentration in cosmetics as described in this safety assessment, when formulated to be non-irritating...Sodium Phosphate...	IJT 40(S1):34-85;2021
Sodium Phytate	S		Final Report 10/2018 Available from CIR
Sodium Picramate	S		JACT 11(4):447-464, 1992; IJT 28(Suppl. 3):205-216, 2009
Sodium Polyacrylate	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Sodium Polyacrylate...	IJT 21(Suppl 3):1-50, 2002;Final Report 12/2018 Available from CIR
Sodium Polyacryloyldimethyl Taurate	S		Final Report 4/2017 Available from CIR
Sodium Polymethacrylate	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Sodium Polymethacrylate...	Final Report 12/2018 Available from CIR
Sodium Polynaphthalenesulfonate	SQ	On the basis of the available data, the CIR Panel concludes that Sodium Polynaphthalenesulfonate and Sodium Naphthalenesulfonate are safe as used in cosmetic formulations intended to be applied to the skin. The available data, however, are insufficient to support the safety for use in cosmetic products which may contact mucous membranes or be ingested.	Final Report 3/1999 Available from CIR;IJT 22(Suppl. 2):37-44, 2003

Sodium Starch Octenylsuccinate	S		Final Report 9/2015 Available from CIR
		The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Stearate...	
Sodium Stearate	SQ		JACT 1(2):143-177, 1982;IJT 22(Suppl. 1):1-35, 2003;Final Report 04/2019 Available from CIR
		The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Stearoyl Glutamate...	
Sodium Stearoyl Glutamate	SQ		IJT 36(Suppl. 1):17-56, 2017
		The Panel concluded that the following alkanoyl lactyl lactate salts are safe in cosmetics in the present practices of use and concentration described in the safety assessment, when formulated to be non-irritating and non-sensitizing, which may be based on a QRA or other accepted methodologies...Sodium Stearoyl Lactylate...	
Sodium Stearoyl Lactylate	SQ		Final Report 06/2019 Available from CIR
		The CIR Expert Panel concluded that the 12 isethionate salts listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Stearoyl Methyl Isethionate...	
Sodium Stearoyl Methyl Isethionate	SQ		IJT 36(Suppl. 1):5-16, 2017
Sodium Stearyl Fumarate	S		Final Report 3/2009 Available from CIR
Sodium Stearyl Sulfate	S		IJT 29(Suppl. 2):115-132, 2010
Sodium Styrene/Acrylates Copolymer	S		Final Report 9/2014 Available from CIR
Sodium Styrene/Acrylates/Ethylhexyl Acrylate/Lauryl Acrylate Copolymer	S		Final Report 9/2014 Available from CIR
Sodium Succinate	S		IJT 31(Suppl 1):5-76, 2012

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium Sulfate	SQ	The CIR Expert Panel concluded that Sodium Sulfate is safe in cosmetics in the present practices of use and concentrations described in this safety assessment when formulated to be non-irritating.	IJT 19(S1):77-87, 2000;IJT 40(S1):86-94,2021
Sodium Sulfite	S		IJT 22(Suppl. 2):63-88, 2003
Sodium Sweet Almondate	S		IJT 36(Suppl. 3):51-129, 2017
Sodium Tallate	S		IJT 28(Suppl. 3):252-258, 2009
Sodium Tallow Sulfate	S		IJT 29(Suppl. 2):115-132, 2010
Sodium Tallowate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Tallowate...	Final Report 04/2019 Available from CIR
Sodium Tamanuseedate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Tamanuseedate...	Final Report 04/2019 Available from CIR
Sodium Taurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Taurate...	Final Report 12/2015 Available from CIR
Sodium Taurine Cocoyl Methyltaurate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Sodium Taurine Cocoyl Methyltaurate...	Final Report 12/2015 Available from CIR
Sodium Theobroma Grandiflorum Seedate	S		IJT 36(Suppl. 3):51-129, 2017
Sodium Thioglycolate	SQ	Based on the available data, the CIR Expert Panel concluded that ... Sodium Thioglycolate is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure. Sodium Thioglycolate in depilatories is safe when formulated to be non-irritating under conditions of recommended use.	IJT 28(Suppl. 1):68-133, 2009
Sodium Tocopheryl Phosphate	S		Final Report 3/2014 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium Toluenesulfonate	SQ	Sodium Toluenesulfonate ... safe as cosmetic ingredient in the present practice of use and concentration as described in this safety assessment, when formulated to be nonirritating	IJT 30(Suppl. 3):270-283, 2011
Sodium Trideceth Sulfate	S		IJT 29(Suppl. 3) :151-161,2010
Sodium Tridecyl Sulfate	S		IJT 29(Suppl. 2):115-132, 2010
Sodium Tridecylbenzenesulfonate	SQ	Salts of alkylbenzene sulfonates, including ammonium dodecylbenzenesulfonate, calcium dodecylbenzenesulfonate, DEA-dodecylbenzenesulfonate, isopropylamine dodecylbenzenesulfonate, magnesium isodecylbenzenesulfonate, MIPA-dodecylbenzenesulfonate, potassium dodecylbenzenesulfonate, sodium decylbenzenesulfonate, SDDBS, sodium tridecylbenzenesulfonate, TEA-DDBS, and TEA-tridecylbenzenesulfonate, are safe as cosmetic ingredients in the practices of use given in this safety assessment when formulated to be nonirritating.	IJT 29(Suppl. 4):288-305, 2010
Sodium Trimetaphosphate	SQ	The CIR Expert Panel concluded that the following 31 ingredients are safe in the present practices of use and concentration in cosmetics as described in this safety assessment, when formulated to be non-irritating...Sodium Trimetaphosphate...	Final Report 9/2016 Available from CIR
Sodium Undecylenate	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Sodium Undecylenate...	Final Report 04/2019 Available from CIR
Sodium Undecylenoyl Glutamate	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium Undecylenoyl Glutamate...	IJT 36(Suppl. 1):17-56, 2017
Sodium Xylenesulfonate	SQ	Sodium Xylenesulfonate ... safe as cosmetic ingredient in the present practice of use and concentration as described in this safety assessment, when formulated to be nonirritating	IJT 30(Suppl. 3):270-283, 2011

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Sodium/TEA C12-13 Pareth-3 Sulfate	SQ	The CIR Expert Panel concluded that TEA and the 31 related TEA-containing ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating and when the levels of free diethanolamine do not exceed the present practices of use and concentration of diethanolamine itself. These ingredients should not be used in cosmetic products in which N-nitroso compounds can be formed...Sodium/TEA C12-13 Pareth-3 Sulfate...	IJT 32(Suppl. 1):59-83, 2013
Sodium/TEA-Lauroyl Collagen Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium/TEA-Lauroyl Collagen Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Sodium/TEA-Lauroyl Keratin Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium/TEA-Lauroyl Keratin Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Sodium/TEA-Undecylenoyl Alginate	S		Final Report 9/2015 Available from CIR
Sodium/TEA-Undecylenoyl Carrageenan	S		Final Report 9/2015 Available from CIR
Sodium/TEA-Undecylenoyl Collagen Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Sodium/TEA-Undecylenoyl Collagen Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Solanum Lycopersicum (Tomato) Fruit Oil	S		IJT 36(Suppl. 3):51-129, 2017
Solanum Lycopersicum (Tomato) Seed Oil	S		IJT 36(Suppl. 3):51-129, 2017
Solanum Tuberosum (Potato) Starch	S		Final Report 9/2015 Available from CIR
Soluble Collagen	S		IJT 41(S2):21S-42S, 2022
Soluble Elastin	S		IJT 41(S2):21S-42S, 2022
Soluble Keratin	S		IJT 40(Suppl 2):36-51;2021
Sorbeth-12 Hexacocoate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...Sorbeth-12 Hexacocoate...	Final Report 6/2015 Available from CIR
Sorbeth-150 Hexastearate	SQ	The CIR Expert Panel concluded that the polysorbates listed below are safe in cosmetics when formulated to be nonirritating. This conclusion supersedes the conclusion reached in the 1984, 2000, and 2001 CIR safety assessments...Sorbeth-150 Hexastearate...	Final Report 6/2015 Available from CIR

Final Report 9/2016 Available from CIR
Soybean Oil Propylene Glycol Esters	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in this safety assessment in cosmetics when formulated to be non-irritating...Soybean Oil Propylene Glycol Esters...	Final Report 12/2014 Available from CIR
Soytrimonium Chloride	SQ	The CIR Expert Panel concluded the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating...Soytrimonium Chloride...	IJT 31(Suppl. 3):296-341, 2012
Sphacelaria Scoparia Extract	S		Final Report 09/2019 Available from CIR
Spirulina Amino Acids	S		IJT 33(Suppl 4):5-12, 2014
Squalane	S		Final Report 06/2019 Available from CIR
Squalene	S		Final Report 06/2019 Available from CIR
Starch Acetate	S		Final Report 9/2015 Available from CIR
Starch Acetate/Adipate	S		Final Report 9/2015 Available from CIR
Starch Diethylaminoethyl Ether	S		Final Report 9/2015 Available from CIR
Starch Hydroxypropyltrimonium Chloride	S		Final Report 9/2015 Available from CIR
Starch Laurate	S		Final Report 9/2015 Available from CIR
Starch Tallowate	S		Final Report 9/2015 Available from CIR
Starch/Acrylates/Acrylamide Copolymer	S		Final Report 03/2022 Available from CIR
Steapyrium Chloride	S		JACT 10(1):87-97, 1991; IJT 30(Suppl. 2):73-127, 2011
Stearalkonium Bentonite	SQ	The CIR Expert Panel concluded that the alkonium clay ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Stearalkonium Bentonite...	Final Report 4/2016 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Stearalkonium Chloride	S		JACT 1(2):57-69, 1982; IJT 22(Suppl. 1):1-35, 2003
Stearalkonium Hectorite	S		IJT 19(S2):91-98, 2000; IJT 32(Suppl. 4):33-40, 2013
Stearamide DEA	SQ	The CIR Expert Panel concluded that the following 33 diethanolamides are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating and when the levels of free diethanolamine in the diethanolamides do not exceed the present practices of use and concentration of diethanolamine itself. The Expert Panel cautions that ingredients should not be used in cosmetic products in which N-nitroso compounds can be formed.	Final Report 8/1995 Available from CIR; IJT 32(Suppl. 1):36-58, 2013
Stearamide DIBA-Stearate	Z	The CIR Expert Panel concludes that the available data are insufficient to support the safety of Stearamide DIBA-Stearate as used in cosmetic products.	IJT 20(suppl 3):91-97, 2001
Stearamide MEA	SQ	The CIR Expert Panel concluded that the ethanolamides listed subsequently are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating. The Expert Panel cautioned that these ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Stearamide MEA	Final Report 8/1995 Available from CIR; IJT 34(Suppl.1):18-34, 2015
Stearamide MIPA	SQ	The CIR Expert Panel concluded that the 14 alkyl amide MIPA ingredients listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Stearamide MIPA...	Final Report 12/2019 Available from CIR
Stearamidopropyl Betaine	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics as long as they are formulated to be non-sensitizing, which may be based on a QRA...Stearamidopropyl Betaine...	IJT 31(Suppl. 1):77-111, 2012
Stearamidopropyl Dimethicone	S		IJT 22(Suppl. 2):11-35, 2003
Stearamidopropyl Dimethicone	SQ/I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 30 dimethicone, methicone, and substituted-methicone polymers are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for use of these ingredients in products that may be incidentally inhaled when applied using airbrush devices: Stearamidopropyl Dimethicone	Final Report 03/2022 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Stearamidopropyl Dimethylamine	SQ	The CIR Expert Panel concluded that the 24 fatty acid amidopropyl dimethylamines ingredients listed below are safe in cosmetics when they are formulated to be non-sensitizing, which may be based on a QRA...Stearamidopropyl Dimethylamine...	IJT 38(S1):39-69,2019
Stearamine	I	The safety of Lauramine and Stearamine has not been documented and substantiated. The CIR Expert Panel cannot conclude whether these ingredients are safe for use in cosmetic products until the appropriate safety data have been obtained and evaluated.	JACT 14(3):196-203, 1995
Stearamine Oxide	SQ	On the basis of the available animal and clinical data presented in this report, the CIR Expert Panel concludes that Lauramine Oxide and Stearamine Oxide are safe as cosmetic ingredients for "rinse-off" products under present conditions of use. For use in "leave-on" products, the Expert Panel concludes that Lauramine Oxide should be limited to 3.7% and Stearamine Oxide to 5%.	JACT 13(3):231-245, 1994; IJT 30(Suppl. 2):73-127, 2011
Steareth-1	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-1...	IJT 31(Suppl. 2):169-244, 2012
Steareth-10	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-10...	JACT 7(6):881-910, 1988;IJT 27(Suppl. 1):77-142, 2008;IJT 31(Suppl. 2):169-244, 2012
Steareth-10 Allyl Ether/Acrylates Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..Steareth-10 Allyl Ether/Acrylates Copolymer...	IJT 21(Suppl 3):1-50, 2002;Final Report 12/2018 Available from CIR

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Steareth-100	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-100...	IJT 31(Suppl. 2):169-244, 2012
Steareth-100/PEG-136/HDI Copolymer	S		Final Report 06/2016 available from CIR
Steareth-11	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-11...	JACT 7(6):881-910, 1988;IJT 27(Suppl. 1):77-142, 2008;IJT 31(Suppl. 2):169-244, 2012
Steareth-12	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-12...	IJT 31(Suppl. 2):169-244, 2012
Steareth-13	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-13...	JACT 7(6):881-910, 1988;IJT 27(Suppl. 1):77-142, 2008;IJT 31(Suppl. 2):169-244, 2012
Steareth-14	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-14...	IJT 31(Suppl. 2):169-244, 2012

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Steareth-15	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-15...	JACT 7(6):881-910, 1988;IJT 27(Suppl. 1):77-142, 2008;IJT 31(Suppl. 2):169-244, 2012
Steareth-16	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-16...	IJT 31(Suppl. 2):169-244, 2012
Steareth-2	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-2...	JACT 7(6):881-910, 1988;IJT 27(Suppl. 1):77-142, 2008;IJT 31(Suppl. 2):169-244, 2012
Steareth-20	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-20...	JACT 7(6):881-910, 1988;IJT 27(Suppl. 1):77-142, 2008;IJT 31(Suppl. 2):169-244, 2012
Steareth-200	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-200...	IJT 31(Suppl. 2):169-244, 2012

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Steareth-21	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-21...	IJT 31(Suppl. 2):169-244, 2012
Steareth-25	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-25...	IJT 31(Suppl. 2):169-244, 2012
Steareth-27	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-27...	IJT 31(Suppl. 2):169-244, 2012
Steareth-3	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-3...	IJT 31(Suppl. 2):169-244, 2012
Steareth-30	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Steareth-30...	IJT 31(Suppl. 2):169-244, 2012

Tetrasodium Glutamate Diacetate		S	Final Report Available from CIR 03/2021
Tetrasodium Pyrophosphate	SQ	The CIR Expert Panel concluded that the following 31 ingredients are safe in the present practices of use and concentration in cosmetics as described in this safety assessment, when formulated to be non-irritating...Tetrasodium Pyrophosphate...	IJT 40(S1):34-85;2021
Theobroma Cacao (Cocoa) Seed Butter	S		IJT 36(Suppl. 3):51-129, 2017
Theobroma Grandiflorum Seed Butter	S		IJT 36(Suppl. 3):51-129, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Theobroma Grandiflorum Seed Butter Polyglyceryl-6 Esters	SQ	The CIR Expert Panel concluded that the 274 polyglyceryl fatty acid esters listed below are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating..Theobroma Grandiflorum Seed Butter Polyglyceryl-6 Esters...	Final Report 9/2016 Available from CIR
Theobromine	S		Final Report 12/2018 Available from CIR
Theophylline	S		Final Report 12/2018 Available from CIR
Thiodipropionic Acid	SQ	The CIR Expert Panel concludes that Dilauryl Thiodipropionate, Thiodipropionic Acid, Dicyl Thiodipropionate, Dimyristyl Thiodipropionate, Distearyl Thiodipropionate, and Ditridecyl Thiodipropionate are safe as cosmetic ingredients in the practices of use and concentration given in this safety assessment when formulated to be non-irritating.	IJT 29(Suppl. 3):137-150,2010
Thioglycolic Acid	SQ	Based on the available data, the CIR Expert Panel concluded that ... Thioglycolic Acid is safe for use in hair straighteners, permanent waves, tonics, dressings, and so forth, wave sets, other non-coloring hair products, and hair dyes and colors, as described in this safety assessment, at concentrations up to 15.2% (as Thioglycolic Acid). Hairdressers should avoid skin contact and minimize consumer skin exposure. ... Thioglycolic Acid in depilatories is safe when formulated to be non-irritating under conditions of recommended use.	JACT 10(1):135-192, 1991; IJT 28(Suppl. 1):68-133, 2009
Threonine	S		IJT 32(Suppl. 4):41-64, 2013
Thymol	SQ	The CIR Expert panel concludes Sodium p-Chloro-m-Cresol, p-Chloro-m-Cresol, Chlorothymol, m-Cresol, o-Cresol, Isopropyl Cresols, Thymol, o-Cymen-5-ol, Cavacrol are safe at concentrations up to 0.5% in cosmetics; however, the available data are insufficient to support the safety of p-Cresol and Mixed Cresols for use in cosmetic products.	IJT 25(Suppl. 1):29-127, 2006
Tin Oxide	S		IJT 33(Suppl 4):40-46, 2014
Titanium Citrate	I	The Panel also concluded that the data are insufficient to determine the safety of the following 4 ingredients: Titanium Citrate... These ingredients are not reported to be in use.	Final Report 04/2019 Available from CIR
Titanium Ethoxide	I	The Panel also concluded that the data are insufficient to determine the safety of the following 4 ingredients:...Titanium Ethoxide... These ingredients are not reported to be in use.	Final Report 04/2019 Available from CIR

Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
		The CIR Expert Panel concluded that TEA and the 31 related TEA-containing ingredients are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating and when the levels of free diethanolamine do not exceed the present practices of use and concentration of diethanolamine itself. These ingredients should not be used in cosmetic products in which N-nitroso compounds can be formed...Triethanolamine-Coco-Hydrolyzed Animal Protein...	
Triethanolamine-Coco-Hydrolyzed Animal Protein	SQ		JACT 2(7):183-235, 1983;IJT 32(Suppl. 1):59-83, 2013
Triethoxycaprylylsilane	S		Final Report 12/2016 Available from CIR
Triethyl Citrate	S		IJT 33(Suppl.2):16-46, 2014
Triethylene Glycol	S		IJT 25(2):121-138, 2006;Final Report 6/2010 Available from CIR
		Based on available data, the CIR Expert Panel concluded that...Triethylene Glycol Dimethacrylate is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	
Triethylene Glycol Dimethacrylate	SQ		IJT 24(Suppl 5):53-100, 2005
Triethylhexyl Citrate	S		IJT 33(Suppl.2):16-46, 2014
		The CIR Expert Panel concluded that tridecyl trimellitate, tricaprylyl/capryl trimellitate*, triethylhexyl trimellitate, triisodecyl trimellitate, and triisotridecyl trimellitate are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating.	
Triethylhexyl Trimellitate	SQ		Final Report 9/2015 Available from CIR
Trifluoropropyl Dimethicone/PEG-10 Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
Trifluoropropyl Dimethicone/Trifluoropropyl Divinyldimethicone Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
Trifluoropropyl Dimethicone/Vinyl Trifluoropropyl Dimethicone/Silsesquioxane Crosspolymer	S		IJT 33(Suppl. 2):65-115, 2014
		The CIR Expert Panel concluded that silica silylate, silica dimethyl silylate, trimethylsiloxysilicate, and trifluoropropyldimethyl/trimethylsiloxysilicate are safe in the present practices of use and concentration described in this safety assessment when formulated and delivered in the final product not to be irritating or sensitizing to the respiratory tract.	
Trifluoropropyldimethyl/trimethylsiloxysilicate	SQ		IJT 32(Suppl. 1):5-24, 2013
Trigonella Foenum-Graecum Hydroxypropyltrimonium Chloride	S		IJT 34(Suppl. 1):35-65, 2015

Undecyl Glucoside	SQ	The CIR Expert Panel concluded that the 19 alkyl glucosides listed below are safe in the present practices of use and concentrations when formulated to be nonirritating...Undecyl Glucoside...	IJT 32(Suppl. 3):22-48, 2013
Undecylenamide DEA	SQ	The CIR Expert Panel concluded that the following 33 diethanolamides are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating and when the levels of free diethanolamine in the diethanolamides do not exceed the present practices of use and concentration of diethanolamine itself. The Expert Panel cautions that ingredients should not be used in cosmetic products in which N-nitroso compounds can be formed...Undecylenamide DEA...	IJT 32(Suppl. 1):36-58, 2013

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Undecylenamide MEA	SQ	The CIR Expert Panel concluded that the ethanolamides listed subsequently are safe in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating. The Expert Panel cautioned that these ingredients should not be used in cosmetic products in which N-nitroso compounds may be formed...Undecylenamide MEA...	IJT 34(Suppl.1):18-34, 2015
Undecylenamidopropyl Betaine	SQ	The CIR Expert Panel concluded that the following ingredients are safe in cosmetics as long as they are formulated to be non-sensitizing, which may be based on a QRA...Undecylenamidopropyl Betaine...	IJT 31(Suppl. 1):77-111, 2012
Undecyleneth-6	SQ	The CIR Expert Panel concluded that the alkyl PEG ethers, listed below, are safe in the present practices of use and concentration described in this safety assessment when formulated to be nonirritating. This assessment is also intended to address future alkyl PEG ether cosmetic ingredients that vary from those ingredients recited herein only by the number of ethylene glycol repeat units...Undecyleneth-6...	IJT 31(Suppl. 2):169-244, 2012
Undecylenic Acid	SQ	The CIR Expert Panel concluded that the following ingredients are safe in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating and non-sensitizing, which may be based on a QRA...Undecylenic Acid...	Final Report 04/2019 available from CIR
Undecylenoyl Collagen Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Undecylenoyl Collagen Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Undecylenoyl Glycine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Undecylenoyl Glycine...	IJT 36(Suppl. 1):17-56, 2017
Undecylenoyl Inulin	S		Final Report 9/2015 Available from CIR
Undecylenoyl Phenylalanine	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Undecylenoyl Phenylalanine...	IJT 36(Suppl. 1):17-56, 2017

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Undecylenoyl Wheat Amino Acids	SQ	The panel concluded that the 115 amino acid alkyl amides listed below are safe in the present practices of use and concentration in cosmetics, when formulated to be non-irritating...Undecylenoyl Wheat Amino Acids...	IJT 36(Suppl. 1):17-56, 2017
Undecylenoyl Xanthan Gum	S		IJT 35(Suppl. 1):5-49, 2016
Urea	S		IJT 24(Suppl. 3):1-56, 2005
Urethane Methacrylate	SQ	Based on available data, the CIR Expert Panel concluded that Urethane Methacrylate ...is safe as used in nail enhancement products when skin contact is avoided. Products containing these ingredients should be accompanied with directions to avoid skin contact, because of the sensitizing potential of Methacrylates.	IJT 24(Suppl 5):53-100, 2005
Urocanic Acid	Z	The safety of this ingredient has not been documented and substantiated. The CIR Expert Panel cannot conclude whether Urocanic Acid is safe for use in cosmetic products until such time as the appropriate safety data have been obtained and evaluated.	JACT 14(5):386-423, 1995
VA/Butyl Maleate/Isobornyl Acrylate Copolymer	SQ	The CIR Expert Panel concluded that the following 126 acrylates copolymers are safe in cosmetics in the present practices of use and concentration described in the safety assessment when formulated to be non-irritating..VA/Butyl Maleate/Isobornyl Acrylate Copolymer... Zinc Phenolsulfonate	S		JACT 5(5):373-390, 1986; IJT 25(Suppl. 2) :1-89,2006
Zinc Phosphate	SQ	The CIR Expert Panel concluded that the following 27 zinc salts are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Zinc Phosphate...	Final Report 3/2018 Available from CIR
Zinc Ricinoleate	S		IJT 26(Suppl. 3):31-77, 2007

Quick Reference Table  
Cosmetic Ingredient Review - September, 2022

Ingredient	Finding†	Conclusion	Citation‡
Zinc Salicylate	SQ	The CIR Expert Panel concluded that the following 27 zinc salts are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Zinc Salicylate...	Final Report 3/2018 Available from CIR
Zinc Silicate	SQ;I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Zinc Silicate.	Final Report 12/2021 Available from CIR
Zinc Stearate	S		IJT 22(Suppl. 1):1-35, 2003; JACT 1(2):143-177, 1982
Zinc Sulfate	SQ	The CIR Expert Panel concluded that the following 27 zinc salts are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Zinc Sulfate...	Final Report 3/2018 Available from CIR
Zinc Undecylenate	SQ	The CIR Expert Panel concluded that the following 27 zinc salts are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating...Zinc Undecylenate...	Final Report 3/2018 Available from CIR
Zinc Zeolite	S		Final Report Available from CIR 06/2022
Zirconium Silicate	S		IJT 22(Suppl. 1):37-102, 2003
Zirconium Silicate	SQ;I	The Expert Panel for Cosmetic Ingredient Safety concluded that the following 24 silicate ingredients are safe in cosmetics in the present practices of use and concentration described in this safety assessment when formulated to be non-irritating, with the exception that the available data are insufficient to make a determination of safety for the use of naturally-sourced (i.e., mined) silicate ingredients in products that may be incidentally inhaled: Zirconium Silicate.	Final Report 12/2021 Available from CIR

†S - safe in the present practices of use and concentration SQ - safe for use in cosmetics, with qualifications I - the available data are insufficient to support safety Z - the available data are insufficient to support safety, but the ingredient is not used U - the ingredient is unsafe for use in cosmetics UNS - ingredients for which the data are insufficient and their use in cosmetics is not supported
